Evolutionary Archaeology Theory And Application:

Evolutionary Archaeology Michael John O'Brien, 1996 This book assembles articles that show how to apply scientific evolutionism to the study of variation in the archaeological record It delineates the approach to the past in which artefacts are viewed as parts of human phenotypes and thus are subject to selection in the same manner as any somatic feature

Applying Evolutionary Archaeology Michael J. O'Brien, R. Lee Lyman, 2000-03-31 Anthropology and by extension archaeology has had a long standing interest in evolution in one or several of its various guises Pick up any lengthy treatise on humankind written in the last quarter of the nineteenth century and the chances are good that the word evolution will appear somewhere in the text If for some reason the word itself is absent the odds are excellent that at least the concept of change over time will have a central role in the discussion After one of the preeminent and often vilified social scientists of the nineteenth century Herbert Spencer popularized the term in the 1850s evolution became more or less a household word usually being used synonymously with change albeit change over extended periods of time Later through the writings of Edward Burnett Tylor Lewis Henry Morgan and others the notion of evolution as it applies to stages of social and political development assumed a prominent position in anthropological discussions To those with only a passing knowledge of American anthropology it often appears that evolutionism in the early twentieth century went into a decline at the hands of Franz Boas and those of similar outlook often termed particularists However it was not evolutionism that was under attack but rather comparativism an approach that used the ethnographic present as a key to understanding how and why past peoples lived the way they did Boas 1896 **Applying Evolutionary Archaeology** Michael J. Anna Marie Prentiss, 2019-06-03 Evolutionary Research in Archaeology seeks to provide a comprehensive overview of

contemporary evolutionary research in archaeology The book will provide a single source for introduction and overview of basic and advanced evolutionary concepts and research programs in archaeology Content will be organized around four areas of critical research including microevolutionary and macroevolutionary process human ecology studies evolutionary ecology demography and niche construction and evolutionary cognitive archaeology Authors of individual chapters will address theoretical foundations history of research contemporary contributions and debates and implications for the future for their respective topics As appropriate authors present or discuss short empirical case studies to illustrate key arguments

Evolutionary and Interpretive Archaeologies Ethan Cochrane, Andrew Gardner, 2016-09-16 This collection of original articles compares various key archaeological topics agency violence social groups diffusion from evolutionary and interpretive perspectives These two strands represent the major current theoretical poles in the discipline By comparing and contrasting the insights they provide into major archaeological themes this volume demonstrates the importance of theoretical frameworks in archaeological interpretations Chapter authors discuss relevant Darwinian or interpretive theory with short archaeological and anthropological case studies to illustrate the substantive conclusions produced The book will advance debate and contribute to a better understanding of the goals and research strategies that comprise these distinct research traditions

Evolutionary Archaeology Patrice A. Teltser, 2022-05-10 What is the role of neo Darwinian evolution in explaining variation in prehistoric behavior Evolutionary Archaeology a collection of nine papers from a variety of contributors is the first book length treatment of the evolutionists position All archaeologists and especially those with a specific interest in method and theory will find much here to challenge traditional theory solidify the evolutionists position and stir further debate Evolutionary archaeologists argue that Darwinian natural selection acts on human behavior resulting in the persistence of alternative human behaviors and the material products of those behaviors The contributors address the methodological requirements of evolutionary theory as it may apply to the nature of archaeological data Several contributors evaluate the methodological implications of basic evolutionary principles including the structure of explanations the units of evolution and analysis and the measurement of information transmission Others explore the role of specific analytic approaches such as seriation raw material sourcing and comparative and engineering analyses Still others confront the issue of reformulating archaeological problems from the point of view of evolutionary theory By focusing on the methodological requirements of evolutionary theory these essays go far in meeting the challenge of building new archaeological method The work contributes to a better understanding of cultural evolution and builds toward a new logical framework to explain variation in the archaeological record

