Plates Pinhas Delougaz, Helene J. Kantor, 1996 **Before Writing, Vol. I** Denise Schmandt-Besserat, 1992 Before Writing gives a new perspective on the evolution of communication It points out that when writing began in Mesopotamia it was not as previously thought a sudden and spontaneous invention Instead it was the outgrowth of many thousands of years worth of experience at manipulating symbols In Volume I From Counting to Cuneiform Denise Schmandt Besserat describes how in about 8000 B C coinciding with the rise of agriculture a system of counters or tokens appeared in the Near East These tokens small geometrically shaped objects made of clay represented various units of goods and were used to count and account for them The token system was a breakthrough in data processing and communication that ultimately led to the invention of writing about 3100 B C Through a study of archaeological and epigraphic evidence Schmandt Besserat traces how the Sumerian cuneiform script the first writing system emerged from a counting device In Volume II A Catalog of Near Eastern Tokens Schmandt Besserat presents the primary data on which she bases her theories These data consist of several thousand tokens catalogued by country archaeological site and token types and subtypes The information also includes the chronology stratigraphy museum ownership accession or field number references to previous publications material and size of the artifacts Line drawings and photographs illustrate the various token types **Settlement and Society** Elizabeth C. Stone, 2007-12-31 This volume of essays dedicated to Robert McCormick Adams reflects both the breadth of his research and the select themes upon which he focused his attention These essays written by his students and disciples focus on issues in Near Eastern archaeology but range as far afield as the Indus Valley and Mesoamerica They are also concentrate on aspects of early complex society but some refer back to the late Neolithic and others forward to Islamic times The key foci of Adams work are reflected in this collection ecology frontiers urbanism trade and technology are all explored Yet in spite of the breadth of the scope of this volume the various intellectual threads pioneered by Adams serve to tie the volume together These include the use of multiple lines of evidence to attack problems the use of a comparative approach including the use of

ethnographic analogy as a means of understanding the development of early states the importance of the continuum of settlement between city dwellers farmers marsh dwellers and pastoralists and an overall appreciation of cultural ecology
