Walker, 2012-09-20 From the newly discovered Higgs particle of the subatomic world to the emerging role of the vast quantities of unseen matter and energy of outer space to our earthly relationships and the age old questions about who we are and where we go when we die *The Numinous Factor* shows how both science and everyday life in the twenty first century can be experienced better by seeing spirituality as the basis of everything Through application of its ten non religious principles of mind expansion you will Understand better the latest discoveries of science Discover more of your own complex identity Increase beyond limitation your awareness and ability to comprehend Relate better to everyone and everything in the world around you through spiritual unity Calm your mind by seeing your basic essence as being one with the spirituality of the Universe Realize why seemingly negative things happen See new dimensions of your existence after this earthly life Sense the great peace and happiness of a higher spiritual consciousness *The Numinous Factor* is the missing link between physical reality and spiritual reality It opens up the heart and reveals new dimensions of our expanding Mind Geoffrey Grant Layng minister and public speaker **In The Beginning God Created a Hologram** Frederick Guttman, Unlike animals we can consider that human beings attach great importance to our personal reality Certainly other forms of life that we know of on this planet do not have a sufficient level of consciousness to carry out

this type of reasoning Thinking about who we are we cannot exclude another existential doubt where do we come from Empirical science from the 16th to the 20th centuries would tell us that simply we proceed from certain casual processes in particular environments that resulted in various changes in life forms which were changing psychically morphologically and biologically to go becoming completely different and that thousands and millions of years later would become what we can now say that we are Do you wonder what the mind has to do with the origin of the cosmos Everything I m not going to address data that I covered half a decade ago in the initial Sakla Rebellion trilogy but I do have to remind you if you ve read it that mythology plays an important role in our understanding of the perceivable universe as long as they re understood their symbols and know how to adapt to the principles of the mind As a point of reference I use the story that we have received by transmission from the Hebrew prophet Moses or Mashah if we read it literally from the Hebrew language or Moshe as the Jews call him Why Well I am Jewish by descent an Israeli citizen and I speak Hebrew so what better than to give my opinion from a more scholarly angle on this field And if you ask me why Moses Although I can take some isolated source as a skeleton to build the body of this book but what happens is that the circumstances have occurred in such a way that these writings which To the speculative and superstitious mind man and the rest of existing things were created by one or more supernatural beings from some other state of abstract reality while others would attribute this fact to a source in other dimensions or other planets Mythologies are a clear example of these phenomenal and acheetypal reasoning Although it was only until the consolidation of ideas about the mind that exploded with individuals like Sigmund Freud and Carl Gustav Jung among many others that mythology and its archetypes and the idea of a Collective Mind began to be understood Already Plato and a few before him even Freud and Jung had commented on this and had indicated the reality of Mind over the world of phenomena However the ability to deeply understand the apparent inscrutability of the Mind was not yet fully plausible until less than two centuries ago
