## **Everything You Need To Know About Bird Flu And What You:**

*Everything You Need to Know about Bird Flu* Jo Revill, 2005 Humans have no natural immunity to bird flu. Its symptoms are severe and can lead to death within five to six days. While so far all victims have caught the virus directly from infected birds, many scientists fear that it is just a matter of time before the virus mutates and begins to spread from human to human, leading to a pandemic that could kill up to 40 million people around the world. Cutting through the deluge of news stories about bird flu, this definitive guide explains how the bird flu virus works, the harm that it has already caused in Asia, why it will be so deadly if it begins to spread between humans, and what has been done so far to protect communities from the threat. Not enough, many scientists fear. It will look at the antiviral drugs which offer us short-term protection but also investigate why we have done so little to invest in vaccine development. In addition to giving the background story of the bird flu pandemic, the book is full of practical information on what people can do to protect themselves, including advice from experts on how to boost the immune system and procedures to follow if the pandemic arrives. Everyone needs to know as much as they can about.

**Bird Flu** Marc Siegel, 2008-05-02 Marc Siegel is an articulate voice of reason in a world beset by hype and hysteria. We would be well advised to listen closely to what he has to say. Jerome Groopman, M.D., staff writer, *The New Yorker*. Siegel cuts through the hype about the deadly H5N1 and applies reason in seeking the answers. John M. Barry, author of *The Great Influenza: The Epic Story of the Deadliest Plague in History*. Timely and needed. At such times we need soothsayers and explicators to redirect the ready fire aim mindset. Siegel's book fulfills this role well. *The Journal of the American Medical Association*. As bird flu sweeps through Asia, the rest of the world has begun to worry that it might spread west and start infecting humans. As many experts have pointed out, an influenza pandemic is only a matter of time, and that time could be now. Or is it? In *Bird Flu*, Dr. Marc Siegel cuts through the hype, the facts, the fears, and the realities to explain what has the experts so worried and why there's still plenty of reason to be calm. Among the questions he answers are: What is bird flu and who has it? What can I do to protect my family? Should I stockpile Tamiflu? Will this be like the deadly Spanish flu of 1918? Why is there no bird flu vaccine? Will the annual flu shot protect me? In his sensible and entertaining style, Siegel looks at the advances we've made in treatments, the research still to be done, and the challenges ahead for Asia to lay out a realistic plan for ending this global threat. While a bird flu outbreak in the United States may or may not happen this year, there's still a great deal of work to be done in readying America for outbreaks of any kind.

**Everything You Need to Know** John Farndon, 2006 *Bird Flu* John Farndon, 2006-01-01 A bird flu pandemic is inevitable, so we are told. First identified in China, this apparently merciless virus, which originated in chickens, has the potential to mutate and kill thousands, even millions of people. John Farndon offers a compact, one-stop read that tells it straight. The public doesn't want to spend months doing research, and *Bird Flu* provides readers with all the necessary information. This is something that can't be pushed aside and ignored; people really do need to know if there is anything to fear, and if so, what can they do about it.

Criticism, Crisis, and Contemporary Narrative Paul Crosthwaite, 2011-01-05 This landmark collection of essays demonstrates the capacity of literary and cultural criticism working in dialogue with contemporary narrative texts to provide penetrating insights into a public sphere defined by a succession of overlapping global crises ranging from finance and economics to the environment geopolitics terrorism and public health
