draws from over two thousand years of Western thought from Plato in the fifth century BC and the fourth century Byzantine dialogues on the soul to the philosophical and medical writings of the early 1700s There are four sections to this book each section is based on where the authors have found a conjunction between the body and mind soul The work begins with a section on text and self perception which focuses on creative output from the period The second conjunction is human emotions which are described in their social contexts The third is sex where the human body and mind are traditionally believed to meet The fourth section Material Souls engages with bodies and other material aspects of existence perceived studied or utilised as material signs of emotional and spiritual activity
