The Practices of Happiness Ian Steedman, John R Atherton, Elaine Graham, 2010-08-03 A PDF version of this book is available for free in open access via www.tandfebooks.com as well as the OAPEN Library platform www.oapen.org It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license and is part of the OAPEN UK research project There is growing evidence that rising levels of prosperity in Western economies since 1945 have not been matched by greater incidences of reported well being and happiness Indeed material affluence is often accompanied instead by greater social and individual distress A growing literature within the humanities and social sciences is increasingly concerned to chart not only the underlying trends in recorded levels of happiness but to consider what factors if any contribute to positive and sustainable experiences of well being and quality of life Increasingly such research is focusing on the importance of values and beliefs in human satisfaction or quality of life but the specific contribution of religion to these trends is relatively under examined This unique collection of essays seeks to rectify that omission by identifying the nature and role of the religious contribution to wellbeing A unique collection of nineteen leading scholars from the field of economics psychology public theology and social policy have been brought together in this volume to explore the religious contribution to the debate about happiness and well being These essays explore the religious dimensions to a number of key features of well being including marriage crime and rehabilitation work inequality mental health environment participation institutional theory business and trade They engage particularly closely with current trends in economics in identifying alternative models of economic growth which focus on its qualitative as well as quantitative dimensions This unique volume brings to public notice the nature and role of religion's contribution to wellbeing including new ways of measurement and evaluation As such it represents a valuable and unprecedented resource for the development of a broad based religious contribution to the field It will be of particular relevance for those who are concerned about the continuing debate about personal and societal well being as well as those who are interested in the continuing significance of religion for the future of public policy

Business Ethics and the Austrian Tradition in Economics Hardy Bouillon,2011-03-06 Stakeholder value corporate social responsibility and sustainability Are these and similar concepts sufficiently clear for fruitful research in business ethics What is the benchmark to prove their utility Business Ethics and the Austrian Tradition in Economics is a treatise on the fundamental questions of business ethics and addresses significant shortcomings in the field It is the result of correlating reflections on phenomena resulting from an intersection of ethics economics methodology and political and social philosophy Sparked by the business ethicists tendency to consider certain areas outside their field and accept others unquestioningly this book provides answers in the tradition of Austrian Economics and in particular of Hayek and Popper Through detailed examination and reflection this book presents the thesis that many themes in business ethics are discussed either unduly intensely unbalanced or rarely measured against what business ethics as a science should deliver It does so by offering an answer to one of the most crucial questions in business ethics namely that of justice in moral economic actions Bouillon develops an original definition of morally just economic action in the course of three chapters and subsequently uses it as yardstick from which in chapter four he reads which of the relevant concepts

and topics in business ethics ask for restatement As a side product Bouillon discloses logical inconsistencies in prominent political philosophies and the consequences of these inconsistencies for maldevelopments in business ethics Business Ethics and the Austrian Tradition in Economics illustrates and analyses the business ethics peculiarities particularly within German literature providing the reader with a focus rarely found elsewhere This book should be of interest to economics postgraduates and researchers looking at business ethics economic theory and social and political philosophy

Marx and Living Labour Laurent Baronian,2013-05-29 From his early economic works on Marx conceived the labour of any kind of society as a set of production activities and analysed the historical modes of production as specific ways of distributing and exchanging these activities Political economy on the contrary considers the labour only under the form of its product and the exchange of products as commodities as the unique form of social labour exchange For Marx insofar as the labour creating value represents a specific mode of exchanging the society's living labour general and abstract labour cannot not only be defined as the substance or measure unit of the commodity as in Smith or Ricardo but foremost as an expense of living labour i.e. of nerves muscles brain etc Hence the twofold nature of living labour as a concrete activity producing a use value and an expense of human labour in general producing exchange value Marx himself claimed that this twofold nature of labour creating value was its main and most important contribution to economic science This book aims at showing how both determines the original categories and economic laws in Capital and constitutes the profound innerspring of Marx's critique of political economy The role and function of living labour is highlighted by dealing with the difference between Marx and Classics theories of labour value money and the problems of its integration in economic analysis especially in Keynes the transition from feudalism to capitalism the theory of capital through a discussion on the Cambridge controversy and the transformation problem the labour process and the principles of labour management unemployment and overpopulation the formulas of capital in the history of economic thought finally an interpretation of the current crisis based on Marx's conception of overaccumulation and speculation after having distinguished it from underconsumption and stagnation theories of crises

