Excalibur Briefing:

The Excalibur Briefing Thomas E. Bearden,1980 **Excalibur Briefing** Thomas E. Bearden,1988 **Havana Syndrome** Armin Krishnan,2025-09-04 Havana Syndrome is most likely caused by unknown types of directed energy weapons either of the acoustic or electromagnetic variety The technology for such weapons has been under development since at least the 1960s The first covert attacks on U S diplomats may go back to that time when the phenomenon was called the Moscow Signal Havana Syndrome A Threat to National Security covers the history of anti personnel directed energy weapons DEW from the Soviet psychotronic weapons that were rumored to exist since the 1970s to the nonlethal weapons developed in the West in the 1980s onward The book examines the publicly known details of Havana Syndrome and provides some analysis of the U S government investigations into Havana Syndrome with respect to what has been declassified The most likely perpetrators are the Russian or Chinese governments as some incidents seem to be related to their strategic interests and as both would have the technology to carry out such sophisticated attacks Havana Syndrome establishes a connection between the Anomalous Health Incidents and what NATO analysts have termed cognitive warfare to speculate about the true purpose of these mysterious attacks **Excalibur Briefing** Thomas E. Bearden,1988 **Transcending the Speed of Light** Marc Seifer,2008-08-13 A study of the new scientific understanding of consciousness and the mind as a fifth dimension of reality Introduces the existence of a fifth dimension one of mind an inner or hyperspace where time is transcended Shows how the barrier of the speed of light is actually a gateway demarking the fifth dimension Since the introduction of Descartes dualism in the seventeenth century the mind and the physical world have been viewed as disconnected entities Yet qualities of mind such as awareness purposeful action organization design and even decision making are present within the structure of matter and within the dimensions of space and time The space time continuum of scientists generally ignores the realm of the mind though phenomena such as imaginary numbers used by Einstein to combine space with time are concepts that only exist in the mind Marc Seifer contends that the inadequacy of four dimensional models to account for our experience of mental phenomena points to the consciousness of the mind as a higher organizing principle a fifth dimension where thoughts are as real and quantifiable as our familiar physical world He shows that because thought enables us to move backward and forward through time reflecting on the past and making plans for the future this fifth dimension of mind breaks the laws of relativity thereby transcending the speed of light His extensive study of this fifth dimension ranges from relativity and ether theory to precognition telepathy and synchronicity all from the perspective of the conscious universe **Embodied Imaginations** Chidambaram Ramesh,2023-06-05 The science behind the writers experience of characters developing their own will and taking objective forms Many writers have the experience that their characters have evolved their own personalities They start to tell their own stories and sometimes they could even rebel against the author s ideas for them and change the course of the whole plot That is not all though Sometimes literary

characters assume objective appearances which are visible not just to the creators but also to others and manifesting in the real world These experiences raise several interesting philosophical and scientific questions Have the writers unwittingly created quasi conscious entities by the power of their minds Can thoughts manifest as something tangible that can be seen heard or even touched How genuine are the contents of the mind Embodied Imaginations explores these questions highlighting the results of an investigation on this fascinating topic stemming from personal anecdotes of many writers Providing scientific evidence for the existences of these mental constructs the goal is to collect robust and reliable building blocks that may help to deconstruct perceptions and provide answers to this phenomenon The book attempts to give modern science a place where spiritual philosophical and mystical threads can be interwoven Efforts have been made to corroborate theoretical claims with experimental evidence contributing to research in cognitive psychology to determine the role of imagination in creating external reality This book will introduce you to the mysterious and profound part of creative writing that you never knew existed before Excalibur's Quest Dietmar Arthur Wehr, 2018-04-30 In Scimitar's Glory the alien Tong won the Battle for Earth and took control of the orbital space around the planet Humanity is now at their mercy but not all Space Force warships have been defeated Wolfe Koenig's light cruiser Excalibur is on a mission to acquire technology that just might enable the ragged remnants of the Fleet to snatch victory from the jaws of defeat if he can find an alien race with that technology if he can convince them to trade for it and if the technology can be exploited fast enough Excalibur's Quest is the story of that mission and the challenges both alien and human that Koenig faces This is the second book in the action packed military SF Swordships Odyssey series Unseen Forces: A Guide for the Truly Attentive J.
