✓ Exclusively available on IvyPanda

The wartime conferences of World War II were genuinely significant in deciding the strategy undertaken by the Allies but also helped shape the world order during and in the aftermath of the world. During World War I, despite countries being in tight-knit alliances, leaders did not actively communicate, and each nation was fighting for its interests and battles. At the Casablanca meeting in January 1943, Churchill and Roosevelt committed to fighting the Axis powers until unconditional surrender. At this point, General Frank Maxwell Andrews was established as the commander of the European theater for Western forces. At the Egypt conference, China was designated as a theater commander with Chiang Kai-shek at the helm. This particular conference led the Joint Chiefs of Staff to later strategize and divide the Pacific theater into three significant areas of operations, allowing for better comprehensive action against the Japanese.

The primary conference, which included the Big 3, joined by Stalin, was in Tehran at the end of 1943. The leaders devised a military strategy to be implemented against Germany and Japan. As the war was slowly wearing down the Axis Powers, this collaboration and strategic planning allowed the allies to develop a means to end the war in their favor. At this conference, it was decided that the US and the UK would open a second front on the Atlantic coast, pressuring Germany from the West, while the USSR committed to opening a second front against Japan (Weinberg 2005, p. 788). This unified action helped to strategically distribute forces and pressure the Axis powers into retreat on all fronts as they lacked the cohesion and support among one another that could be seen among the Allies. Later conferences, such as Yalta in 1945, were focused on strategic elements of ending the war and deciding on the post-war world order in Europe and punishments for the Axis Powers. Despite some disagreements, it allowed the allies to stay on the same page and effectively negotiate the surrender treaty with Germany as a unified front. Therefore, Marshall's observation was justified in highlighting the significant strategic benefits stemming from these wartime conferences throughout WWII.

*The Pursuit of Serenity* Chris Nottingham, 1999 Havelock Ellis reputation has been in free fall since his death in 1939 Though still acknowledged as a pioneer in the study of human sexuality he now evokes hostility from those he would have considered his natural heirs Feminist authors have been particularly critical identifying him as the kind of friend women would have done well to ignore While there is no need to put Ellis back on his pedestal it is

Sheehan, Wen-hsin Yeh, 2022-07-31 Covering the years of Japanese invasion during World War II from 1937 to 1945 this essay collection recounts Chinese experiences of living and working under conditions of war Each of the regimes that ruled a divided China occupation governments Chinese Nationalists and Chinese Communists demanded and glorified the full commitment of the people and their resources in the prosecution of war Through stories of both everyday people and mid level technocrats charged with carrying out the war this book brings to light the enormous gap between the leadership s demands and the reality of everyday life Eight long years of war exposed the unrealistic nature of elite demands for unreserved commitment As the political leaders faced numerous obstacles in material mobilization and retreated to rhetoric of spiritual resistance the Chinese populace resorted to localized strategies ranging from stoic adaptation to cynical profiteering articulated variously with touches of humor and tragedy These localized strategies are examined through stories of people at varying classes and levels of involvement in living working and trying to work through the war under the different regimes In less than a decade millions of Chinese were subjects of disciplinary regimes that dictated the celebration of holidays the films available for viewing the stories told in tea houses and the restrictions governing the daily operations and participants of businesses thus impacting the people of China for years to come This volume looks at the narratives of those affected by the war and regimes to understand perspectives of both sides of the war and its total outcomes Living and Working in Wartime China depicts the brutal micromanaging of ordinary lives devoid of compelling national purposes that both undercut the regimes relationships with their people and helped establish the managerial infrastructure of authoritarian regimes in subsequent postwar years Oxford Classics ,2013-12-12 Oxford the home of lost causes the epitome of the world of medieval and renaissance learning in Britain has always fascinated at a variety of levels social institutional cultural Its rival Cambridge was long dominated by mathematics while Oxford s leading study was Classics In this pioneering book 16 leading authorities explore a variety of aspects of Oxford Classics in the last two hundred years curriculum teaching and learning scholarly style publishing gender and social exclusion and the impact of German scholarship Greats Literae Humaniores is the most celebrated classical course in the world here its early days in the mid 19th century and its reform in the late 20th are discussed in the latter case by those intimately involved with the reforms An opening chapter sets the scene by comparing Oxford with Cambridge Classics and several old favourites are revisited including such familiar Oxford products as Liddell and Scott s Greek English Lexicon the Oxford Classical Texts and Zimmern s Greek Commonwealth The book as a whole offers a pioneering wide ranging survey of Classics in Oxford Waging War Wayne E. Lee, 2016 Waging War Conflict Culture and Innovation in World History provides a wide ranging examination of war in human history from the beginning of the species until the current rise of the so called Islamic State Although it covers many societies throughout time the book does not attempt to tell all stories from all places nor does it try to narrate important conflicts Instead author Wayne E Lee describes the emergence of military innovations and systems examining how they were created and then how

they moved or affected other societies These innovations are central to most historical narratives including the development of social complexity the rise of the state the role of the steppe horseman the spread of gunpowder the rise of the west the bureaucratization of military institutions the industrial revolution and the rise of firepower strategic bombing and nuclear weapons and the creation of people s war
