## **Evidence Based Cardiology For Pda:**

**Evidence-Based Cardiology** Salim Yusuf, John A. Cairns, A. John Camm, Ernest L. Fallen, Bernard J. Gersh, 2008-04-15  
This second edition is a ground breaking clinical text with a strong emphasis on rigorous evidence. Leaders in the field discuss best practice in the light of systematic reviews and randomised control trials and how best to treat where the information is less clear. Case histories provide intriguing discussions on how to apply the evidence in real life situations. Evidence based Cardiology also includes free access to the latest evidence which is automatically posted on a companion website.

Evidence-based Medicine for PDAs Allan F. Platt, 2009. Accompanying CD ROM contains an audio visual tutorial with demonstrations. Page 4 of cover. Evidence-Based Cardiology for Pda Peter J. Sharis, Christopher P. Cannon, M.D., Christopher P. Cannon, 2004-07-02. This PDA reference is an indispensable decision making aid for all physicians who treat cardiovascular disease. It provides instant access to the latest American College of Cardiology and American Heart Association guidelines and the most current clinical trial data that support or refute clinical interventions. Easy to navigate screens provide succinct information on the pathophysiology of each disease and the guideline recommended diagnostic tests and treatments. Platform: Palm OS, Windows CE and Pocket PC handheld devices. Also Available for iPhone, iPod touch. Compatibility: BlackBerry OS 4.1 or Higher, iPhone/iPod Touch 2.0 or Higher, Palm OS 3.5 or higher, Palm Pre Classic, Symbian S60 3rd edition, Nokia Windows Mobile, Pocket PC all versions, Windows Mobile Smartphone, Windows 98SE, 2000 ME, XP, Vista, Tablet PC. Evidence-Based Cardiology Dayi Hu, Thach Nguyen, 2010-01-30. Medical decisions are made on the basis of critical thinking and clinical judgments are based on the relevancy of the collected data. Medical decisions and clinical judgments are the results of the long thought process generated from formal learning, data from guidelines and practice standards, experience, an understanding of the incidence of disease in the population that the patient represents and the likelihood of a disease being present in a specific patient. This book introduces and encourages the concept of evidence based patient care. This work presents the ideology and methodology of critical thinking and also the available evidence, management and cost effectiveness across the field. Evidence Based Cardiology is aimed at any clinician who encounters a cardiac patient from the Clerk to the Internist to the Practicing Physician encouraging disease management decisions to be based on the highest level of evidence. **Evidence-based Cardiology for Pda** Peter J. Sharis, 2004. Evidence-Based Cardiology Consult Kathleen Stergiopoulos, David L. Brown, 2013-11-01. The book will provide a detailed evidence based approach to key issues in the pathophysiology, diagnosis and management of patients with concurrent medical issues. It will provide a clinical focus with practical advice on the prevention, diagnosis and treatment of heart disease supported by an expert's summary without duplicating other texts. Each chapter will be structured similarly in the following sections: 1. Introduction, 2. Pathophysiology, 3. Diagnosis, 4. Management, 5. Key Points, 6. Summary of the key guidelines from professional societies where available. The recommendations will have a firm background in the AHA, ACC or ESC recommendations for

the management of patients The intention is to create a comprehensive book rather than a pocketbook or manual We hope this book will serve as an up to date reference for the practicing clinician Each of the approximately 40 chapters will have at most 5000 words and 5-7 high quality figures or illustrations each Only the highest quality authors will be recruited from the United States and Europe The emphasis will be on depth of information yet ease of access This necessitates an approach whereby not a single word sentence or page of the book will be wasted Brief where it needs to be brief detailed where detail is required this will be a true all encompassing clinician reference
