Essential Cases In Insurance Law:

Essential Cases in Insurance Law K. Cannar, 1985-01-01 **Essential Cases in Insurance Law** Kenneth Cannar, 1985 Good No Highlights No Markup all pages are intact Slight Shelfwear may have the corners slightly dented may have slight color changes slightly damaged spine **Essential Cases on Misconduct** Benedict Winiger, Ernst Karner, Ken Oliphant, 2018-01-22 The various national European legal systems offer a broad range of responses to the question of what can be regarded as wrongful behaviour or fault The present work systematically examines these two important prerequisites for tortious liability under the combined heading of misconduct Unlike current textbooks national casebooks and monographs it builds on the experiences gathered in the national legal systems over the past decades and thereby fills a major gap which still exists today It thus does what the previous volumes in the Digest of European Tort Law series did for other key elements of tort law namely natural causation and damage Once again the publication contains a selection of the most important cases from 28 states across Europe as well as cases handed down by European Union courts it also highlights cases from earlier periods of legal history For each case the facts and the relevant court decision are presented and these are then accompanied by an analytical commentary In addition the editors provide comparative analyses of the cases reported and a special report is dedicated to how key decisions would be resolved under model European rules on tort law The editors believe that the material gathered here may provide guidance for an organic convergence of the national legal systems in Europe It constitutes the basis of an *acquis commun* that is infinitely richer though also much more complex than the rather bland and abstract concepts contained in national codifications European legislation and modern model rules **Essential Cases on the Limits of Liability** Bénédicte Winiger, Bjarte Askeland, Elena Bargelli, Martin Hogg, Ernst Karner, 2024-11-04 European legal systems have developed a broad range of instruments aimed at limiting liability These instruments are systematically examined within the present volume which builds on the experience gathered in the various jurisdictions over the past decades and thereby fills a major gap in tort law literature The publication contains a selection of the most important cases from 27 states across Europe as well as decisions by European Union courts it also highlights cases from earlier periods of legal history For each case the facts and the relevant court decision are presented and accompanied by an analytical commentary In addition comparative analyses of the reported cases are provided and a special report is dedicated to how key cases would be resolved under model European rules on tort law The editors believe that the material gathered here may provide guidance for an organic convergence of the national legal systems in Europe It constitutes the basis of an *acquis commun* that is infinitely richer though also much more complex than the rather bland and abstract concepts contained in national codifications European legislation and modern model rules *A Digest of Important Cases on the Law of Crimes* John Romain Rood, 1906 **Essential Cases on Damage** Benedict Winiger, Helmut Koziol, Bernhard A. Koch, Reinhard Zimmermann, 2011-11-30 The increasing Europeanisation of the law of delict torts has produced textbooks

casebooks monographs and also sets of model rules of a genuinely European character A major gap still existing today relates to the experiences gathered in the national legal systems over the past decades The present work attempts to fill this gap for one key element of tort law the notion of damage It thus does what the previous volume in the Digest of European Tort Law series did for another key element ie natural causation Once again the publication contains a selection of the most important cases decided in 26 states across Europe as well as by the European Court of Justice For each case the facts and the relevant court decision are presented and the decision is analysed within the wider context of the development of the respective legal system In addition the editors provide comparative analyses of the case law reported in this volume concerning all the specific problems raised under the heading of damage The publication also looks into how key cases would be resolved under the European model rules drafted in the field of tort law and it also highlights cases from earlier periods of legal history The editors believe that the material gathered here may provide guidance for an organic convergence of the national legal systems in Europe It constitutes the basis of an *acquis commun* that is infinitely richer though also much more complex than the rather bland and abstract concepts contained in national codifications European legislation and the modern model rules
