Plato's Cratylus Michael W. Riley, 2005-01-01 This book explains how the Cratylus Plato's apparently meandering and comical dialogue on the correctness of names makes serious philosophical progress by its notorious etymological digressions While still a wild ride through a Heraclitean flood of etymologies which threatens to swamp language altogether the Cratylus emerges as an astonishingly organized evaluation of the power of words

The Statebuilder's Dilemma David A. Lake, 2016-06-10 The central task of all statebuilding is to create a state that is regarded as legitimate by the people over whom it exercises authority This is a necessary condition for stable effective governance States sufficiently motivated to bear the costs of building a state in some distant land are likely to have interests in the future policies of that country and will therefore seek to promote loyal leaders who are sympathetic to their interests and willing to implement their preferred policies In The Statebuilder's Dilemma David A Lake addresses the key tradeoff between legitimacy and loyalty common to all international statebuilding attempts Except in rare cases where the policy preferences of the statebuilder and the population of the country whose state is to be built

coincide as in the famous success cases of West Germany and Japan after 1945 promoting a leader who will remain loyal to the statebuilder undermines that leader's legitimacy at home In Iraq thrust into a statebuilding role it neither anticipated nor wanted the United States eventually backed Nouri al Maliki as the most favorable of a bad lot of alternative leaders Maliki then used the support of the Bush administration to govern as a Shiite partisan undermining the statebuilding effort and ultimately leading to the second failure of the Iraqi state in 2014 Ethiopia faced the same tradeoff in Somalia after the rise of a promising but irredentist government in 2006 invading to put its own puppet in power in Mogadishu But the resulting government has not been able to build significant local support and legitimacy Lake uses these cases to demonstrate that the greater the interests of the statebuilder in the target country the more difficult it is to build a legitimate state that can survive on its own
