Evidence and Inference in History and Law William Twining, Iain Hampsher-Monk, 2003 However little that various disciplines in the humanities and social sciences might seem to have in common they share certain interests in methodological problems relating to evidence inference and interpretation By pursuing these shared interests across divergent topics and fields the contributors to this book advance our understanding of how such truth seeking proof finding methods work and of what it means to prove something in a range of contexts Coedited by William Twining one of the world s outstanding evidence scholars and Lain HempsherMonk a leading political theorist the volume considers intriguing questions from different realms Assyriology theatre iconography musicology criminology the history of ideas and colonial history as it reveals how particular concepts lines of questioning and techniques of reasoning and analysis developed in one context can be fruitfully applied in others A Dialogue Between Law and History Baosheng Zhang, Thomas Yunlong Man, Jing Lin, 2020-12-14 This book builds on the success of the First International Conference on Facts and Evidence A Dialogue between Law and Philosophy Shanghai China May 2016 which was co hosted by the Collaborative Innovation Center of Judicial Civilization CICJC and East China Normal University The Second International Conference on Facts and Evidence A Dialogue between Law and History was jointly organized by the CICIC the Institute of Evidence Law and Forensic Science ELFS at China University of Political Science and Law CUPL and Peking University School of Transnational Law STL in Shenzhen China on November 16 17 2019 Historians legal scholars and legal practitioners share the same interest in ascertaining the truth in their respective professional endeavors It is generally recognized that any historical study without truthful narration of historical events is fiction and that any judicial trial without accurate fact finding is a miscarriage of justice In both historical research and the judicial process practitioners are invariably called upon before making any arguments to prove the underlying facts using evidence regardless of how the concept is defined or employed in different academic or practical contexts Thus historians and legal professionals have respectively developed theories and methodological tools to inform and explain the process of gathering evidentiary proof When lawyers and judges reconsider the facts of cases questions of law are actually a subset of questions of fact and thus the legal interpretation process also involves questions of historical fact The book brings together more than twenty leading history and legal scholars from around the world to explore a range of issues concerning the role of facts as evidence in both disciplines As such the book is of enduring value to historians legal scholars and everyone interested in truth seeking **Evidence and Inference in** History and Law William Twining, Iain Hampsher-Monk, 2003 However little that various disciplines in the humanities and social sciences might seem to have in common they share certain interests in methodological problems relating to evidence inference and interpretation By pursuing these shared interests across divergent topics and fields the contributors to this book advance our understanding of how such truth seeking proof finding methods work and of what it means to prove

Evidence, Inference and Enquiry Philip Dawid, William Twining, Mimi Vasilaki, 2011-12-01 Scholars in diverse academic disciplines discuss the ways in which evidence is conceived used and manipulated in their own fields They explore the possibilities for cross disciplinary fertilisation and ask if it is possible or desirable to develop general multidisciplinary criteria and methods for studying and handling evidence Material Evidence Robert Chapman, Alison Wylie, 2014-12-05 How do archaeologists make effective use of physical traces and material culture as repositories of evidence Material Evidence takes a resolutely case based approach to this question exploring instances of exemplary practice key challenges instructive failures and innovative developments in the use of archaeological data as evidence The goal is to bring to the surface the wisdom of practice teasing out norms of archaeological reasoning from evidence Archaeologists make compelling use of an enormously diverse range of material evidence from garbage dumps to monuments from finely crafted artifacts rich with cultural significance to the detritus of everyday life and the inadvertent transformation of landscapes over the long term Each contributor to Material Evidence identifies a particular type of evidence with which they grapple and considers with reference to concrete examples how archaeologists construct evidential claims critically assess them and bring them to bear on pivotal questions about the cultural past Historians cultural anthropologists philosophers and science studies scholars are increasingly interested in working with material things as objects of inquiry and as evidence and they acknowledge on all sides just how challenging this is One of the central messages of the book is that close analysis of archaeological best practice can yield constructive guidelines for practice that have much to offer archaeologists and those in related fields
