Everyday Train:

Mobility in Daily Life Malene Freudendal-Pedersen, 2016-04-15 Why do we choose specific modes of transport and what are the perceived rationalities for our choice How are different theoretical concepts within mobility research actually perceived and lived in everyday life At this book's core is a conceptual and empirical contribution to critical mobility research It focuses on the tension between freedom and unfreedom articulated through the dichotomy between individuality and community as well as critical perspectives on the multitude of unintended consequences of mobility In a range of everyday life narratives this tension is analyzed through the concept of structural stories In teasing out the ambivalences of late modern everyday life Malene Freudendal Pedersen exposes how mobility both generates and helps to overcome and live with these ambivalences

Train Lengths United States. Congress. House. Committee on Interstate and Foreign Commerce, 1938 *Every-day Life on the Railroad* William John Gordon, 1898 [Engineering War and Peace in Modern Japan, 1868-1964](#) Takashi Nishiyama, 2014-04-15 The role of engineering communities in taking Japan from a defeated war machine into a peacetime technology leader Naval aeronautic and mechanical engineers played a powerful part in the military buildup of Japan in the early and mid twentieth century They belonged to a militaristic regime and embraced the importance of their role in it Takashi Nishiyama examines the impact of war and peace on technological transformation during the twentieth century He is the first to study the paradoxical and transformative power of Japan's defeat in World War II through the lens of engineering Nishiyama asks How did authorities select and prepare young men to be engineers How did Japan develop curricula adequate to the task and from whom did the country borrow Under what conditions What did the engineers think of the planes they built to support Kamikaze suicide missions But his study ultimately concerns the remarkable transition these trained engineers made after total defeat in 1945 How could the engineers of war machines so

quickly turn to peaceful construction projects such as designing the equipment necessary to manufacture consumer products. Most important they developed new high speed rail services including the Shinkansen Bullet Train. What does this change tell us not only about Japan at war and then in peacetime but also about the malleability of engineering cultures? Nishiyama aims to counterbalance prevalent Eurocentric/Americentric views in the history of technology. *Engineering War and Peace in Modern Japan* 1868-1964 sets the historical experience of one country's technological transformation in a larger international framework by studying sources in six different languages: Chinese, English, French, German, Japanese, and Spanish. The result is a fascinating read for those interested in technology, East Asia, and international studies. Nishiyama's work offers lessons to policymakers interested in how a country can recover successfully after defeat. [Fiction and Imagination in Early Cinema](#) Mario Sluġan, 2019-11-28. Shortlisted for the BAFTSS Best Monograph Award 2021. When watching the latest instalment of *Batman*, it is perfectly normal to say that we see Batman fighting Bane or that we see Bruce Wayne making love to Miranda Tate. We would not say that we see Christian Bale dressed up as Batman going through the motions of punching Tom Hardy dressed up as Bane. Nor do we say that we see Christian Bale pretending to be Bruce Wayne making love with Marion Cotillard who is playacting the role Miranda Tate. But if we look at the history of cinema and consider contemporary reviews from the early days of the medium, we see that people thought precisely in this way about early film. They spoke of film as no more than documentary recordings of actors performing on set. In an innovative combination of philosophical aesthetics and new cinema history, Mario Sluġan investigates how our default imaginative engagement with film changed over the first two decades of cinema. It addresses not only the importance of imagination for the understanding of early cinema but also contributes to our understanding of what it means for a representational medium to produce fictions. Specifically, Sluġan argues that cinema provides a better model for understanding fiction than literature.

Unpacking Italy Tony Gates, 2022-11-30. Tony Gates has a love affair with Italy. This book shares the affair with you. He has visited Italy more times than he knows. He brings to this unpacking of Italy the experience of many years' enjoyment of its many cultures, fascination with the events which brought a united Italy into being, deep appreciation of its art and engagement with its people and places. This is not a guidebook. Tony wants to take you to the heartbeat of Italy, a journey which looks carefully at the events and scenes along the way and listens attentively to the pulse beats of the Italian peninsula. The journey reveals that there is really more than one Italy: Greeks, Romans, Etruscans, Umbrians, Normans, Lombards, French, and many others have ensured that where once Latin held pride of linguistic place, numerous dialects remain pointing to the variety that is the Italy which the author shares with you. His hope is that you will find an exciting Italy as you join him on the journey. Tony wishes you *Buon Viaggio*. **Issue 15** Connor Whiteley, 2023-07-07.
