Generic institutionalism offers a new perspective on institutional economic change within an evolutionary framework The institutional landscape shapes the social fabric and economic organization in manifold ways The book elaborates on the ubiquity of such institutional forms with regards to their emergence durability and exit in social agency structure relations Thereby institutions are considered as social learning environments changing the knowledge base of the economy along generic rule sets in non nomological ways from within Specific attention is given to a theoretical structuring of the topic in ontology heuristics and methodology Part I introduces a generic naturalistic ontology by comparing prevalent ontological claims in evolutionary economics and preparing them for a broader pluralist and interdisciplinary discourse Part II reconsiders these ontological claims and confronts it with prevalent heuristics conceptualizations and projections of institutional change In this respect the book revisits the institutional economic thought of Thorstein Veblen Friedrich August von Hayek Joseph Alois Schumpeter and Pierre Bourdieu A synthesis is suggested in an application of the generic rule based approach Part III discusses the implementation of rule based bottom up models of institutional change and provides a basic prototype agent based computational simulation The evolution of power relations plays an important role in the programming of real life communication networks This notion characterizes the discussed policy realms Part IV of ecological and financial sustainability as tremendously complex areas of institutional change in political economy leading to the concluding topic of democracy in practice The novelty of this approach is given by its modular theoretical structure It turns out that institutional change is carried substantially by affective social orders in contrast to rational orders as communicated in orthodox economic realms The characteristics of affective orders are derived theoretically from intersections between ontology and heuristics where interdependencies between instinct cognition rationality reason social practice habit routine or disposition are essential for the embodiment of knowledge This kind of research indicates new generic directions to study social learning in particular and institutional evolution in general **Evolutionary Economics: Program and Scope** Kurt Dopfer, 2012-12-06

Evolutionary Economics Program and Scope offers a fresh look at the paradigmatic foundations and basic theoretical propositions of economics Twelve authors each of them with his own distinct contribution to economics make a step forward by reinterpreting major areas of micro and macroeconomics in line with modern evolutionary thinking This volume offers a unified approach to economics that allows recent developments in various strands of Evolutionary Economics to be integrated and major positions of Neoclassical Economics to be reconsidered The chapters on Evolutionary Macro Economics explore macro areas such as the division of labor and knowledge technology and institutions population thinking meso economics techno economic trajectories and industrial sectors By telescoping structure into time they highlight the processes of structural change and co evolution between technologies and institutions and provide a causal explanatory core for a modern evolutionary theory of economic growth and economic development The chapters on Evolutionary Micro Economics

Value Theory and Economic Progress: The Institutional Economics of J. Fagg Foster Marc R. Tool, 2012-12-06 J Fagg Foster 1907 1985 was one of the most significant creators of institutionalist economic theory in the twentieth century He wrote and taught in the American intellectual tradition of Thorstein Veblen John R Commons John Dewey and Clarence E Ayres This tradition shares purpose and philosophy with the European contributors Gunnar Myrdal and K William Kapp Because little of Foster's scholarly work was formally published professional knowledge of his extraordinary contribution is quite limited beyond the circle of his students and colleagues Value Theory and Economic Progress attempts to correct that deficiency by providing an extended characterization of this missing and crucial component of the development of American heterodox economic thought Its purpose is to demonstrate the timely relevance and significance of this model of inquiry in political economy In addition this volume explains that contemporary problem solving means changing what is into what ought to be through institutional adjustments such a demonstration is at the heart of Foster's contribution to institutional thought

Evolutionary Theory in the Social Sciences William M. Dugger, Howard J. Sherman, 2003

Institutional Analysis and Praxis Tara Natarajan, Wolfram Elsner, Scott Fullwiler, 2009-09-03 There has never been a better time for the social fabric matrix As this book is being published the idea that unregulated market capitalism leads to the best of all possible worlds has been thoroughly discredited A series of economic and social problems have come to the forefront of national discussion and policy debates There is now widespread acceptance that human activity particularly the consumption of nonrenewable energy resources has contributed to global warming The lack of oversight of the financial industry encouraged reckless practices that endangered the stability of the entire financial system prompting bailout efforts based on the fragile interdependence of the financial and economic systems The shortcomings of our health care system are increasingly evident including the growing number of uninsured citizens the difficulties for businesses in offering health insurance and the effects of health and health care on the ability of individuals and families to maintain a decent standard of living Perhaps the best illustration of a complex system that cries out for coordinated policy making is in the critical area of energy where public and private decisions on energy policy not only have

direct effects on consumer costs but also have effects on global warming local ecosystems international relations the health of our citizens and the sustainability of companies and communities In short there is growing recognition of the interdependence of the economic system with the environment and the broader institutions of society

The Institutional Economics of the International Economy John Adams, Anthony Scaperlanda, 2012-12-06 This book is the outgrowth of the editors conviction that there is a need for a current and comprehensive examination of international economic issues within the framework of institutional economics The volume covers the most important international topics that institutional economists historically have addressed We hope that our initiative and necessarily limited choice of subjects will encourage additional applications of institutional economic theory to the international economy For other economists the analyses contained in the volume s dozen chapters afford an opportunity to become more aware of the theoretical work and policy recommendations of institutional economists It may be surprising that to an extent evolutionary and neoclassical thinking converge and even sometimes overlap on the matter of trends and problems of the international economy A case in point is the increased attention both schools devote to the role of technology in shaping patterns of world trade and specialization In the past few decades global shifts in comparative advantages the widespread adoption of more flexible exchange rate systems and the remarkable shifts in institutional arrangements and policy regimes in the former Soviet Union and East Asia have compelled a reassessment of conventional static trade theories based on neoclassical assumptions Links among trade international investment and the diffusion of economic growth are being more closely scrutinized and better understood This volume is an effort to expand and stimulate this discourse on the economics of international relations including global economic development

Thorstein Veblen John Cunningham Wood, 1993 138 articles are arranged thematically to give easy access to the intellectual processes of this influential economist Volume 1 deals with his life and perspectives volume 2 with political economy and volume 3 on Specialized topics
