Essays On The Trial Of Galileo:

Essays on the Trial of Galileo Richard S. Westfall, 1989 **New Science, New World** Denise Albanese, 1996 In *New Science New World* Denise Albanese examines the discursive interconnections between two practices that emerged in the seventeenth century modern science and colonialism Drawing on the discourse analysis of Foucault the ideology critique of Marxist cultural studies and de Certeau's assertion that the modern world produces itself through alterity she argues that the beginnings of colonialism are intertwined in complex fashion with the ways in which the literary became the exotic other and undervalued opposite of the scientific Albanese reads the inaugurators of the scientific revolution against the canonical authors of early modern literature discussing Galileo's *Dialogue on the Two Chief World Systems* and Bacon's *New Atlantis* as well as Milton's *Paradise Lost* and Shakespeare's *The Tempest* She examines how the newness or novelty of investigating nature is expressed through representations of the New World including the native the feminine the body and the heavens New is therefore shown to be a double sign referring both to the excitement associated with a knowledge oriented away from past practices and to the oppression and domination typical of the colonialist enterprise Exploring the connections between the New World and the New Science and the simultaneously emerging patterns of thought and forms of writing characteristic of modernity Albanese insists that science is at its inception a form of power knowledge and that the modern and postmodern division of Two Cultures the literary and the scientific has its antecedents in the early modern world *New Science New World* makes an important contribution to feminist new historicist and cultural materialist debates about the extent to which the culture of seventeenth century England is proto modern It will offer scholars and students from a wide range of fields a new critical model for historical practice *The New Science and Jesuit Science* M. Feingold, 2013-03-09 This volume makes an important contribution toward a nuanced appreciation of the Jesuits' interaction with modernity and a greater recognition of their contribution to the mathematization of natural philosophy and experimental science The six essays provide a cross section of the complex Jesuit encounter with the mathematical sciences during the 17th century

Studies in Honour of Clifford Edmund Bosworth, Volume II Carole Hillenbrand, 2021-11-08 Professor C E Bosworth FBA is a Middle East historian of world stature In this volume his friends and colleagues come together to honour his 70th birthday This book ranges widely over time and space but its core is the Islamic culture of Iran and Turkey The contributors cover topics from the Arab conquest in the seventh century to Turkish and Iranian nationalism in the twentieth century Special attention is paid to medieval Turco Persian history an area which lies at the heart of Professor Bosworth's oeuvre more than half of the articles fall into this category Moreover five of them focus on that early medieval eastern Iranian world on which he has written so widely While the emphasis lies squarely on history other fields such as religion literature music art and numismatics are also represented Thus the volume offers a conspectus of the cultural contribution of Iran and Turkey to Islamic civilisation **Essays and Reviews** Victor Shea, William Whitla, 2000 *Essays and Reviews* is a collection of seven

articles that appeared in 1860 sparking a Victorian culture war that lasted for at least a decade With pieces written by such prominent Oxford and Cambridge intellectuals as Benjamin Jowett Mark Pattison Baden Powell and Frederick Temple later archbishop of Canterbury the volume engaged the relations between religious faith and current topics of the day in education the classics theology science history literature biblical studies hermeneutics philology politics and philosophy Upon publication the church the university the press the government and the courts both ecclesiastical and secular joined in an intense dispute The book signaled an intellectual and religious crisis raised influential issues of free speech and questioned the authority and control of the Anglican Church in Victorian society The collection became a best seller and led to three sensational heresy trials Although many historians and literary critics have identified *Essays and Reviews* as a pivotal text of high Victorianism until now it has been almost inaccessible to modern readers This first critical edition edited by Victor Shea and William Whitla provides extensive annotation to map the various positions on the controversies that the book provoked The editors place the volume in its complex social context and supply commentary background materials composition and publishing history textual notes and a broad range of new supporting documents including material from the trials manifestos satires and contemporary illustrations Not only does such an annotated critical edition of *Essays and Reviews* indicate the impact that the volume had on Victorian society it also sheds light on our own contemporary cultural institutions and controversies

