

Psychology: Evolution of a Science

- Helmholtz' research created the concept of **reaction time**. Subjects took longer to report the **stimulus** of a toe being touched, as compared to their thigh. This surprised scientists of the time, who believed thought and perception to be instantaneous.
- Wilhelm Wundt believed that scientific psychology should focus on the study of **consciousness**. (a person's subjective experience of the world and the mind).
- To study consciousness, he adopted the approach of **structuralism**, the analysis of the basic elements that constitute the mind. Wundt used the method of **introspection**, the subjective observation of one's own experience, such as hearing a sound. Wundt also carefully described the feelings associated with such elementary perceptions.
- Wundt also used reaction times to examine the relationship between perception and interpretation of a stimulus. Some subjects were told to perceive the sound before they pressed a button, others told to press the button as soon as they heard the sound. The second group were significantly faster at pressing the button (pgs. 5&6).

Game Mike Hockney, 2013-09-30 What is the answer to everything? Pythagoras provided a glimpse of the answer 2,500 years ago when he declared, "All things are numbers." Mathematics is literally everything. Unlike science, mathematics offers certainty and absolute knowledge. Mathematics unifies science, religion, and metaphysics and is the true Grand Unified Theory of Everything. No experiment can ever contradict a mathematical truth. Mathematics is the ONLY answer to everything. Mathematics is the ONLY subject inherently about eternal, Platonic truth. The God Series, starting with *The God Game*, reveals the astonishing power of ontological mathematics to account for everything. Isn't it time to convert to the world's only rational religion, Illuminism, the Pythagorean religion of mathematics that infallibly explains all things and guarantees everyone a soul that's not only eternal and indestructible but also has the capacity to make each of us a true God? Isn't it time to become Illuminated? The God Series is what God ought to have delivered to humanity rather than the Bible. Knowledge rather than faith. Truth rather than fantasy. *A Scientific Demonstration of the Future Life* Thomson Jay Hudson, 1922

The Divine Pedigree Of Man Thomas Jay Hudson, 2012 This book treats as its title would indicate about the character of the human mind as independent of the body and so traces the divine pedigree of man The author holds that there is a subjective and an objective mind Materialistic scientists have succeeded in demonstrating that the objective mind is a function of the brain and that it is inherent in the brain But it does not necessarily follow that the subjective mind is inherent in any one or more organs of the body on the contrary all the facts tend to prove that it exists independently of any specialized organ whatever The objective mind cannot of its own volition move one purely involuntary muscle On the other hand the subjective mind can and often does take entire control of the whole body and wields it at its will This is universal law in the supreme hour

The Search for Certainty W.W. Spradlin, P.B. Porterfield, 2012-12-06 Who are we What are we How do we fit into the world Or into the universe These and other questions pertaining to ourselves and our environment are as compelling to us today as they were to our primitive ancestors Throughout our history we have developed paradigms of thought that have attempted to answer these questions each conceptual framework being particularly relevant to its age We are in the twentieth century witnessing a complete reorganization of our thinking We are now with the aid of technology able to bring together both ancient and new patterns of thought and to observe the emergence of a kaleidoscopic world view that is uniting the once dissonant theories of philosophy religion and science This book sketches an historical picture of three world views that have shaped our ideas about ourselves These conceptual formats that have so influenced us are not mutually exclusive and are present in all of us simultaneously although to varying degrees depending upon our individual biases

The Ontological Self Dr. Cody Newman, Everyone has a different answer for what the Self

is But do they have any idea what it really is Is the Self actually the fundamental unit of existence Many people are happy to believe that the universe is made of matter What would it mean to say that the universe is made of mind If material atoms are made of subatomic particles what would immaterial minds be made of The only thing a mind can be made of is thoughts After all that's what a mind does It thinks What does thinking mean It means using thoughts It means combining atomic thoughts into molecular thoughts In physics string theory claims that reality is made up of infinitesimally small one dimensional vibrating strings As the strings vibrate twist fold come together and split apart they produce all the effects that traditional physics addresses all the stuff to do with atoms and their interactions and including large scale material phenomena like gravity But what if the real strings were actually zero dimensional rather than one dimensional and immaterial rather than material What if they were actually what thoughts are and so to say that physics arises out of material strings could be replaced by the statement that physics is made out of immaterial thoughts Where strings are one dimensional extended and material thoughts are zero dimensional unextended and immaterial but their combinations produce dimensional material extended things thanks to the incredible properties of phase in ontological Fourier mathematics All you have to do to replace materialism reality is made of matter with idealism reality is made of mind is to reduce scientific strings to their analytic mental equivalents which turn out to be sinusoidal waves which exist in the mathematical precursor domain that serves as the origin the cause of the domain of physics Mathematics in itself is a dimensionless Singularity system Ontological mathematics is the subject that deals with the mathematical Singularity that precedes the Big Bang This Singularity when properly understood comprises autonomous selves called monads made of basis thoughts which are none other than sinusoidal waves The self is an eternal and necessary entity It has existed forever and it with its fellow selves is the author of everything We inhabit a universe of mental selves not of physical matter Selves create matter Matter does not create selves