Neoliberalism: National and Regional Experiments with Global Ideas Ravi K. Roy,Arthur T. Denzau,Thomas D. Willett,2006-12-13 Critics of globalization often portray neoliberalism as an extremist laissez faire political economic philosophy that rejects government any sort of government intervention in the domestic economy Like most over used terms it is more complicated than this introductory sentence suggests This volume seeks to move beyond these caricature depictions and definitions as well as the emotional rhetoric that has unfortunately dominated both the scholastic and political debate on neoliberalism and global market oriented reform This book emphasizes that there are in fact a variety of neoliberalisms that share a common emphasis on the role of the market Beyond this however its usages and applications appear much more varied according to the cultural economic political and social context in which it is used A host of eminent contributors including Douglass C North Arthur T Denzau Thomas D Willett Mark Blyth Colin Hay Craig

Parsons and others provide a rigorous assessment of the significance of neoliberal ideas on economic policy Through their detailed international case studies the contributors to this book show how varied its impact has in fact been and the result is a book that will stimulate further debate in this most controversial of subject matters Ravi K Roy is a Research Scholar at the Claremont Institute for Economic Policy Studies Arthur T Denzau is Professor of Economics at Claremont Graduate University He is also a Research Associate at the Center for American Business at Washington University St Louis Thomas D Willett is Horton Professor of Economics at Claremont Graduate University He is also Director of the Claremont Institute for Economic Policy Studies

Liberal Learning and the Art of Self-Governance Emily Chamlee-Wright, 2015-11-19 Concerns over affordability and accountability have tended to direct focus away from the central aims of liberal learning such as preparing minds for free inquiry and inculcating the habits of mind practical skills and values necessary for effective participation in civil society The contributors to this volume seek to understand better what it is that can be done on a day to day basis within institutions of liberal learning that shape the habits and practices of civil society The central argument of this volume is that institutions of liberal learning are critical to a developing and flourishing civil society It is within these civil society incubators that the habits of open discourse are practiced and honed that a collaborative often contentious commitment to truth seeking serves as the rules that govern our work together that the rules of personal and widespread social cooperation are established practiced and refined Many have made this argument as it relates to community based learning and we explore that theme here as well But acquiring and practicing the habits of civil society recur within and throughout the college context in the classrooms in college governance structures in professional associations in collaborative research in the residence halls and on the playing field To put it another way when they are at their best institutions of liberal learning are contexts in which students learn how to live in a free society and learn the art of self governance

Robinson Crusoe's Economic Man Ulla Grapard, Gillian Hewitson, 2012-04-27 In this book economists and literary scholars examine the uses to which the Robinson Crusoe figure has been put by the economics discipline since the publication of Defoe's novel in 1719 The authors critical readings of two centuries of texts that have made use of Robinson Crusoe undermine the pervasive belief of mainstream economics that Robinson Crusoe is a benign representative of economic agency and that he like other economic agents can be understood independently of historical and cultural specificity The book provides a detailed account of the appearance of Robinson Crusoe in the economics literature and in a plethora of modern economics texts in which for example we find Crusoe is portrayed as a schizophrenic consumer producer trying to maximize his personal well being Using poststructuralist feminist postcolonial Marxist and literary criticism approaches the authors of the fourteen chapters in this volume examine and critique some of the deepest fundamental assumptions neoclassical economics hold about human nature the political economy of colonization international trade and the pervasive gendered organization of social relations The contributors to this volume can be seen as engaging in the

emerging conversation between economists and literary scholars known as the New Economic Criticism They offer unique perspectives on how the economy and economic thought can be read through different disciplinary lenses Economists pay attention to rhetoric and metaphor deployed in economics and literary scholars have found new areas to explore and understand by focusing on economic concepts and vocabulary encountered in literary texts
