#### **Developing Practice Guidelines for Social Work Intervention**

Aaron Rosen,Enola K. Proctor,2003-11-26 This book bridges the gap between social work knowledge and empirically based practice Although there is a significant need for the use of empirically tested and verified knowledge in social work practice the empirical basis of support is nearly absent from practitioners considerations as they make clinical decisions in routine practice The authors advocate the development of readily available accessible and professionally sanctioned practice guidelines for use by practitioners a necessity in the age of managed care and demands for greater accountability effectiveness and efficiency in practice This book features a much needed discussion of racial and ethnic differentials in relation to practice guidelines and on the relationship between practice guidelines and different aspects of service delivery

**Helping Victims of Violent Crime** Diane L. Green,Albert R. Roberts,2008-06-23 Over the past two decades violent crime has become one of the most serious domestic problems in the United States Approximately 13 million people nearly 5% of the U S population are victims of crime every year and of that approximately one and a half million are victims of violent

crime Ensuring quality of life for victims of crime is therefore a major challenge facing policy makers and mental health providers Helping Victims of Violent Crime grounds victim assistance treatments in a victim centered and strengths perspective The book explores victim assistance through systems theory the holistic notion of examining the client in his her environment and a key theoretical underpinning of social work practice The basic assumption of systems theory is homeostasis A crime event causes a change in homeostasis and often results in disequilibrium The victim s focus at this point is to regain equilibrium Under the systems metatheory coping crisis and attribution theories provide a good framework for victim centered intervention Stress and coping theories posit that three factors determine the state of balance perception of the event available situational support and coping mechanisms Crisis theory offers a framework to understand a victim s response to a crime The basic assumption of crisis theory asserts that when a crisis occurs people respond with a fairly predictable physical and emotional pattern The intensity and manifestation of this pattern may vary from individual to individual Finally attribution theory asserts that individuals make cognitive appraisals of a stressful situation in both positive and negative ways These appraisals are based on the individual s assertion that they can understand predict and control circumstances and result in the victim s assignment of responsibility for solving or helping with problems that have arisen from the crime event In summary these four theories can delineate a definitive model for approach to the victimization process It is from this theoretical framework that Treating Victims of Violent Crime offers assessments and interventions with a fuller understanding of the victimization recovery process The book includes analysis of victims of family violence child abuse elder abuse partner violence as well as stranger violence sexual assault homicide and terrorism