What I Do Not Believe, and Other Essays Norwood Russell Hanson, 2020-01-29 Fifty years have passed since Norwood Russell Hanson's unexpected death yet he remains an important voice in philosophy of science This book is a revised and expanded edition of a collection of Hanson's essays originally published in 1971 edited by Stephen Toulmin and Harry Woolf The new volume features a comprehensive introduction by Matthew Lund Rowan University and two new essays The first is *Observation and Explanation A Guide to Philosophy of Science* originally published as a posthumous book by Harper and Row This essay written near the end of Hanson's life represents his mature philosophy of science The second new addition Hanson's essay *The Trial of Galileo* is something of a lost work it was only published in a small run collection on famous trials and was left out of the published lists of Hanson's works Ever the outspoken firebrand Hanson found many lessons and warnings from Galileo's trial that were relevant to Cold War America This volume not only contains Hanson's best known work in history and philosophy of science but also highlights the breadth of his philosophical thought Hanson balanced extreme versatility with a unified approach to conceptual and philosophical problems Hanson's central insight is that philosophy and science both strive to render the world intelligible the various concepts central to our attempts to make sense of the world are interdependent and cannot operate or even be fully understood independently The essays included in this collection present Hanson's thinking on religious belief theory observation meaning cosmology modality logic and philosophy of mind This collection also includes Hanson's lectures on the theory of flight Hanson's greatest passion

Blind Watchers of the Sky Edward W. Kolb, Rocky Kolb, 1999 How do we know that the earth travels around the sun the universe is

billions of years old and stars are trillions of miles away Rocky Kolb tells the fascinating story of the people and ideas that have brought us such knowledge of our planet and the universe giving realistic portraits of astronomers like Tycho Kepler Galileo Herschel and Hubble Beginning in 1572 with Tycho's discovery that the heavens can change and ending with the Big Bang of the 20th Century this is a hugely entertaining and witty account of the quest to discover the universe The Academy, 1874 **The Academy and Literature**, 1874 Academy; a Weekly Review of Literature, Learning, Science and Art, 1874 The Poetical gazette the official organ of the Poetry society and a review of poetical affairs nos 4 7 issued as supplements to the Academy v 79 Oct 15 Nov 5 Dec 3 and 31 1910 New Scientist, 1990 **The Saint as Censor** Peter Godman, 2024-02-26 The opening of the archives of the Roman Inquisition and of the Index of Prohibited Books in January 1998 enables us to think afresh about the history of two organisations more notorious than understood Both have been considered almost exclusively from the perspective of their victims such as Galileo Galilei This book uses hitherto secret sources of the Inquisition and Index to reconstruct the history of Roman censorship in its first formative years from the standpoint of Galileo's judge Robert Bellarmine 1542 1621 was a censor for the Index and a consultor to the Holy Office before becoming cardinal inquisitor and three centuries after his death a saint and Doctor of the Church His career provides a paradigm of how an intellectual could make his way to the top in Counter Reformation Rome Censored by Pope Sixtus V Bellarmine responded by suppressing the pontiff's version of the Vulgate and by repressing the Sistine Index of Prohibited Books A new interpretation including a revaluation of Galileo's first trial of Roman censorship is offered in this book Based on unpublished sources from the archives which it edits and interprets for the first time The Saint as Censor will alter our understanding of the Roman Inquisition and the Index **The Messiah of Shiraz** Denis MacEoin, 2009 Based throughout on original Persian and Arabic sources most in manuscript this is an exhaustive overview of Babi history and doctrine Alongside Amanat's Resurrection and Renewal this distillation of a lifetime's work on the movement brings Babi studies into the twentieth century *Reformations* Carlos M. N. Eire, 2016-06-28 This fast paced survey of Western civilization's transition from the Middle Ages to modernity brings that tumultuous period vividly to life Carlos Eire popular professor and gifted writer chronicles the two hundred year era of the Renaissance and Reformation with particular attention to issues that persist as concerns in the present day Eire connects the Protestant and Catholic Reformations in new and profound ways and he demonstrates convincingly that this crucial turning point in history not only affected people long gone but continues to shape our world and define who we are today The book focuses on the vast changes that took place in Western civilization between 1450 and 1650 from Gutenberg's printing press and the subsequent revolution in the spread of ideas to the close of the Thirty Years War Eire devotes equal attention to the various Protestant traditions and churches as well as to Catholicism skepticism and secularism and he takes into account the expansion of European culture and religion into other lands particularly the Americas and Asia He also underscores how changes in religion transformed the Western secular world A

book created with students and nonspecialists in mind Reformation is an inspiring provocative volume for any reader who is curious about the role of ideas and beliefs in history

