**The Tragic Sense of Life** Robert J. Richards,2024-05-31 Prior to the First World War more people learned of evolutionary theory from the voluminous writings of Charles Darwin s foremost champion in Germany Ernst Haeckel 1834 1919 than from any other source including the writings of Darwin himself But with detractors ranging from paleontologist Stephen Jay Gould to modern day creationists and advocates of intelligent design Haeckel is better known as a divisive figure than as a pioneering biologist Robert J Richards s intellectual biography rehabilitates Haeckel providing the most accurate measure of his science and art yet written as well as a moving account of Haeckel s eventful life

Breeding Jenny Davidson,2023-05-09 The Enlightenment commitment to reason naturally gave rise to a

belief in the perfectibility of man Influenced by John Locke and Jean Jacques Rousseau many eighteenth century writers argued that the proper education and upbringing breeding could make any man a member of the cultural elite Yet even in this egalitarian environment the concept of breeding remained tied to theories of blood lineage caste distinction and biological difference Turning to the works of Locke Rousseau Swift Defoe and other giants of the British Enlightenment Jenny Davidson revives the debates that raged over the husbandry of human nature and highlights their critical impact on the development of eugenics the emergence of fears about biological determinism and the history of the language itself Combining rich historical research with a keen sense of story she links explanations for the physical resemblance between parents and children to larger arguments about culture and society and shows how the threads of this compelling conversation reveal the character of a century A remarkable intellectual history Breeding not only recasts the fundamental concerns of the Enlightenment but also uncovers the seeds of thought that bloomed into contemporary notions of human perfectibility

*The Elusive Synthesis: Aesthetics and Science* A.I. Tauber, 2012-12-06 The tension between art and science may be traced back to the Greeks What became natural philosophy and later science has traditionally been posed as a fundamental alternative to poetry and art It is a theme that has commanded central attention in Western thought as it captures the ancient conflict of Apollo and Dionysus over what deserves to order our thought and serve as the aspiration of our cultural efforts The modern schism between art and science was again clearly articulated in the Romantic period and seemingly grew to a crescendo fifty years ago as a result of the debate concerning atomic power The discussion has not abated in the physical sciences and in fact has dramatically expanded most prominently into the domains of ecology and medicine Issues concerning the role of science in modern society although heavily political must be regarded at heart as deeply embedded in our cultural values Although each generation addresses them anew the philosophical problems which lay at the foundation of these fundamental concerns always appear fresh and difficult This anthology of original essays considers how science might have a greater commonality with art than was perhaps realized in a more positivist era The contributors are concerned with how the aesthetic participates in science both as a factor in constructing theory and influencing practice The collection is thus no less than a spectrum of how Beauty and Science might be regarded through the same prism

**Makers of Nineteenth Century Culture** Justin Wintle Esq, Justin Wintle, 2021-12-24 This volume provides a critical examination of the lives and works of the leading novelists poets dramatists artists philosophers social thinkers mathematicians and scientists of the period The subjects are assessed in the light of their cultural importance and each entry is deliberately interpretative making this work both an essential reference tool and an engaging collection of essays Figures covered include Marx Wagner Darwin Malthus Balzac Jane Austen Nietzsche Babbage Edgar Allan Poe Ruskin

Schleiermacher Herbert Spencer Harriet Martineau and Oscar Wilde **Hospitality of the Matrix** Irina Aristarkhova, 2012 This book analyzes the question where do we come from by discussing the matrix The author then applies this to the science

technology and art of ectogenesis and proves the question can the machine nurse      Darwin and the Making of Sexual Selection Evelleen Richards, 2017-04-27 Darwin's concept of natural selection has been exhaustively studied but his secondary evolutionary principle of sexual selection remains largely unexplored and misunderstood Yet sexual selection was of great strategic importance to Darwin because it explained things that natural selection could not and offered a naturalistic as opposed to divine account of beauty and its perception Only now with Darwin and the Making of Sexual Selection do we have a comprehensive and meticulously researched account of Darwin's path to its formulation one that shows the man rather than the myth and examines both the social and intellectual roots of Darwin's theory Drawing on the minutiae of his unpublished notes annotations in his personal library and his extensive correspondence Evelleen Richards offers a richly detailed multilayered history Her fine grained analysis comprehends the extraordinarily wide range of Darwin's sources and disentangles the complexity of theory practice and analogy that went into the making of sexual selection Richards deftly explores the narrative strands of this history and vividly brings to life the chief characters involved A true milestone in the history of science Darwin and the Making of Sexual Selection illuminates the social and cultural contingencies of the shaping of an important if controversial biological concept that is back in play in current evolutionary theory
