Essays on Freedom of Action (Routledge Revivals) Ted Honderich, 2015-06-03 Essays on Freedom of Action first published in 1973 brings together original papers by contemporary British and American philosophers on questions which have long concerned philosophers and others the question of whether persons are wholly a part of the natural world and their actions the necessary effects of causal processes and the question of whether our actions are free and such that we can be held responsible for them even if they are the necessary effects of casual processes This volume will be of interest not only to those who are primarily concerned with philosophy but also to students in those many other disciplines in which freedom and determinism arise as problems Essays on Freedom of Action Ted Honderich, 1978 *Essays on Freedom of Action*

Ted Honderich, 1978-01-01 Essays on Freedom of Action (Routledge Revivals) Ted Honderich, 2015-06-03 Essays on Freedom of Action first published in 1973 brings together original papers by contemporary British and American philosophers on questions which have long concerned philosophers and others the question of whether persons are wholly a part of the natural world and their actions the necessary effects of causal processes and the question of whether our actions are free and such that we can be held responsible for them even if they are the necessary effects of casual processes This volume will be of interest not only to those who are primarily concerned with philosophy but also to students in those many other disciplines in which freedom and determinism arise as problems **New Essays on the Explanation of Action C.** Sandis, 2008-11-28 These previously unpublished essays present the newest developments in the thought of philosophers working on action and its explanation focusing on a wide range of interlocking issues relating to agency deliberation motivation mental causation teleology interpretive explanation and the ontology of actions and their reasons **Essays on Actions and Events** Donald Davidson, 2001-09-27 Donald Davidson has prepared a new edition of his classic 1980 collection of Essays on Actions and Events including two additional essays In this seminal investigation of the nature of human action Davidson argues for an ontology which includes events along with persons and other objects Certain events are identified and explained as actions when they are viewed as caused and rationalized by reasons these same events when described in physical biological or physiological terms may be explained by appeal to natural laws The mental and the physical thus constitute irreducibly discrete ways of explaining and understanding events and their causal relations Among the topics discussed are freedom to act weakness of the will the logical form of talk about actions intentions and causality the logic of practical reasoning Hume's theory of the indirect passions and the nature and limits of decision theory The introduction cross references and appendices emphasize the relations between the essays and explain how Davidson's views have developed

Action, Freedom and Responsibility Subasini Barik, 2022-10-19 This book a work on human doing analyses and applies three central aspects of human life Action Freedom and Responsibility in the wide spectrum of the Philosophy of Mind Reflections on these issues and their interconnections have a significant effect on the Philosophy of Value and application of

ethical theories in practical life This book even reconstructs the conceptual connection between action and freedom on the one hand and that between freedom and responsibility on the other It also puts the concepts of freedom and determinism to critical test and reinterprets them from different angles and perspectives The conventional doctrine of karma based on the teachings of the Bhagavadgītā is relieved from its usual deterministic presentation and a logically reasonable explanation is offered Human actions and human agency are central concepts in the philosophy of mind and action Free will and responsibility constitute the bedrock of the moral life of the human agents and the book pinpoints that freedom is meant to undertake the goal oriented actions It is therefore focused on the enquiry into the various aspects of philosophy of mind as well as the philosophy of value

A Metaphysics for Freedom Helen Steward, 2012-03-08 Helen Steward argues that determinism is incompatible with agency itself not only the special human variety of agency but also powers which can be accorded to animal agents She offers a distinctive non dualistic version of libertarianism rooted in a conception of what biological forms of organisation might make possible in the way of freedom

Freedom and History and Other Essays Richard P. McKeon, 1990 This volume of essays is an important introduction to the thought of one of the twentieth century's most significant yet underappreciated philosophers Richard McKeon The originator of philosophical pluralism McKeon made extraordinary contributions to philosophy to international relations and to theory formation in the communication arts aesthetics the organization of knowledge and the practical sciences This collection which includes a philosophical autobiography as well as the out of print title essay *Freedom and History* and a previously unpublished essay on *Philosophic Semantics and Philosophic Inquiry* is a testimony to the range and systematic power of McKeon's thinking for the social sciences and the humanities

From Action to Ethics Constantine Sandis, 2024-01-11 Over the course of the last 15 years Constantine Sandis has advanced our understanding of the role that action plays in shaping our moral thought In this collection of his best essays in the philosophy of action Sandis brings together updated versions of his writings accompanied by a new introduction Read collectively they demonstrate the breadth of his interests and ability to relate to broader issues within the culture connecting debates in philosophical psychology about motivation negligence and moral responsibility with Greek tragedy social psychology and literature Along this path from action to ethics Sandis engages with Hegel Wittgenstein Anscombe Ricoeur Davidson and Dretske together with contemporary authors such as Jennifer Hornsby and Jonathan Dancy As he responds to each thinker and theme he develops his own philosophical position the key thesis of which is that philosophy of action without ethics is empty ethics without philosophy of action is blind

