Words and Objections D. Davidson, Jaakko Hintikka, 2012-12-06 It is gratifying to see that philosophers continued interest in Words and Objections has been so strong as to motivate a paperback edition This is gratifying because it vindicates the editors belief in the permanent importance of Quine's philosophy and in the value of the papers commenting on it which were collected in our volume Apart from a couple of small corrections only one change has been made The list of Professor Quine's writings has been brought up to date The editors cannot claim any credit for this improvement however We have not tried to imitate the Library of Living Philosophers volumes and to include Professor Quine's autobiography in this volume but we are fortunate to publish here his brand new auto bibliography 1975 THE EDITORS TABLE OF CONTENTS V PREFACE 1 EDITORIAL INTRODUCTION 1 1 C SMAR T Quine's Philosophy of Science 3 GILBERT HARMAN An Introduction to Translation and Meaning Chapter Two of Word and Object 14 ERIK STENIUS Beginning with Ordinary Things 27 NOAM CHOMSKY Quine's Empirical Assumptions 53 IAAKKO HINTIKKA Behavioral Criteria of Radical Translation 69 BARRY STROUD Conventionalism and the Indeterminacy of Translation 82 P F STRA WSON Singular Terms and Predication 97 118 H P GRICE Vacuous Names P T From a Logical Point of View Willard Van Orman Quine, 1980-05-15 These nine essays are largely concerned with the theory of meaning and references semantics At the same time adjacent portions of philosophy and logic are discussed To the existence of what objects may a given scientific theory be said to be committed And what considerations may suitably guide us in accepting or revising such ontological commitments These are among the questions dealt with in this book particular attention being devoted to the role of abstract entities in mathematics There is speculation on the mechanism whereby objects of one sort or another come to be posited a process in which the notion of identity plays an important part

Quine's Epistemic Norms in Practice Michael Shepanski, 2023-06-29 In this illuminating guide to the criteria of rational theorizing Michael Shepanski identifies, defends and applies W V Quine's epistemic norms: the norms that best explain Quine's decisions to accept some theories and not others. Parts I and II set out the doctrines of this epistemology, demonstrating their potential for philosophical application. Part III is a case study in which Shepanski develops a theory of the propositional attitudes by the method of formalizing inferences to behaviour. He presents critiques of popular alternative views, including foundationalism, the centrality of knowledge and Quine's own epistemological naturalism. By reassessing Quine's normative epistemology, Shepanski advances our understanding of Quine's philosophy whilst providing a guide for our own theorizing.

A Science-Based Critique of Epistemological Naturalism in Quine's Tradition Reto Gubelmann, 2019-07-27 At the intersection of epistemology, metaphilosophy and philosophy of science, this exciting new book examines the epistemic limits of empirical science. It makes a unique contribution to research on epistemological naturalism in Quine's tradition by criticizing the position based on first-order data from empirical psychology and the history of natural science. This way it meets the naturalist on their own ground, not only regarding subject matter but also regarding their epistemic methods. The book explores the works of a variety of philosophers in the field, including W V Quine, Penelope Maddy, Tyler Burge, Stathis Psillos and Howard Sankey. By carefully considering experimental results from behaviourism as well as developmental and perceptual psychology, Gubelmann finds that none of these disciplines can furnish the epistemic means to successfully naturalize the central cognitive preconditions of scientific theorizing. Furthermore, Gubelmann presents novel arguments for the claims that epistemological naturalists are committed to scientific realism and that they are unable to defend this position. Based on these results, Gubelmann concludes that epistemology is not part of empirical science, which directly contradicts epistemological naturalism.

Quine's Naturalism Paul A. Gregory, 2008-08-08 W V Quine was the most important naturalistic philosopher of the twentieth century and a major impetus for the recent resurgence of the view that empirical science is our best avenue to knowledge His views however have not been well understood Critics charge that Quine s naturalized epistemology is circular and that it cannot be normative Yet such criticisms stem from a cluster of fundamental traditional assumptions regarding language theory and the knowing subject the very presuppositions that Quine is at pains to reject Through investigation of Quine s views regarding language knowledge and reality the author offers a new interpretation of Quine s naturalism The naturalism anti naturalism debate can be advanced only by acknowledging and critiquing the substantial theoretical commitments implicit in the traditional view Gregory argues that the responses to the circularity and non normativity objections do just that His analysis further reveals that Quine s departure from the tradition penetrates the conception of the knowing subject and he thus offers a new and engaging defence of Quine s naturalism

Philosophical Methodology: The Armchair or the Laboratory? Matthew Haug, 2013-07-31 What methodology should philosophers follow Should they rely on methods that can be conducted from the armchair Or should they leave the armchair and turn to the methods of the natural sciences such as experiments in the laboratory Or is this opposition itself a false one Arguments about philosophical methodology are raging in the wake of a number of often conflicting currents such as the growth of experimental philosophy the resurgence of interest in metaphysical questions and the use of formal methods This outstanding collection of specially commissioned chapters by leading international philosophers discusses these questions and many more It provides a comprehensive survey of philosophical methodology in the most important philosophical subjects metaphysics epistemology philosophy of language philosophy of mind phenomenology philosophy of science ethics and aesthetics A key feature of the collection is that philosophers discuss and evaluate contrasting approaches in each subject offering a superb overview of the variety of methodological approaches both naturalistic and non naturalistic in each of these areas They examine important topics at the heart of methodological argument including the role of intuitions and conceptual analysis thought experiments introspection and the place that results from the natural sciences should have in philosophical theorizing The collection begins with a fascinating exchange about philosophical naturalism between Timothy Williamson and Alexander Rosenberg and also includes contributions from the following philosophers Lynne Rudder Baker Matt Bedke Greg Currie Michael Devitt Matthew C Haug Jenann Ismael Hilary Kornblith Neil Levy E J Lowe Kirk Ludwig Marie McGinn David Papineau Matthew Ratcliffe Georges Rey Jeffrey W Roland Barry C Smith Amie L Thomasson Valerie Tiberius Jessica Wilson and David W Smith
