Royal Excavations at Helwan 1945 - 1947 Zaky Youssef Sa'd, 1951 **Securing Eternity** Reg Clark, 2019-04-30 The ancient Egyptian tomb evolved rapidly over a period of about 2 500 years from a simple backfilled pit to an enormous stone pyramid with complex security arrangements Much of this development was arguably driven by the ever present threat of tomb robbery which compelled tomb builders to introduce special architectural measures to prevent it However until now most scholarly Egyptological discussions of tomb security have tended to be brief and usually included only as part of a larger work the topic instead being the subject of lurid speculation and fantasy in novels the popular press and cinema In *Securing Eternity* Reg Clark traces in detail the development of the Egyptian royal and private tombs from the Predynastic Period to the early Fourth Dynasty In doing so he demonstrates that many of the familiar architectural elements of the Egyptian tomb that we take for granted today in fact originated from security features to protect the tomb rather than from monumental or religious considerations Richly illustrated with more than 150 photographs and tomb plans this unique study will be of interest to students specialists and general readers alike

Bard,2005-11-03 This is the first reference work in English ever to present a systematic coverage of the archaeology of this region from the earliest finds of the Palaeolithic period through to the fourth century AD Egypt in the Eastern Mediterranean During the Old Kingdom Karin Sowada,2009 This study presents a revised view of Egyptian foreign relations in the eastern Mediterranean during the Old Kingdom 3rd 6th Dynasties based on an extensive analysis of old and new archaeological data and its relationship to the well known textual sources The material demonstrates that while Egypt s most important relationships were with Byblos and the Lebanese coast generally it was an active participant in the geo political and economic affairs of the Levant throughout much of the third millennium BCE The archaeological data shows that the foundation of these relationships was established at the beginning of the Early Dynastic Period and essentially continued until the end of the 6th Dynasty with ebbs flows and changes of geographical and political emphasis It is argued that despite the paucity of textual data the 4th Dynasty represents the apogee of Egypt s engagement in the region a time when the centralised state was at the height of its power and control of human and economic capital More broadly this study shows that Egyptian interaction in the eastern Mediterranean fits the pattern of state to state contact between ruling elites which was underpinned by official expeditions engaged in gift and commodity exchange diplomatic endeavours and military incursions Egypt's Legacy Michael Rice,2004-03 In Egypt s Legacy Michael Rice explains the majesty and enduring appeal of Egyptian Civilization He draws on Jungian psychology to show why Egypt has been so important in the history of the West
