Asia represents the most ground breaking research on the region      *Media Consumption and Everyday Life in Asia* Youna Kim, 2008-06-30 This book explores people's everyday experience of the media in Asian countries in confrontation with huge social change and transition and the need to understand this phenomenon as it intersects with the media. It argues for the centrality of the media to Asian transformations in the era of globalization. The profusion of the media today with new imaginations, new choices and contradictions generates a critical condition for reflexivity, engaging everyday people to have a resource for the learning of self, culture and society in a new light. Media culture is creating new connections, new desires and threats, and the identities of people are being reworked at individual, national, regional and global levels. Within historically specific social conditions and contexts of the everyday, the chapters seek to provide a diversity of experiences and understandings of the place of the media in different Asian locations. This book considers the emerging consequences of media consumption in people's everyday life at a time when the political, socio-economic and cultural forces by which the media operate are rapidly globalizing in Asia.

Popular Religion in Southeast Asia Robert L. Winzeler, 2015-12-17 In this overview of popular religion in Southeast Asia, Robert L. Winzeler offers an interpretative look at the nature of today's indigenous religious traditions as well as Hinduism, Buddhism, Islam and Christianity and conversion. He focuses not on religion as it exists in books, doctrine, theology and among elites and dominant institutions but rather in the lives, beliefs and practices of ordinary people. Popular Religion in Southeast Asia employs a broad view of religion as involving not just the usual Western notions of faith but also supernatural belief in general magic, sorcery and practical concerns such as healing, personal protection and success in business. Case studies and concrete examples flesh out the discussion, demonstrating how popular religion relates to historical and contemporary social, cultural, political and economic developments in the region.
