Exploring Christian Ethics

Craig Hovey, 2018-07-18 A fresh engaging and thoroughly biblical account of Christian ethics for the twenty first century Studying Christian ethics tends to involve talking about what we should or more often shouldn't do The aim of this book however is to explore Christian ethics within a wider more positive framework one that encourages a joyful way of living that flows naturally out of the abundant goodness of God's life and character as revealed in Christ **The Digital Dystopias of Black Mirror and Electric Dreams** Steven Keslowitz, 2020-01-07 This critical examination of two dystopian television series Black Mirror and Electric Dreams focuses on pop culture depictions of technology and its impact on human existence Representations of a wide range of modern and futuristic technologies are explored from early portrayals of artificial intelligence Rossum's Universal Robots 1921 to digital consciousness transference as envisioned in Black Mirror's San Junipero These representations reflect societal anxieties about unfettered technological development and how a world infused with invasive artificial intelligence might redefine life and death power and control The impact of social media platforms is considered in the contexts of modern day communication and political manipulation *Digital Media Usage Across the Life Course* Paul G. Nixon, Rajash Rawal, Andreas Funk, 2016-06-23 New York Times columnist Thomas Friedman declared the modern age in which we live as the age of distraction in 2006 The basis of his argument was that technology has changed the ways in which our minds function and our capacity to dedicate ourselves to any particular task Others assert that our attention spans and ability to learn have been changed and that the use of media devices has become essential to many people's daily lives and indeed the impulse to use technology is harder to resist than unwanted urges for eating alcohol or sex This book seeks to portray the see-saw like relationship that we have with technology and how that relationship impacts upon our lived lives Drawing on a range of theoretical perspectives that cross traditional subject boundaries we examine the ways in which we both react to and are to an extent shaped by the technologies we interact with and how we construct the relationships with others that we facilitate via the use of Information Communication Technologies ICTs be it as discreet online only relationships or the blending of ICTs enabled communication with real life co-present interactions **Musah Daghl Girl** Virginia Matosian Apelian, 2011