Injustice Brian Harris, Michael Beloff, 2006-03-22 To a lawyer injustice is the unfair conduct of a trial This book looks into several notorious cases of supposed injustice Socrates Joan of Arc Charles I Admiral Byng Lord Haw Haw and the Nuremberg Trials It looks for answers to the legal question was the trial fair and the humane question was the accused guilty or innocent

The Oxford Dictionary of the Christian Church Andrew Louth, 2022-02-17 Uniquely authoritative and wide ranging in its scope The Oxford Dictionary of the Christian Church is the indispensable reference work on all aspects of the Christian Church It contains over 6 500 cross referenced A Z entries and offers unrivalled coverage of all aspects of this vast and often complex subject from theology churches and denominations patristic scholarship and the bible to the church calendar and its organization popes archbishops other church leaders saints and mystics In this new edition great efforts have been made to increase and strengthen coverage of non Anglican denominations for example non Western European Christianity as well as broadening the focus on Christianity and the history of churches in areas beyond Western Europe In particular there have been extensive additions with regards to the Christian Church in Asia Africa Latin America North America and Australasia Significant updates have also been included on topics such as liturgy Canon Law recent international developments non Anglican missionary activity and the increasingly important area of moral and pastoral theology among many others Since its first appearance in 1957 the ODC has established itself as an essential resource for ordinands clergy and members of religious orders and an invaluable tool for academics teachers and students of church history and theology as well as for the general reader

Science, Religion, and Mormon Cosmology Erich Robert Paul, 1992 Merrill who urged a unique vision of reality that shaped a Mormon eschatology He shows how authorities eventually retreated from the perception of reality as true and adopted a scientifically less secure position in order to protect their theology an eventuality which ultimately resulted in a reactionary response to science within Mormonism

Galileo's Fame Anna-Luna Post, 2025-10-14 From the beginning of Galileo's career well before the publication of the Sidereus Nuncius his contemporaries took pains to shape his reputation and fame They were fully aware that their efforts would shape the course of his career they also knew that they would profit from helping him With this book Anna-Luna Post offers a welcome new perspective on the volatile dynamic between early modern fame and science in Italy shifting the focus from the recipient of fame to its brokers Galileo's contemporaries knew his rise to fame was not a matter of course Not only were his discoveries highly contested he also was not the first to observe Jupiter's four largest moons Yet of the three men who did so between the summer of 1609 and the winter of 1610 Galileo is the only one who achieved both widespread fame and posthumous glory Post convincingly argues that fame is rather than the direct result of merit or extraordinary achievements shaped through human intervention

Novelties in the Heavens Jean Dietz Moss, 1993-03-15 In this fascinating work Jean Dietz Moss shows how the scientific revolution begun by Copernicus brought

about another revolution as well one in which rhetoric previously used simply to explain scientific thought became a tool for persuading a skeptical public of the superiority of the Copernican system Moss describes the nature of dialectical and rhetorical discourse in the period of the Copernican debate to shed new light on the argumentative strategies used by the participants Against the background of Ptolemy's *Almagest* she analyzes the gradual increase of rhetoric beginning with Copernicus's *De Revolutionibus* and Galileo's *Siderius nuncius* through Galileo's debates with the Jesuits Scheiner and Grassi to the most persuasive work of all Galileo's *Dialogue* The arguments of the Dominicans Bruno and Campanella the testimony of Johannes Kepler and the pleas of Scriptural exegetes and the speculations of John Wilkins furnish a counterpoint to the writings of Galileo the centerpiece of this study The author places the controversy within its historical frame creating a coherent narrative movement She illuminates the reactions of key ecclesiastical and academic figures figures and the general public to the issues Blending history and rhetorical analysis this first study to look at rhetoric as defined by sixteenth and seventeenth century participants is an original contribution to our understanding of the use of persuasion as an instrument of scientific debate
