

CANADA ESSAY SAMPLE

Most children have the same nose shape or same eye color as with their parents. However, I have inherited more than physical features. I have inherited a passion to learn combined with an insatiable thirst for curiosity. This has served me well all throughout my career in the academe. My father is an electrical engineer, and he taught me the beauty to explore the world with my eyes of inquisition, consistently looking for things to learn from, and to understand even more. I can remember watching him for several hours in front of an elevator schematics in our home, curious as to the means of all those lines and symbols. I was deeply fascinated with technology, and I really wanted to know why and how things worked the way they actually did.

My playground was a space where there are a lot of spare electric wire, old circuit boards, and different broken appliances. I usually spend several hours in tinkering and disassembling with all of the amazing treasures I discover in our garage. My mother, on the other hand, is a teacher. She was the one who first observed my intellectual curiosity, even encouraging me to explore further. She prepared for me mind-opening books, which I devoured willingly. All of these books allowed me to further discover the seemingly irresistible appeal of different imaginative questions, alongside their fascinating answers.

This intellectual curiosity has become the result of a highly unique combination of childhood experiences and early influences which have further fueled my insatiable passion for learning, both inside and outside of our classroom. I hope to continue in applying this curiosity in all aspects of my personal life, exploring this world through the eyes of that child I used to be. By refusing to accept explanations that are obvious, and refusing to simply settle for a surface understanding, great innovators created new technologies and innovations. I will do my best to follow their footsteps. I believe that it is part of my being, driving me to become happy and successful.