Companion to Social Archaeology Lynn Meskell, Robert W. Preucel, 2008-04-15 The Companion to Social Archaeology is the first scholarly work to explore the encounter of social theory and archaeology over the past two decades Grouped into four sections Knowledges Identities Places and Politics each of which is prefaced with a review essay that contextualizes the history and developments in social archaeology and related fields Draws together

newer trends that are challenging established ways of understanding the past Includes contributions by leading scholars who instigated major theoretical trends James A. Ford and the Growth of Americanist Archaeology Michael John O'Brien, R. Lee Lyman, 1998 Tells the story of Ford's role in the development of culture history the dominant paradigm in archaeology from 1914 through 1960 Provides a glimpse of how archaeologists began using a variety of methods to attain spatial and temporal control over an exceedingly diverse and complex archaeological record Annotation copyrighted by Book News Inc Portland OR *Cultural Transmission and Material Culture* Miriam T. Stark, Brenda J. Bowser, Lee Horne, 2008-11-13 How and why people develop maintain and change cultural boundaries through time are central issues in the social and behavioral sciences in general and anthropological archaeology in particular What factors influence people to imitate or deviate from the behaviors of other group members How are social group boundaries produced perpetuated and altered by the cumulative outcome of these decisions Answering these questions is fundamental to understanding cultural persistence and change The chapters included in this stimulating multifaceted book address these questions Working in several subdisciplines contributors report on research in the areas of cultural boundaries cultural transmission and the socially organized nature of learning Boundaries are found not only within and between the societies in these studies but also within and between the communities of scholars who study them To break down these boundaries this volume includes scholars who use multiple theoretical perspectives including practice theory and evolutionary traditions which are sometimes complementary and occasionally clashing Geographic coverage ranges from the indigenous Americas to Africa the Near East and South Asia and the time frame extends from the prehistoric or precontact to colonial periods and up to the ethnographic present Contributors include leading scholars from the United States Canada the United Kingdom and Europe Together they employ archaeological ethnographic ethnoarchaeological experimental and simulation data to link micro scale processes of cultural transmission to macro scale processes of social group boundary formation continuity and change *Power and Identity in Archaeological Theory and Practice* Eleanor Harrison-Buck, 2012-04-15 A new and broader approach to understanding power and identity in the Mesoamerican archaeological record Archaeology Mark Q Sutton, 2015-07-17 Illuminating the world of archaeology Archaeology conveys the excitement of archaeological discovery and explains how archaeologists think as they scientifically find analyze and interpret evidence The main objective of this text is to provide an introduction to the broad and fascinating world of archaeology from the scientific perspective Discussions on the theoretical aspects of archaeology as well as the practical applications of what is learned about the past have been updated and expanded upon in this fourth edition Learning Goals Upon completing this book readers will be able to Discuss the theoretical aspects of archaeology Apply what has been learned about the past Identify the various perspectives archaeologists have **Archaeological Theory** Matthew Johnson, 2019-03-22 A lively and accessible introduction to themes and debates in archaeological theory for students of all levels Archaeological Theory is a relatable accessible reader friendly first step into the world of theory for archaeology

Pottery Economics in Mesoamerica Christopher A. Pool, George J. Bey, 2022-08-23 Pottery is one of the most important classes of artifacts available to archaeologists and anthropologists Every year volumes of data are generated detailing ceramic production distribution and consumption How these data can be interpreted in relation to the social and cultural framework of prehistoric societies in Mesoamerica is the subject of this book Nine chapters written by some of the most well known and respected scholars in the field offer readers an in depth look at key advances from the past fifteen years These scholars examine ethnoarchaeological studies and the Preclassic Formative Classic and Postclassic periods and cover geographic areas from eastern to central Mesoamerica In a series of case studies contributors address a range of new and developing theories and methods for inferring the technological organizational and social dimensions of pottery economics and draw on a range of sociopolitical examples Specific topics include the impacts and costs of innovations the role of the producer in technological choices the outcomes when errors in vessel formation are tolerated or rectified the often undocumented multiple lives and uses of ceramic pieces and the difficulties associated with locating and documenting ceramic production areas in tropical lowlands A compelling collection that clearly integrates and synthesizes a wide array of data this book is the definitive text on pottery economics in Mesoamerica and an important

contribution to the fields of anthropology archaeology ancient history and the economics of pre industrial societies

Artifacts and Ideas Bruce G. Trigger, In this title Bruce G Trigger challenges certain modern approaches to the history and method of archaeology while remaining committed to understanding the past from a social science perspective

