Secombe argues that family forms must be seen to be at the heart of modes of production. He takes issue with the mainstream consensus in family history which argues that capitalism did not fundamentally alter the structure of the nuclear family and makes a controversial intervention in the long standing debate over European marriage patterns and their relation to industrialization. Drawing on an astonishing range of studies in family history, historical demography and economic history, *A Millennium of Family Change* provides an integrated overview of the long transition from feudalism to capitalism, illuminating the far reaching changes in familial relations from peasant subsistence to the making of the modern working class.

An Intimate History of Humanity Theodore Zeldin, 2012-12-31. The book that changed my life, a constant companion. Bill Bailey: Extraordinary and beautiful, the most exciting and ambitious work of non-fiction I have read in more than a decade. The Daily Telegraph. This extraordinarily wide ranging study looks at the dilemmas of life today and shows how they need not have arisen. Portraits of living people and historical figures are placed alongside each other as Zeldin discusses how men and women have lost and regained hope, how they have learnt to have interesting conversations, how some have acquired an immunity to loneliness, how new forms of love and desire have been invented, how respect has become more valued than power, how the art of escaping from one's troubles has developed, why even the privileged are often gloomy, and why parents and children are changing their minds about what they want from each other.

People of the Book David Lyle Jeffrey, 1996. The author examines the cultural and literary identity among Western Christians, which the centrality of the Book has helped to create, and the Christian use of the phrase 'People of the Book'. Preface. **Routledge Revivals:**

The Encyclopedia is thoroughly cross referenced and includes a generous selection of illustrations, maps, charts and genealogies. It is especially strong in its coverage of economic issues, women, music, religion and literature. Understanding Non-State Actors Eran Zohar, 2023-10-24. *Understanding Non-State Actors* aims to reduce the scarcity of academic literature on armed non-state actors (NSAs) that have always been a part of world politics and wars. This monograph offers, possibly for the first time, a systematic historical review as well as a substantive theory of NSAs and their arming efforts. The world has been astonished by the ability of the well-armed Hamas to inflict heavy losses on the powerful

Israel Thus from the Jewish rebellion against Rome to the war between the Ukrainian separatists and the Ukrainian government NSAs weapons acquisition has been vital for the build up of their force enabling both the employment of that force and its sustainability While weapons are not necessarily the most important factor in military build up NSAs need weapons to fight and revolts usually erupt after the organizers have acquired a certain number of weapons Conversely many revolts lose momentum and operations are not carried out or turn ineffective due to shortages of arms and ammunition A major theme of this monograph is that in spite of dramatic political and technological changes armed NSAs in different periods have employed similar methods to acquire weapons Self production looting and stealing external support and the arms trade were always the major ways for NSAs to acquire weapons though the importance of each method and the type of arms has changed remarkably over time Understanding Non State Actors discusses the factors political social cultural technological and organizational that have both facilitated and constrained the ability of NSAs to acquire arms Especially lecturers and students of Military Terrorism Conflict studies War and peace studies will benefit from this study *Hist West Educ:Ancient World V 1* James Bowen,2018-10-24 Volume One of three this is a reprint of James Bowen s A History of Western Education originally published by Methuen in the 1970s Volume One covers The Ancient World Orient and Mediterranean 2000B C A D 1054 The volume traces the development of education in the ancient world from the first scribal cultures of Mesopotamia and Egypt to learning in the early Christian church A detailed account is given of the achievements of Greece in literacy learning philosophy and training for public life achievements which were further developed in the Hellenistic Orient and incorporated by the Romans into their own highly organized educational system This leads to the emergence of a specifically Christian ideal of education the decline of secular learning in the West and the preservation of learning both in Byzantium and in Western monasticism
