Evolution Of Wired Life:

The Evolution of Wired Life Charles Jonscher, 2000-08-01 Thoughtful and erudite Intelligent and readable Will appeal to people who enjoyed Longitude by Dava Sobel or Fermat's Enigma by Simon Singh The San Diego Union Tribune Most engaging The Boston Globe An optimistic and reassuring assertion that no matter what wonders we invent human beings remain infinitely more complex and interesting The Economist A lively informative examination of the computer revolution and why the top performing information processing device is still the human brain If we believe the forecasts of many computer enthusiasts a wave of amazing devices will soon fundamentally change our lives and the thinking machine is just around the corner In this authoritative and entertaining book critically acclaimed author Charles Jonscher presents the other side of the argument while communication developments have changed society they also have their limits He shows us that in order to understand the true transformative powers of the new technologies we must know about the long history of their development and why no calculating machine can match the creative power of the human mind Rich in insights from literature philosophy and history The Evolution of Wired Life offers a fascinating look at the development of the digital era from the invention of the first alphabetic language to the printing press to the World Wide Web **The Evolution of Wired Life** C. Jonscher, 1999-08-30 Jonscher brings human history from pre Media and New Capitalism in the Digital Age E. Fisher, 2010-03-15 This book explores the new terrain of network capitalism through the transformations of the discourse on technology Rather than viewing such discourse as either a true or false reflection of reality Fisher evaluates the ideological role that technology discourse plays in the legitimation of a new form of capitalism Based on an extensive empirical analysis the book argues that contemporary technology discourse at one and the same time promises more personal empowerment through network technology and legitimates a more privatized flexible and precarious economic constellations Such discourse signals a new tradeoff in the political culture of capitalism from a legitimation discourse which emphasizes the capacity of technology and technique to bring about social emancipation through equality stability and security to a legitimation discourse which focuses on the capacity of technology to bring about individual emancipation through individual empowerment authenticity creativity and cooperation Contrary to the prevailing assumption that sees network technology as liberating from the rigidity and pitfalls of a stifling Fordist capitalism the book offers a theoretical framework which sees contemporary technology discourse as an ideology that legitimates the economic social and political arrangements of the new capitalism Handbook of Research on Web 2.0 and Second Language Learning Thomas, Michael, 2009-01-31 This book investigates how those involved in education can respond to the opportunities offered by the Web 2.0 technology Provided by publisher Digital Humanities and the Cyberspace Decade, 1990-2001 Claire Warwick, 2024-10-03 Setting out a history of cyberspace and its relationship with the discipline that was to become digital humanities this book is an account of an often forgotten period of internet history in the 1990s when this medium was in its infancy It provides a detailed account of the

concepts of cyberspace and the virtual which were characteristic of a perception that using the internet allowed users to enter a separate space from everyday life a world elsewhere In doing so it argues that this libertarian idea of the internet framed it as a new frontier where the rules of the everyday world did not and should not apply and where the individual could find freedom These early norms and the regrettable lack of regulation that was a consequence of them this book argues contributed to many of current issues with internet media including of toxic communication disinformation and over commercialisation

Net Works xtine burrough,2012-05-23 Net Works offers an inside look into the process of successfully developing thoughtful innovative digital media In many practice based art texts and classrooms technology is divorced from the socio political concerns of those using it Although there are many resources for media theorists practice based students sometimes find it difficult to engage with a text that fails to relate theoretical concerns to the act of creating Net Works strives to fill that gap Using websites as case studies each chapter introduces a different style of web project from formalist play to social activism to data visualization and then includes the artists or entrepreneurs reflections on the particular challenges and outcomes of developing that web project Scholarly introductions to each section apply a theoretical frame for the projects A companion website offers further resources for hands on learning Combining practical skills for web authoring with critical perspectives on the web Net Works is ideal for courses in new media design art communication critical studies media and technology or popular digital internet culture

Social Consequences of

Internet Use James E. Katz, Ronald E. Rice, 2002-08-30 A study of the impact of Internet use on American society based on a series of nationally representative surveys conducted from 1995 to 2000 Drawing on nationally representative telephone surveys conducted from 1995 to 2000 James Katz and Ronald Rice offer a rich and nuanced picture of Internet use in America Using quantitative data as well as case studies of Web sites they explore the impact of the Internet on society from three perspectives access to Internet technology the digital divide involvement with groups and communities through the Internet social capital and use of the Internet for social interaction and expression identity To provide a more comprehensive account of Internet use the authors draw comparisons across media and include Internet nonusers and former users in their research The authors call their research the Syntopia Project to convey the Internet s role as one among a host of communication technologies as well as the synergy between people s online activities and their real world lives Their major finding is that Americans use the Internet as an extension and enhancement of their daily routines Contrary to media sensationalism the Internet is neither a utopia liberating people to form a global egalitarian community nor a dystopia producing armies of disembodied lonely individuals Like any form of communication it is as helpful or harmful as those who

use it **Digital Scholarship in the Tenure, Promotion and Review Process** Deborah Lines Andersen, 2015-04-15 To receive tenure college and university professors have long been required to write scholarly monographs or articles engage in serious research and teach effectively In recent years however the emergence of digital scholarship has revolutionized and complicated the picture in unexpected ways as new electronic media have enabled academics to communicate scholarly material in innovative formats such as websites PowerPoint presentations CD ROMs and virtual reality tours Despite this growing output of sophisticated digital scholarship there has been little attempt to set standards define basic issues and concepts or integrate electronic scholarship into the tenure debate This collection of cutting edge articles marks the first effort to evaluate the place of digital scholarship in the tenure promotion and review process As a primer aimed at scholars faculty members and department chairs in the humanities social sciences and other fields as well as deans provosts and university administrators this collection examines the evolution of nontraditional scholarship analyzes the various formats and suggests guidelines for assessment on a scholarly level It also examines the impact of digital scholarship in the classroom and academy and explores new directions for the future This book will help shape policy in the murky world of tenure review and could become a central text for scholars and administrators everywhere The Digital Difference W. Russell Neuman, 2016-06-06 The Digital Difference examines how the transition from the industrial era media of one way publishing and broadcasting to the two way digital era of online search and social media has affected the dynamics of public life In the digital age fundamental beliefs about privacy and identity are subject to change as is the formal legal basis of freedom of expression Will it be possible to maintain a vibrant and open marketplace of ideas In W Russell Neuman s analysis the marketplace metaphor does not signal that money buys influence but rather just the opposite that the digital commons must be open to all ideas so that the most powerful ideas win public attention on their merits rather than on the taken for granted authority of their authorship Well documented methodical provocative and clear The Digital Difference deserves a prominent place in communication proseminars and graduate courses in research methods because of its reorientation of media effects research and its application to media policy making John P Ferr Journalism and Mass Communication Quarterly

Restoring the Human Context to Literary and Performance Studies Howard Mancing, Jennifer Marston William, 2022-01-28 Restoring the Human Context to Literary and Performance Studies argues that much of contemporary literary theory is still predicated at least implicitly on outdated linguistic and psychological models such as post structuralism psychoanalysis and behaviorism which significantly contradict current dominant scientific views By contrast this monograph promotes an alternative paradigm for literary studies namely Contextualism and in so doing highlights the similarities and differences among the sometimes conflicting contemporary cognitive approaches to literature and performance arguing not in favor of one over the other but for Contextualism as their common ground **Knowledge Management Strategies: A Handbook of Applied Technologies** Lytras, Miltiadis D., Russ, Meir, Maier, Ronald, Naeve, Ambjörn, 2008-04-30 We