A Companion to the Philosophy of Action Timothy O'Connor, Constantine Sandis, 2012-08-02 *A Companion to the Philosophy of Action* offers a comprehensive overview of the issues and problems central to the philosophy of action The first volume to survey the entire field of philosophy of action the central issues and processes relating to human actions Brings together specially commissioned chapters from international experts Discusses a range of ideas and doctrines including rationality free will and

determinism virtuous action criminal responsibility Attribution Theory and rational agency in evolutionary perspective Individual chapters also cover prominent historic figures from Plato to Ricoeur Can be approached as a complete narrative but also serves as a work of reference Offers rich insights into an area of philosophical thought that has attracted thinkers since the time of the ancient Greeks The Bounds of Freedom: Kant's Causal Theory of Action Robert Greenberg, 2016-09-26 This monograph is a new interpretation of Kant's temporal conception of the causality of the freedom of the will The interpretation is based on an analysis of Kant's primary conception of an action viz as a causal consequence of the will The analysis in turn is based on H P Grice's causal theory of perception and on P F Strawson's modification of the theory The monograph rejects the customary assumption that Kant's maxim of an action is a causal determination of the action It assumes instead that the maxim is definitive of the action and since its main thesis is that an action for Kant is to be primarily understood as an effect of the will it concludes that the maxim of an action can only be its logical determination Kant's temporal conception of the causality of free will is confronted not only by contemporary philosophical conceptions of causality but by Kant's own complementary theory of causality in the Second Analogy of Experience According to this latter conception causality is a natural relation among physical and psychological objects and is therefore a temporal relation among them Faced with this conflict Kant scholars like Allen W Wood either reject Kant's temporal conception of causality or like Henry E Allison accept it but only in an ad hoc form Both camps however make the aforementioned assumption that Kant's maxim of an action is a causal determination of the action The monograph rejecting the assumption belongs to neither camp Philosophie de L'action Guttorm Fløistad, 1986 This publication is a continuation of two earlier series of chronicles Philosophy in the Mid Century Firenze 1958-59 and Contemporary Philosophy Firenze 1968 edited by Raymond Klibansky Like the other series these chronicles provide a survey of important trends in contemporary philosophical discussion from 1966 to 1978 The need for such surveys has I believe increased rather than decreased over the last years The philosophical scene appears for various reasons more complex than ever before The continuing process of specialization in most branches the emergence of new schools of thought particularly in philosophical logic and the philosophy of language the convergence of interest though not necessarily of opinion of different traditions upon certain problems and the increasing attention being paid to the history of philosophy in discussions of contemporary problems are the most important contributory factors Surveys of the present kind are a valuable source of knowledge of this complexity and may as such be an assistance in renewing the understanding of one's own philosophical problems The surveys it is to be hoped may also help to strengthen the Socratic element of modern philosophy the dialogue or Kommunikationsgemeinschaft So far four volumes have been prepared for the new series The present chronicles in Philosophy of Action Vol 3 follow upon chronicles in the Philosophy of Language and Philosophical Logic V 01 1 and chronicles in the Philosophy of Science Vol Reasons in Action Ingmar Persson, 2019 Ingmar Persson offers an original view of the processes of human action deliberating on the basis of reasons

for and against actions making a decision about what to do and from there implementing the decision in action in a way that makes the action intentional Persson's analysis is mainly developed to suit physical actions though how it needs to be modified to cover mental acts is also discussed The interpretation of intentional action that is presented is reductionist in the sense that it does not appeal to any concepts that are distinctive of the domain of action theory such as a unique type of agent causation or irreducible mental acts like acts of will volitions decisions or tryings Nor does it appeal to any unanalyzed attitudes or states essentially related to intentional action like intentions and desires to act Instead the intentionality of actions is construed as springing from desires conceived as physical states of agents which cause facts because of the way agents think of them A sense of our having responsibility that is sufficient for our acting for reasons is also sketched out

Kant's Theory of Freedom Henry E. Allison, 1990-09-28 An innovative and comprehensive interpretation of Kant's concept of freedom analyzes the role it plays in his moral philosophy and psychology and considers critical literature on the subject

Freedom and Enforcement in Action Janusz Czelakowski, 2015-06-10 Action theory is the object of growing attention in a variety of scientific disciplines and this is the first volume to offer a synthetic view of the range of approaches possible in the topic The volume focuses on the nexus of formal action theory with a startlingly diverse set of subjects which range from logic linguistics artificial intelligence and automata theory to jurisprudence deontology and economics It covers semantic mathematical and logical aspects of action showing how the problem of action breaks the boundaries of traditional branches of logic located in syntactics and semantics and now lies on the borderline between logical pragmatics and praxeology The chapters here focus on specialized tasks in formal action theory beginning with a thorough description and formalization of the language of action and moving through material on the differing models of action theory to focus on probabilistic models the relations of formal action theory to deontic logic and its key applications in algorithmic and programming theory The coverage thus fills a notable lacuna in the literary corpus and offers solid formal underpinning in cognitive science by approaching the problem of cognition as a composite action of mind Hegel on Action Arto Laitinen, Constantine Sandis, 2010-10-13 This collection of essays focuses on various aspects of Hegel's Philosophy of Action including but not limited to issues relating to conceptualization explanation intention agency narrativity holism objectivity practical reasoning moral responsibility free will and tragedy
