Evolution Of The Great Lakes Water Quality Agreement:

Evolution of the Great Lakes Water Quality Agreement Lee Botts, Paul Robert Muldoon, 2005 Water quality concerns are not new to the Great Lakes. They emerged early in the 20th century in 1909 and matured in 1972 and 1978. They remain a prominent part of today's conflicted politics and advancing industrial growth. The Great Lakes Water Quality Agreement under the Boundary Waters Treaty of 1909 became a model to the world for environmental management across an international boundary. Evolution of the Great Lakes Water Quality Agreement recounts this historic binational relationship: an agreement intended to protect the fragile Great Lakes. One strength of the agreement is its flexibility, which includes a requirement for periodic review that allows modification as problems are solved, conditions change, or scientific research reveals new problems. The first progress was made in the 1970s in the area of eutrophication, the process by which lakes gradually age, which normally takes thousands of years to progress but is accelerated by modern water pollution. The binational agreement led to the successful lowering of phosphorus levels that saved Lake Erie and prevented accelerated eutrophication in the rest of the Great Lakes ecosystem. Another major success at the time was the identification and lowering of the levels of toxic contaminants that cause major threats to human and wildlife health from accumulating PCBs and other persistent organic pollutants.

The People and the Bay Nancy B. Bouchier, Ken Cruikshank, 2016-01-15 This masterful social and environmental history raises questions about how decisions being made about the natural world today will shape the cities of tomorrow. In 1865 John Smoke braved the ice on Burlington Bay to go spearfishing. Soon after he was arrested by a fishery inspector and then convicted by a magistrate who chastised him for thinking that he was at liberty to do as he pleased with Her Majesty's property. With this story, Nancy Bouchier and Ken Cruikshank launch their history of the relationship between the people of Hamilton, Ontario and Hamilton Harbour, aka Burlington Bay. From the time of European settlement through to the city's rise as an industrial power, townsfolk struggled with nature and with one another to champion their particular vision of the bay as a place to live, work, and play. As Smoke discovered, the outcomes of those struggles reflected the changing nature of power in an industrial city. From efforts to conserve the fishery in the 1860s to current attempts to revitalize a seriously polluted harbour, each generation has tried to create what it believed would be a livable and prosperous city.

Reflections on Canada's Past, Present and Future in International Law/Réflexions sur le passé, le présent et l'avenir du Canada en droit international Oonagh E. Fitzgerald, Valerie Hughes, Mark Jewett, 2018-06-30 Marking 150 years since Confederation provides an opportunity for Canadian international law practitioners and scholars to reflect on Canada's rich history in international law and governance where we find ourselves today in the community of nations and how we might help shape a future in which Canada's rules-based and progressive approach to international law gains ascendancy. This collection of essays, each written in the official language chosen by the authors, provides a thoughtful perspective on Canada's past and present in international law, surveys the challenges that lie before us, and offers renewed

focus for Canada's pursuit of global justice and the rule of law Part I explores the history and practice of international law including sources of international law Indigenous treaties international treaty diplomacy domestic reception of international law and Parliament's role in international law Part II explores Canada's role in international law governance and innovation in the broad fields of economic environmental and intellectual property law Part III explores Canadian perspectives on developments in international human rights and humanitarian law including judicial implementation of these obligations international labour law business and human rights international criminal law war crimes child soldiers and gender Reflections on Canada's Past Present and Future in International Law *R flexions sur le pass le pr sent et l avenir du Canada en droit international* demonstrates the pivotal role that Canada has played in the development of international law and signals the essential contributions the country is poised to make in the future

Navigating a Changing World Geoffrey Hale, Greg Anderson, 2021-04-07 The negotiation of the Canada U S Free Trade agreement in 1985-88 initiated a period of substantially increased North American and later global economic integration However events since the election of Donald Trump in 2016 have created the potential for major policy shifts arising from NAFTA's renegotiation and continuing political uncertainties in the United States and with Canada's other major trading partners *Navigating a Changing World* draws together scholars from both countries to examine Canada U S policy relations the evolution of various processes for regulating market and human movements across national borders and the specific application of these dynamics to a cross section of policy fields with significant implications for Canadian public policy It explores the impact of territorial institutions and extra territorial forces institutional economic and technological among others on interactions across national borders both within North America and where relevant in broader economic relationships affecting the movement of goods services people and capital Above all *Navigating a Changing World* represents the first major study to address Canada's international policy relations within and beyond North America since the elections of Justin Trudeau in 2015 and Donald Trump in 2016 and the renegotiation of NAFTA

Water Governance as Connective Capacity Nanny Bressers, 2016-02-11 Water is becoming one of the world's most crucial concerns A third of the world's population has severe water shortage while three quarters of the global population lives in deltas which run the risk of severe flooding In addition many more face problems of poor water quality While it is apparent that drastic action should be taken in reality water problems are complex and not at all easy to resolve There are many stakeholders involved industries local municipalities farmers the recreational sector environmental organisations and others who all approach the problems and possible solutions differently This requires delicate ways of governing multi actor processes This book approaches the concept of water management from an interdisciplinary and non technical but governance orientation It departs from the fragmented nature of water management showing how these lack cooperation joint responsibility and integration and instead argues that the capacity to connect to other domains levels scales organizations and actors is of utmost importance Connective capacity revolves around connecting

arrangements such as institutions actors for instance individuals and approaches such as instruments These three carriers of connectedness can be applied to different focal points the objects of fragmentation and integration in water management The book distinguishes five different focal points 1 government layers and levels 2 sectors and domains 3 time orientation of the long and the short term 4 perceptions and actor frames 5 public and private spheres Each contributor pays attention to a specific combination of one focal point and one connective carrier Bringing together case studies from countries including The Netherlands United Kingdom Romania Sweden Finland Italy India Canada and the United States the book focuses on the question of how to deal with the various sources of fragmentation in water governance by organizing meaningful connections and developing connective capacity In doing so it provides useful scientific and practical insights into how connective capacity in water governance can be enhanced
