

The top half of the cover features a chimpanzee on the left, its mouth wide open in a yawn or call, revealing its teeth and tongue. To the right is a large, detailed image of a human skull, showing the eye sockets, nasal cavity, and teeth. The background of the top half is a blurred natural setting. A red DNA double helix is visible behind the title text.

Evolution And Human Origins An Introduction To Physical Anthropology:

Evolution and Human Origins Bobby Joe Williams, 1979 Explains the various methods of measuring quantity and distance and describes the development of these standards from prehistoric times to the present day **Human Origins**

Thomas W. McKern, Sharon S. McKern, 1969 Evolution Fossils Paleontology Fossil man Heredity Human variation Race__

The Concept of Race in Natural and Social Science E. Nathaniel Gates, 2014-05-01 Explores the concept of race The term race which originally denoted genealogical or class identity has in the comparatively brief span of 300 years taken on an entirely new meaning In the wake of the Enlightenment it came to be applied to social groups This ideological transformation coupled with a dogmatic insistence that the groups so designated were natural and not socially created gave birth to the modern notion of races as genetically distinct entities The results of this view were the encoding of race and racial hierarchies in law literature and culture How racial categories facilitate social control The articles in the series demonstrate that the classification of humans according to selected physical characteristics was an arbitrary decision that was not based on valid scientific method They also examine the impact of colonialism on the propagation of the concept and note that racial categorization is a powerful social force that is often used to promote the interests of dominant social groups Finally the collection surveys how laws based on race have been enacted around the world to deny power to minority groups A multidisciplinary resource This collection of outstanding articles brings multiple perspectives to bear on race theory and draws on a wider range of periodicals than even the largest library usually holds Even if all the articles were available on campus chances are that a student would have to track them down in several libraries and microfilm collections Providing of course that no journals were reserved for graduate students out for binding or simply missing This convenient set saves students substantial time and effort by making available all the key articles in one reliable source Authoritative commentary The series editor has put together a balanced selection of the most significant works accompanied by expert commentary A general introduction gives important background information and outlines fundamental issues current scholarship and scholarly controversies Introductions to individual volumes put the articles in context and draw attention to germinal ideas and major shifts in the field After reading the material even a beginning student will have an excellent grasp of the basics of the subject *The Human Species: An Introduction to Biological Anthropology* John Relethford, 2009-08-28 This text introduces physical anthropology the science of human biological evolution and variation Divided into four parts it addresses the major questions that concern biological anthropologists What are humans Where are our origins How did we evolve and are we still evolving and What does the future hold for the human species with an emphasis on hypothesis testing and the relationship between biology and culture **Studying Human Origins** Raymond Corbey, Wil Roebroeks, 2001 This history of human origin studies covers a wide range of disciplines This important new study analyses a number of key episodes from palaeolithic archaeology palaeoanthropology primatology and evolutionary theory in terms of various ideas on how one

should go about such reconstructions and what if any the uses of such historiographical exercises can be for current research in these disciplines Their carefully argued point is that studying the history of palaeoanthropological thinking about the past can enhance the quality of current research on human origins The main issues in the present volume are the uses of disciplinary history in terms of present day research concerns the relative weight of cultural and other external contexts and continuity and change in theoretical perspectives The book s overall approach is an epistemological one It does not in other words primarily address anthropological data as such but our ways of handling such data in terms of our most fundamental but usually quite implicit theoretical presuppositions **Introduction to Biological Anthropology** Mr. Rohit

Manglik,2023-11-23 Core principles of biological anthropology Covers human evolution genetics and variation providing a foundation for understanding human biological diversity **Introduction to Physical Anthropology** Robert Jurmain,1997

Modern Origins Jean-Jacques Hublin,Shannon McPherron,2012-03-31 Over the last decade Africa has taken a central position in the search for the timing and mechanisms leading to modern human origins and the rich archaeological and human paleontological record of North Africa is critical to this search In this volume we bring together new research into the archaeology human paleontology chronology and environmental context of modern human origins in North Africa The result is a volume that better integrates the North African record into the modern human origins debate and at the same time highlights the research questions that are currently the focus of continued work in the area **Current Catalog** National

Library of Medicine (U.S.),1983 First multi year cumulation covers six years 1965 70 **From Lucy to Language** Donald C. Johanson,Blake Edgar,1996 Now revised and updated this groundbreaking volume by one of the world s foremost paleontologists presents the most complete visual proof ever assembled of the evidence for human evolution displaying in full color all the key fossils and artifacts of human prehistory **National Library of Medicine Current Catalog** National

Library of Medicine (U.S.),1965 **Race and Other Misadventures** Larry T. Reynolds,Leonard Lieberman,1996

American Book Publishing Record ,1995 Introduction to Physical Anthropology Robert Jurmain,Lynn Kilgore,Wenda Trevathan,Russell L Ciochon,Eric Bartelink,2023 *Cenozoic Mammals of Africa* Lars Werdelin,William Joseph Sanders,2010-07-20 This impressively comprehensive volume is a long awaited and worthy successor to the now outdated 1978 classic *Evolution of African Mammals* A must have reference work for everyone interested in mammalian evolution David Pilbeam Harvard University and the Peabody Museum of Archaeology and Ethnology **Sangiran: Man, Culture, and Environment in Pleistocene Times** Truman Simanjuntak,Bagyo Prasetyo,Retno Handini,2001

Vertebrate Palaeontology Michael J. Benton,2014-08-04 Vertebrate palaeontology is a lively field with new discoveries reported every week and not only dinosaurs This new edition reflects the international scope of vertebrate palaeontology with a special focus on exciting new finds from China A key aim is to explain the science Gone are the days of guesswork Young researchers use impressive new numerical and imaging methods to explore the tree of life macroevolution global

change and functional morphology The fourth edition is completely revised The cladistic framework is strengthened and new functional and developmental spreads are added Study aids include key questions research to be done and recommendations of further reading and web sites The book is designed for palaeontology courses in biology and geology departments It is also aimed at enthusiasts who want to experience the flavour of how the research is done The book is strongly phylogenetic and this makes it a source of current data on vertebrate evolution

Handbook of Latin American Studies ,1975 Contains records describing books book chapters articles and conference papers published in the field of Latin American studies Coverage includes relevant books as well as over 800 social science and 550 humanities journals and volumes of conference proceedings Most records include abstracts with evaluations

Interrogating Human Origins Martin Porr,Jacqueline Matthews,2019-12-06 *Interrogating Human Origins* encourages new critical engagements with the study of human origins broadening the range of approaches to bring in postcolonial theories and begin to explore the decolonisation of this complex topic The collection of chapters presented in this volume creates spaces for expansion of critical and unexpected conversations about human origins research Authors from a variety of disciplines and research backgrounds many of whom have strayed beyond their usual disciplinary boundaries to offer their unique perspectives all circle around the big questions of what it means to be and become human Embracing and encouraging diversity is a recognition of the deep complexities of human existence in the past and the present and it is vital to critical scholarship on this topic This book constitutes a starting point for increased interrogation of the important and wide ranging field of research into human origins It will be of interest to scholars across multiple disciplines and particularly to those seeking to understand our ancient past through a more diverse lens

Early Modern Humans at the Moravian Gate Maria Teschler-Nicola,2007-07-28 This beautifully illustrated monograph addresses for the first time the complete assemblage of the Mladec caves finds including the human cranial post cranial teeth and jaw fragments of several individuals as well as faunal remains and archaeological objects Leading scientists present their results obtained with innovative techniques such as DNA analysis 3D morphometry and isotope analysis which are of great importance for further discussions on both human evolution and archaeological issues
