

1. Define the concepts of applying and distinguishing a case. When Lord Denning considered the case of *Limpus v London General Omnibus Co* did he apply it or distinguish it? Demonstrate how you know.

To apply a case is to extract the relevant principles from similar and applicable higher court cases, such as appeal courts, and follow what has been ruled in subsequent cases in the lower courts, such as district courts. Appeal court decisions are termed 'binding' upon the lower court, or 'stare decisis', meaning to 'stand by' what has previously been decided.

To distinguish a case is to still extract and reference relevant principles from similar higher court cases, but is to also note the difference in material facts of the precedent case to lower court cases and how such authorities, though of a similar manner, would not be applicable.

Lord Denning applied the case of *Limpus v London General Omnibus Co*. The principles he extracted were as follows:

- a) If a servant's conduct was done so for the purposes of his 'master,' namely his employer, the employer would be liable;
- b) If the servant acted on his own, in order to effect a purpose of his own, the employer would not be held liable.
- c) In this case, as the driver of the omnibus did obstruct a rival omnibus during the course of his service and caused injury, therefore that such service was done for his master's purpose, the employer was held liable.

In this case, Mr Plenty was:

- a) Driving a milk truck for his employer, and therefore his conduct was done so for the purposes of his 'master';
- b) Not acting on his own in order to effect a purpose of his own;
- c) During the course of driving, allowed a boy on the truck he knew he should not have allowed, and caused injury to the boy during the course of his service for his master's purpose, therefore the employer is held liable.

2. What does the term *ratio decidendi* mean? Can you identify the *ratio decidendi* of this case. Explain how you identified it.

Ratio decidendi, quite literally, means the 'rationale for the decision,' but has been defined more fully as 'the proposition of law in which decides the case in the light or context of the material facts'. It is the binding element of the case.

The identified reasons for Lord Denning's decisions are as follows:

- An employer should be liable for their employee's conduct during the course of employed action and the fact that an employee, during the course of employed action, does something they should not do does not automatically exempt employers from liability
- The boy on the milk truck was a trespasser, because the actual business did not permit him to be there despite what the individual employee had allowed
- Just because there is a trespasser on a vehicle does not mean that the employer does not owe a liability to the trespasser: the 2 previous case precedents have now been abandoned, particularly in respect of children

[Natural Law](#) Kenneth R. Westphal, 2016 Kenneth R Westphal presents an original interpretation of Hume's and Kant's moral philosophies the differences between which are prominent in current philosophical accounts Westphal argues that focussing on these differences however occludes a decisive shared achievement a distinctive constructivist method to identify basic moral principles and to justify their strict objectivity without invoking moral realism nor moral anti realism or irrationalism Their constructivism is based on Hume's key insight that though the laws of justice are artificial they are not arbitrary

Arbitrariness in basic moral principles is avoided by starting with fundamental problems of social coordination which concern outward behaviour and physiological needs basic principles of justice are artificial because solving those problems does not require appeal to moral realism nor to moral anti realism Instead moral cognitivism is preserved by identifying sufficient justifying reasons which can be addressed to all parties for the minimum sufficient legitimate principles and institutions required to provide and protect basic forms of social coordination including verbal behaviour Hume first develops this kind of constructivism for basic property rights and for government Kant greatly refines Hume's construction of justice within his metaphysical principles of justice whilst preserving the core model of Hume's innovative constructivism Hume's and Kant's constructivism avoids the conventionalist and relativist tendencies latent if not explicit in contemporary forms of moral constructivism [The Invention of Altruism](#) Thomas Dixon, 2008-05-08 This volume explores how Victorian philosophers

Polger, Wenqing Zhao, 2020-08-04 Prominent philosophers explore themes in the work of Owen Flanagan focusing on debates about the nature of mind the self and morality Owen Flanagan's work offers a model for how to be a naturalistic and scientifically informed philosopher who writes beautifully and deeply about topics as varied as consciousness and Buddhism moral psychology and dreaming identity and addiction literature and neuroscience In this volume leading philosophers Flanagan's friends colleagues and former students explore themes in his work focusing on debates over the nature of mind the self and morality Some contributors address Flanagan's work directly others are inspired by his work or methodology Their essays are variously penetrating and synoptic cautious and speculative *Religious Methods and Resources in Bioethics* P.F. Camenisch, 2013-03-09 A volume on religious theological methods in biomedical ethics inevitably of whether the methodological dimension can be distinguished raises the question quashed from the various other things that go on in ethical discourse It is difficult to answer this question definitively since many elements in moral conversation can be interpreted in different ways Barbara Hilker Andolsen illustrates this issue in this volume when she defines one of her crucial categories gender justice as being both procedural and substantive normative This difficulty of finally separating the methodological from the normative arises in many areas of contemporary ethical writing both feminist and otherwise Nevertheless it seems that in many cases we can separate out the methodological issues with considerable precision Albert Jonsen and James Childress achieve just such a sharp focus in their essays This does not mean that a careful dissecting of their papers would not reveal normative elements lurking about their methodological points It is simply to say that the issues they analyze and the positions they take are at least prima facie overwhelmingly methodological They are much more about how we think about ethical matters than they are about what we think about them [Encyclopædia of Religion and Ethics: Sacrifice-Sudra](#) James Hastings, John Alexander Selbie, Louis Herbert Gray, 1920 Scope theology philosophy ethics of various religions and ethical systems and relevant portions of anthropology mythology folklore biology psychology economics and sociology **Collected Essays: Methods and results** Thomas Henry Huxley, 1898 *The Influence of Darwin on Philosophy and Other Essays in Contemporary Thought* John Dewey, 2007 This critical edition of *The Influence of Darwin on Philosophy and Other Essays in Contemporary Thought* presents the results of John Dewey's patient construction throughout the previous sixteen years of the radically new view of the methods and concerns of philosophical inquiry It was a view that he continued to defend for the rest of his life **The Methods of Bioethics** John McMillan, 2018-11-30 This is the first book in bioethics that explains how it is that you actually go about doing good bioethics Bioethics has made a mistake about its

methods and this has led not only to too much theorizing but also fragmentation within bioethics The unhelpful disputes between those who think bioethics needs to be more philosophical more sociological more clinical or more empirical continue While each of these claims will have some point they obscure what should be common to all instances of bioethics Moreover they provide another phantom that can lead newcomers to bioethics down blind alleyways stalked by bristling sociologists and philosophers The method common to all bioethics is bringing moral reason to bear upon ethical issues and it is more accurate and productive to clarify what this involves than to stake out a methodological patch that shows why one discipline is the most important This book develops an account of the nature of bioethics and then explains how a number of methodological spectres have obstructed bioethics becoming what it should In the final part it explains how moral reason can be brought to bear upon practical issues via an empirical Socratic approach *Encyclopaedia of Religion and Ethics* James Hastings, John Alexander Selbie, Louis Herbert Gray, 1928
