

EVERYONE'S COUNTRY ESTATE

Today more than one hundred parks, waysides, monuments, historic sites, and trails are operated by the State of Minnesota. They fulfill the plea of Newton H. Winchell, state geologist and archaeologist, who in 1889 stressed the value of a system of public parks and of "... the healthful resort that it would afford for those living in the cities."

Minnesota's parks preserve portions of the state's varied topography that ranges from forests to prairies and wetlands to lakes. They also include vivid representations of the state's geological story by preserving evidence of volcanism, sedimentation from continental seas, the work of numerous glaciers, and subsequent erosion. Also, much of the history of this area is preserved within state parks; these resources include Native American earthworks, military forts, a lighthouse, and numerous other historic places and structures. Many of them are beautiful stone and wooden buildings constructed in the 1930s by the Works Progress Administration and the Civilian Conservation Corps.

Minnesota's State Parks are truly "Everyone's Country Estate," a description that came from the title of Roy W. Meyer's book on the history of the state park system. Efforts began in 1885 to preserve some of the state's natural resources and to provide places for its citizens and visitors to enjoy. In that year the Minnesota State Legislature authorized the establishment of Minnehaha State Park; it never gained this status, but today it serves as one of the most important parks in the Minneapolis park system. It was in 1891 that Itasca, famed as the source of the Mississippi River, became the initial park in the statewide system, and it retains that premier position. At Itasca and the other state parks all people are given the opportunity to encounter nature and its many wonders, as well as numerous significant episodes in human history.

The State Park Movement in America Ney C. Landrum,2013-08-11 Essentially a phenomenon of the twentieth century America s pioneering state park

movement has grown rapidly and innovatively to become one of the most important forces in the preservation of open spaces and the provision of public outdoor recreation in the country During this time the movement has been influenced and shaped by many factors social cultural and economic resulting in a wide variety of expressions While everyone agrees that the state park movement has been a positive and beneficial force on the whole there seems to be an increasing divergence of thought as to exactly what direction the movement should take in the future In *The State Park Movement in America* Ney Landrum recipient of almost two dozen honors and awards for his service to state and national parks places the movement for state parks in the context of the movements for urban and local parks on one side and for national parks on the other He traces the evolution of the state park movement from its imprecise and largely unconnected origins to its present status as an essential and firmly established state government responsibility nationwide in scope Because the movement has taken a number of separate but roughly parallel paths and produced differing schools of thought concerning its purpose and direction Landrum also analyzes the circumstances and events that have contributed to these disparate results and offers critical commentary based on his long tenure in the system As the first study of its kind *The State Park Movement in America* will fill a tremendous void in the literature on parks Given that there are more than five thousand state parks in the United States compared with fewer than five hundred national parks and historic sites this history is long overdue It will be of great interest to anyone concerned with federal state or local parks as well as to land resource managers generally