Social Theory in Archaeology Michael B. Schiffer, 2000 Since the debut of the New Archaeology in the 1960s approaches to the science of interpreting the material past have proliferated Seeking to find common ground in an increasingly fractious and polarized discipline a group of archaeological theorists representing various schools of thought gathered in a roundtable during the fall of 1997 As organizer Michael Schiffer sought to build bridges that might begin to span the conceptual chasms that have formed in archaeology during the past few decades Many participants in the roundtable accepted the challenge of building bridges but some rejected the premise that bridge building is desirable or

feasible Even so every chapter in the resulting volume contributes something provocative or significant to the enterprise of constructing social theory in archaeology and setting the agenda for future social theoretic research With contributions from every major school of thought whether informed by evolutionary theory feminism chaos theory behavioralism or post processualism this volume serves as both handbook to an array of theoretical approaches and as a useful look at each school's response to criticism

Archaeological Method and Theory Linda Ellis, 2003-12-16 This Encyclopedia brings together the most recent scientific information on a collection of subjects that are too often and inconveniently treated in separate publications It provides a survey of archaeological method and theory as well as the application of physical and biological sciences in archaeological research Every aspect of archaeological work is represented from the discovery process to the ultimate disposition of materials Thus the reader will find entries on subject matter covering disciplinary theory legislation affecting the work of archaeologists pre excavation surveying excavation methodology on site conservation techniques post excavation analysis The rapid evolution of analytical technology is often superficially treated or not covered at all in textbooks or other commonly available sources Here the latest refinements in techniques such as radiometric dating stable isotopic analysis and the PCR technique of DNA analysis are presented clearly and authoritatively The discussion of these techniques is amplified by including results of the work of professionals conducting interdisciplinary research and by covering the methodological enhancements provided by the physical and natural sciences Cultural property legislation regardless of its country of origin has affected how archaeologists conduct their work This encyclopedia covers all major U S legislation developed for the protection of cultural property including the recent Native American Graves Protection and Repatriation Act and offers a substantial article on worldwide legislation concerning the reburial of human remains and its effects on the present and future practice of archaeology Without some sort of conservation program at the point of excavation valuable materials may be inadvertently contaminated or destroyed Many simple and low cost techniques to promote both sample integrity and long term preservation for major classes of materials are described in this volume Traditional treatments of method and theory usually focus on prehistoric periods and are limited in their geographic range This volume includes discussions based on various historical periods on different continents as reflected in entries such as Historical Archaeology Industrial Archaeology Medieval Archaeology and Classical Archaeology

Oxford Handbook of Cultural Evolution Jamshid Tehrani, Rachel L. Kendal, Jeremy Kendal, 2025-07-16 This handbook offers a comprehensive overview of the interdisciplinary field of Cultural Evolution which has in recent years matured into an increasingly diverse and wide reaching but intellectually coherent research programme The book showcases the disciplinary spectrum of research into Cultural Evolution from primatology and medieval literature to gene culture co evolution computer science anthropology archaeology and experimental psychology The handbook consists of review essays contributed by leading experts in their areas structured into ten sections covering key approaches and debates major themes and real world

applications Taken together the essays offer an exceptionally broad and forward looking perspective on the field for researchers across the cognitive and evolutionary social sciences including those working in fields adjacent to Cultural Evolution such as Behavioural Ecology Evolutionary Psychology and Digital Humanities The handbook also provides a unique educational resource for students and teachers seeking to integrate Cultural Evolution into undergraduate and postgraduate curricula as well as highlighting some of the potential applications of Cultural Evolution in fields such as education public health and environmental policy

Evolution and the Human Mind Peter Carruthers, Andrew Chamberlain, 2000-11-02
This volume of essays offers an interdisciplinary examination of the evolution of the human mind

Paradigm Found Kristian Kristiansen, Ladislav Šmejda, Jan Turek, 2015-01-21
Paradigm Found brings together papers by renowned researchers from across Europe Asia and America to discuss a selection of pressing issues in current archaeological theory and method The book also reviews the effects and potential of various theoretical stances in the context of prehistoric archaeology The 23 papers provide a discussion of the issues currently re appearing in the focal point of theoretical debates in archaeology such as the role of the discipline in the present day society problems of interpretation in archaeology approaches to the study of social evolution as well as current insights into issues in classification and construction of typologies Taking a fresh and often provocative look at the challenges contemporary archaeology is facing the contributors evaluate the effects of past developments and discuss the impact they are likely to have on future directions in archaeology as an internationally connected discipline In its final part the volume reflects on current thinking on prehistory using case studies from a number of European regions and the Mediterranean from the Neolithic to the Roman Period The volume represents a tribute to the lifetime achievements of Professor Ev en Neustupn a distinguished Czech archaeologist who contributed to the advancement of prehistoric studies in Europe and to archaeological theory and method in particular
