

THE ANCIENT MAYA

Lesson Presentation Everyday life

Farmers

The farmers were the poorest of the Maya people.

Corn was a very important crop. It was linked to the creator god. They also grew beans and squash.

They were very successful. They grew more crops than they needed. They studied the stars and made calendars to work out when to plant their crops.

Fashion

Wealthy Maya wore brightly coloured clothes, feathered headdresses, and jewellery made from jade, or gold.

The ordinary Maya wore simple clothes and jewellery made from wood or bone.

Food and drink

Their main food was corn but they cooked it in many ways.

They also ate beans and squash from the farms, and fruits from the forests.

The surrounding rainforest was full of wildlife, so they hunted and ate iguanas, fish, frogs and other creatures.

Ainu of Japan Resisting the Suppression of Languages Susan Samata,2024-12-12 This volume shows that by moving away from code models that foster restrictive perceptions of language as learned words and rules and towards an ecolinguistics capable of integrating with concepts of embodied cognition it is possible to recognise a broad range of connections with a language from which an individual or community has become estranged Using the Ainu of Japan as an example and comparator this book reviews historical and contemporary suppression of languages as a means of or as a bi product of the suppression of their speakers Preservation of the Ainu language which had no written form has been central to official culture promotion programs but the language has steadily declined in use The Ainu experience has much in common with that of communities taken over and suppressed by oppressive forces in other countries and spans rural and urban contexts Susan Samata examines the historical social and ecolinguistic contexts of Ainu with particular emphasis on presentation and perception in daily life She also considers how aspects of ecolinguistic theory may be mapped onto museum practices television and cinema popular literature and the promotion of tourism These are then compared to the sociolinguistic situations of a selection of other languages and cultures in China North America and Scandinavia By highlighting points of similarity and dissimilarity Samata demonstrates the factors that operate in the suppression of people and their languages and suggests ways in which the perspective described may support resistance to suppression and assimilation not least in language teaching areas

Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures Helaine Selin,2013-11-11 The Encyclopaedia fills a gap in both the history of science and in cultural studies Reference works on other cultures tend either to omit science completely or pay little attention to it and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures science Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas The Western academic divisions of science technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today There is nothing that crosses disciplinary and geographic boundaries dealing with both scientific and philosophical issues to the extent that this work does

Mayalogue Victor Montejo,2021-10-01 In Mayalogue Native Mayan scholar Victor Montejo provides an alternative

reading and interpretation of cultures challenging Western ethnocentric approaches that have marginalized Native knowledge and worldviews in the past He proposes instead a methodology for studying culture as a unified whole a radical departure from the compartmentalized sections of knowledge recognized by Western scientific tradition Offering a strong critique of traditional anthropological studies with its terms and categories that have denigrated Indigenous cultures throughout the centuries Montejos postcolonial work aims to dismantle the colonialist construction of Indigenous cultures giving way to a Native approach that balances insider and outsider descriptions of a particular culture Developed from an Indigenous Maya perspective Mayalogue is a contribution to the dialogue between Indigenous and non Indigenous scholars students and general audiences in the social sciences and humanities and will be an essential text in decolonizing the minds of those who engage in the study of cultures anywhere in the world in the twenty first century

Responsibility and Language Practices in Place Laura Siragusa, Jenanne K. Ferguson, 2020-08-28 This volume includes chapters by junior and senior scholars hailing from Europe Asia North America and Oceania all of whom sought to understand the social and cultural implications surrounding how people take responsibility for the ways they speak or write in relation to a place whether it is one they have long resided in recently moved to or left a long time ago The contributors to the volume investigate responsibility in and through language practices as inspired by the roots of the English word itself the ability to respond or mount a response to a situation at hand It is thus a responsive kind of responsibility one that focuses not only on demonstrating responsibility for language but highlighting the various ways we respond to situations discursively and metalinguistically This sort of responsibility is both part of individual and collectively negotiated concerns that shift as people contend with processes related to globalization

Ancient Households of the Americas John G. Douglas, Nancy Douglas, 2012-04-15 In *Ancient Households of the Americas* archaeologists investigate the fundamental role of household production in ancient colonial and contemporary households Several different cultures Iroquois Coosa Anasazi Hohokam San Agust n Wankarani Formative Gulf Coast Mexico and Formative Classic Colonial and contemporary Maya are analyzed through the lens of household archaeology in concrete data driven case studies The text is divided into three sections Section I examines the spatial and social organization and context of household production Section II looks at the role and results of households as primary producers and Section III investigates the role of and interplay among households in their greater political and socioeconomic communities In the past few decades household archaeology has made substantial contributions to our understanding and explanation of the past through the documentation of the household as a social unit whether small or large rural or urban commoner or elite These case studies from a broad swath of the Americas make *Ancient Households of the Americas* extremely valuable for continuing the comparative interdisciplinary study of households
