discusses how Eve's inner thoughts are explored by noted French composers Jules Massenet and Gabriel Fauré. The text then enters the deep waters of Noah's flood in examination of several compositions including two unusual settings by Igor Stravinsky and Benjamin Britten as well as more conventional settings by Saint-Saëns and Donizetti. Two major 19th century oratorio settings of Abraham's story by lesser-known German composers Martin Blumner and Karl Mangold provide fascinating illuminations of the Abraham narratives whereas parts of Rebecca's story are found in works by César Franck, Ferdinand Hiller and most unusually by a French woman composer, Clémentine Carissan. Finally, Leneman shows how Joseph's story was set in numerous oratorios including by Handel but that one of the most important works based on his story is an opera by 18th century French composer Étienne Méhul. In addition to discussing these larger 19th century works, Leneman also examines several interesting atonal 20th century works based on the stories of Eve and the Flood, shedding new light on the history of the interpretation of the Book of Genesis.

Marga Richter Sharon Mirchandani, 2012-11-16. This is the first full length introduction to the life and works of significant American composer Marga Richter, born 1926, who has written more than one hundred works for orchestra, chamber ensemble, dance, opera, voice, chorus, piano, organ, and harpsichord. Still actively composing in her eighties, Richter is particularly known for her large scale works performed by ensembles such as the London Philharmonic Orchestra and the Civic Orchestra of Chicago, and for other pieces performed by prominent artists including pianist Menahem Pressler, conductor Izler Solomon, and violinist Daniel Heifetz. Interspersing consideration of Richter's musical works with discussion of her life, her musical style, and the origins and performances of her works, Sharon Mirchandani documents a successful composer's professional and private life throughout the twentieth century. Covering Richter's formative years, her influences, and the phases of her career from the 1950s to the present, Mirchandani closely examines Richter's many interesting, attractive musical works that draw inspiration from distinctly American, Irish, English, and Asian sources. Drawing extensively on interviews with the composer, Mirchandani also provides detailed descriptions of Richter's scores and uses reviews and other secondary sources to provide contexts for her work, including their relationship to modern dance, to other musical styles, and to 1970s feminism.

Photosynthesis in Bryophytes and Early Land Plants David T. Hanson, Steven K. Rice, 2013-10-21. Bryophytes, which are important constituents of ecosystems globally and often dominate carbon and water dynamics at high latitudes and elevations, were also among the pioneers of terrestrial photosynthesis. Consequently, in addition to their present

day ecological value modern representatives of these groups contain the legacy of adaptations that led to the greening of Earth This volume brings together experts on bryophyte photosynthesis whose research spans the genome and cell through whole plant and ecosystem function and combines that with historical perspectives on the role of algal bryophyte and vascular plant ancestors on terrestrialization of the Earth The eighteen well illustrated chapters reveal unique physiological approaches to achieving carbon balance and dealing with environmental limitations and stresses that present an alternative yet successful strategy for land plants
