Evidence Embalmed Ann Rosalie David, Edmund Tapp, 1984 Mummies, magic and medicine in ancient Egypt Campbell Price, Roger Forshaw, Andrew Chamberlain, Paul Nicholson, 2016-06-17 This volume published in honour of Egyptologist Professor Rosalie David OBE presents the latest research on three of the most important aspects of ancient Egyptian civilisation mummies magic and medical practice Drawing on recent archaeological fieldwork new research on human remains reassessments of ancient texts and modern experimental archaeology it attempts to answer some of Egyptology's biggest questions how did Tutankhamun die How were the Pyramids built How were mummies made Leading experts in their fields combine traditional Egyptology and innovative scientific approaches to ancient material The result is a cutting edge overview of the discipline showing how it has developed over the last forty years and yet how many of its big questions remain the same

Egyptian Mummies and Modern Science Rosalie David, 2008-02-04 Egyptian mummies have always aroused popular and scientific interest however most modern studies although significantly increased in number and range have been published in specialist journals Now this unique book written by a long established team of scientists brings this exciting cross disciplinary area of research to a wider readership It shows how this team's multidisciplinary investigative methods and the unique resource of the Egyptian Mummy Tissue Bank are being used for the new major international investigations of disease evolution and ancient Egyptian pharmacy and pharmacology It also assesses the current status of palaeopathology and ancient DNA research and treatments available for conserving mummified remains Descriptions of the historical development of Egyptian mummifications and medicine and detailed references to previous scientific investigations provide the context for firsthand accounts of cutting edge research by prominent specialists in this field demonstrating how these techniques can contribute to a new perspective on Egyptology

The Virtual Mummy Sarah Underhill Wisseman, 2003 The Virtual Mummy is a thoroughly readable introduction to the nondestructive techniques used by contemporary researchers to analyze the artifacts and culture of ancient Egypt It tells the captivating story of the virtual unwrapping of an Egyptian mummy and the interdisciplinary project that allowed researchers at the University of Illinois at Urbana Champaign to investigate the person inside by way of an autopsy performed by computer The mummy acquired by the university's Spurlock Museum in 1989 was from the Fayum region of Egypt and is dated to about 100 a d Although other mummy projects have used

destructive analytical techniques the Spurlock mummy was never even unwrapped Minute samples of loose material were taken for dating and for textile and wood analysis without affecting the integrity or display quality of the artifact Faculty and staff members from area hospitals and University of Illinois departments including classics anthropology chemistry textile sciences and entomology were recruited by the Program on Ancient Technologies and Archaeological Materials for the project The interdisciplinary team implemented a research plan that relied on medical imaging techniques including X rays and CT scans They also utilized for the first time in the history of mummy research a Cray II supercomputer at the university's National Center for Supercomputing Applications to render three dimensional images of the mummy's skull and body Replete with illustrations Sarah U Wisseman's engaging chronicle of teamwork and research gives readers the chance to experience how ancient history melded with contemporary technology The Virtual Mummy also includes a review of the development of mummification and a general history of mummy research *Parasites in Past Civilizations and their Impact upon Health* Piers D. Mitchell, 2023-04-06 This interdisciplinary volume brings together medicine and history to investigate the impact that parasites had upon past civilizations globally **Unwrapping Ancient Egypt** Christina Riggs, 2014-04-10 First runner up for the British Kuwait Friendship Society Book Prize in Middle Eastern Studies 2015 In ancient Egypt wrapping sacred objects including mummified bodies in layers of cloth was a ritual that lay at the core of Egyptian society Yet in the modern world attention has focused instead on unwrapping all the careful arrangements of linen textiles the Egyptians had put in place This book breaks new ground by looking at the significance of textile wrappings in ancient Egypt and at how their unwrapping has shaped the way we think about the Egyptian past Wrapping mummified bodies and divine statues in linen reflected the cultural values attached to this textile with implications for understanding gender materiality and hierarchy in Egyptian society Unwrapping mummies and statues similarly reflects the values attached to Egyptian antiquities in the West where the colonial legacies of archaeology Egyptology and racial science still influence how Egypt appears in museums and the press From the tomb of Tutankhamun to the Arab Spring Unwrapping Ancient Egypt raises critical questions about the deep seated fascination with this culture and what that fascination says about our own

Mitchell,2016-03-03 Sanitation and intestinal health is something we often take for granted today However people living in many regions of the developing world still suffer with debilitating diseases due to the lack of sanitation Despite its clear impact upon health in modern times sanitation in past populations is a topic that has received surprisingly little attention This book brings together key experts from around the world to explore fascinating aspects of life in the past relevant to sanitation and how that affected our ancestors By its end readers will realize that toilets were in use in ancient Mesopotamia even before the invention of writing and that flushing toilets with anatomic seats were a technology of ancient Greece at the time of the minotaur myth They will see how sanitation compared in ancient Rome and medieval London and will take a virtual walk around the sanitation of York at the time of the Vikings Readers will also understand which intestinal parasites infected humans in different regions of the world over different time periods what these parasites tell us about early human evolution later population migrations past diet lifestyle and the effects of sanitation technology There is good evidence that over the millennia people in the past realized that sanitation mattered They invented toilets cleaner water supplies drains waste disposal and sanitation legislation While past views on sanitation were very different to those of today it is clear than many past societies took sanitation much more seriously than was previously thought
