The Sovereign State and Its Competitors Hendrik Spruyt, 2020-05-05 The present international system composed for the most part of sovereign territorial states is often viewed as the inevitable outcome of historical development Hendrik Spruyt argues that there was nothing inevitable about the rise of the state system however Examining the competing institutions that arose during the decline of feudalism among them urban leagues independent communes city states and sovereign monarchies Spruyt disposes of the familiar claim that the superior size and war making ability of the sovereign nation state made it the natural successor to the feudal system The author argues that feudalism did not give way to any single successor institution in simple linear fashion Instead individuals created a variety of institutional forms such as the sovereign territorial state in France the Hanseatic League and the Italian city states in reaction to a dramatic change in the medieval economic environment Only in a subsequent selective phase of institutional evolution did sovereign territorial authority prove to have significant institutional advantages over its rivals Sovereign authority proved to be more successful in organizing domestic society and structuring external affairs Spruyt s interdisciplinary approach not only has important implications for change in the state system in our time but also presents a novel analysis of the general dynamics of institutional change The New Cambridge Modern History Peter Burke, 1979 Annotation A comprehensive examination of the political economic social and cultural development of the world from 1493 to 1945 **The World Economy and National Finance in Historical**

Perspective Charles Poor Kindleberger,1995 A distinguished scholar looks at current financial problems from a historical perspective The European Miracle Eric Lionel Jones,2003-08-04 Why modern states and economies developed in Europe first and later in India and China **The European Miracle** E. L. Jones,1987-08-31 Why did modern states and economies develop first in the peripheral and late coming culture of Europe This historical puzzle looms behind every study of industrialization and economic development In his analytical and comparative work Eric Jones sees the economic condition forming where natural environments and political systems meet Europe s economic rise is explained as a favoured interaction between them contrasting with the frustrating pattern of their interplay in the Ottoman empire India and China For the second edition Professor Jones has added a new introduction and an updated bibliographical guide *Asia in the Making of Europe* Donald Frederick Lach,Edwin J. Van Kley,1965 First systematic inclusive study of the impact of the high civilizations of Asia on the development of modern Western civilization The Modern World-System II Immanuel Wallerstein,2011-05-11 The Modern World System Immanuel Wallerstein s influential multivolume reinterpretation of global history traces the emergence and development of the modern world from the sixteenth century to the twentieth From publisher s description Marxism and History Stephen Henry Rigby,1987 Marx s theory of history is often regarded as the most enduring and fruitful aspect of his intellectual legacy His historical materialism has been the inspiration for some of the best historical writing in the works of scholars such as Eric Hobsbawm E P Thompson Rodney Hilton and Robert Brenner S H Rigby establishes Marx s claims about social structure and historical change discusses their use in his own and his followers writings and assesses the validity of his theories He argues that Marx s social theories were profoundly contradictory and that Marxism has proved most useful when it is seen as a source of questions concepts and hypotheses rather than as a philosophy of historical development *World Accumulation* Andre Gunder Frank,2011-01-10 Most of Andre Gunder Frank s early work on the nature of underdevelopment focused on one continent Latin America Here he broadened his canvas and traced the world wide effects of the process of capital accumulation from the period just prior to the discovery of America to the industrial and French revolutions It is Frank s thesis that the world has experienced a single all embracing albeit unequal and uneven process of capital accumulation centered in Western Europe which has been capitalist for at least two centuries *The Shadow of a Dream* Peter A. Coclanis,1991 Coclanis here charts the economic and social rise and fall of a small but intriguing part of the American South Charleston and the surrounding South Carolina low country Spanning 250 years his study analyzes the interaction of both external and internal forces on the city and countryside examining the effect of various factors on the region s economy from its colonial beginnings to its collapse in the 19th and early 20th centuries
