A subculture consist of a group of individuals who exist in a broader culture but tend to distinguish themselves through the culture that they originally belong to. Many scholars have significantly deprecated this term while trying to avoid the perceptions of inferiority with regard to the prefix “sub”, and this is why they devised the term co-culture to describe a distinguished group of individuals within the larger culture. Nevertheless, this term has been more commonly used in defining a cultural group that prevails within a broader culture yet possesses distinct beliefs, perceptions, and interests that are distinct from those who live and thrive within the broader culture.

The study of subcultures is more centered on the comprehension of the aspect of symbolism that is linked with the modes of dressing and music that is distinctly common among other visible habits that characterize or are specifically associated with the members of certain subcultures and the perceptions of other members of the larger culture concerning these symbols. It is common for members of any given subculture to express their membership and association by using distinctive symbolic styles which may be exhibited in the form of dressing, codes of conduct or even argot. It is possible for subcultures to permeate all levels of any given organization, leading to the conclusion that multiple cultures can actually prevail in any given organization and their existence can either complement or contend with the general culture of the larger organization. In many circumstances, the perception of subcultures as a severe moral problem that need to be addressed as well as controlled by guardians of the wider society has resulted in the curtailment, restriction and passing of laws against them.

web calculate the size of the single phase transformer solution secondary voltage 240v load current 62.5a transformer rating  $p = v \times i$  putting the values  $p = 240v \times 62.5a = 15000\ va = 15\ kva$  sizing a three phase transformer rating of a three phase transformer  $p = 3 \times v \times i$  where v primary or secondary voltage

*transformer sizing calculator 3 phase kva windings calculations* - Feb 09 2023

web apr 15 2023 for 3 phase transformers the primary full load current i.e. the current in the primary windings is equal to  $i_p = \frac{p}{3 \times v_p}$  where  $i_p$  is the current flowing through the primary windings p kva the rated 3 phase power of the transformer  $v_p$  is the 3 phase voltage at the primary windings
