The Essential West Elliott West, 2012-11-09 Scholars and enthusiasts of western American history have praised Elliott West as a distinguished historian and an accomplished writer and this book proves them right on both counts Capitalizing on West's wide array of interests this collection of his essays touches on topics ranging from viruses and the telegraph to children bison and Larry McMurtry Drawing from the past three centuries West

weaves the western story into that of the nation and the world beyond from Kansas and Montana to Haiti Africa and the court of Louis XV Divided into three sections the volume begins with conquest West is not the first historian to write about Lewis and Clark but he is the first to contrast their expedition with Mungo Park s contemporaneous journey in Africa The Lewis and Clark expedition West begins is one of the most overrated events in American history and one of the most revealing The humor of this insightful essay is a chief characteristic of the whole book which comprises ten chapters previously published in major journals and magazines but revised for this edition and four brand new ones West is well known for his writings about frontier family life especially the experiences of children at work and play Fans of his earlier books on these subjects will not be disappointed In a final section he looks at the West of myth and imagination in part to show that our fantasies about the West are worth studying precisely because they have been so at odds with the real West In essays on buffalo Jesse James and the McMurtry novel Lonesome Dove West directs his formidable powers to subjects that continue to shape our understanding and often our misunderstanding of the American West past and present **Essential Western Novels -**

Governing Access to Essential Resources Katharina Pistor, Olivier De Schutter, 2015-12-08 Essential resources do more than satisfy people's needs They ensure a dignified existence Since the competition for essential resources particularly fresh water and arable land is increasing and standard legal institutions such as property rights and national border controls are strangling access to resources for some while delivering prosperity to others many are searching for ways to ensure their fair distribution This book argues that the division of essential resources ought to be governed by a combination of Voice and Reflexivity Voice is the ability of social groups to choose the rules by which they are governed Reflexivity is the opportunity to question one's own preferences in light of competing claims and to accommodate them in a collective learning process Having investigated the allocation of essential resources in places as varied as Cambodia China India Kenya Laos Morocco Nepal the arid American West and peri urban areas in West Africa the contributors to this volume largely concur with the viability of this policy and normative framework Drawing on their expertise in law environmental studies anthropology history political science and economics they weigh the potential of Voice and Reflexivity against such alternatives as pricing mechanisms property rights common resource management political might or brute force
