Evolution And The Problem Of Natural Evil

S Baum

Evolution And The Problem Of Natural Evil:

Evolution and the Problem of Natural Evil Michael Anthony Corey, 2000 Is the evolutionary process intelligently designed If so why did the Creator choose such an evil infested means to create the biosphere What is the intrinsic nature of evil itself Is natural evil necessary Is evil compatible with the existence of God Will the world s evils ever be totally redeemed What place does humanity occupy in the cosmic scheme of things Evolution and the Problem of Natural Evil attempts to answer these and other timeless questions by proposing a bold new conceptual synthesis that aggressively marries the tenets of modern developmental psychology to the basic concepts of classical theism The end result of this novel approach is deeply encouraging insofar as it places the problem of evil as well as the general fate of human existence in a much larger and more optimistic context than has traditionally been imagined *Evolution and the Problem of Natural Evil* Michael Anthony Corey, 1996 It is concluded that this type of natural evil is ultimately good in an instrumental sense because it is alleged to be an essential prerequisite for human existence which itself is deemed to be a sufficiently good thing in itself to justify all the prima facie or only apparent evils that were necessary to lead up to it Philosophical Thinking and the Religious Context Brendan Sweetman, 2013-10-24 This new collection covers a wide range of cutting edge and timely questions in contemporary philosophy of religion from a rich variety of backgrounds and perspectives The essays in the volume deal with a range of fascinating topics in the philosophy of religion such as views of God s nature in process philosophy and theology process views compared with traditional views such as that found in St Thomas Aquinas teleology and purpose in human life and in the universe religion and evolution the problem of evil both in human experience and in the natural world and ethical questions concerning the human road to God and the question of human rights in pluralist democratic states The essays in the first section Approaches to God examine the rationality of the approach to the nature of God defended in process philosophy particularly in the work of two pioneering thinkers Charles Hartshorne and A N Whitehead The second section of the book Science Evolution and God turns to the engagement of Christian views regarding the nature of God and creation with modern developments in science and philosophy The last section Philosophy of Religion and Ethics takes up broader more foundational questions Santiago Sia concludes the volume with a sustained reflection on the nature of philosophy and philosophizing a discussion to which he brings many insights and experiences from his own academic career *Themelios, Volume 37, Issue 1* D. A. Carson, 2015-01-27 Themelios is an international evangelical peer reviewed theological journal that expounds and defends the historic Christian faith Themelios is published three times a year online at The Gospel Coalition <http://thegospelcoalition.org/themelios> and in print by Wipf and Stock Its primary audience is theological students and pastors though scholars read it as well Themelios began in 1975 and was operated by RTSF UCCF in the UK and it became a digital journal operated by The Gospel Coalition in 2008 The editorial team draws participants from across the globe as editors essayists and reviewers General Editor D A Carson Trinity Evangelical Divinity School Managing Editor Brian Tabb

The Spirit of Creation Amos Yong, 2011-05-17 Is a pentecostal charismatic worldview defensible in light of contemporary science In *The Spirit of Creation* Amos Yong demonstrates that pentecostal thought does indeed have merit in scientific contexts What's more he argues that pentecostal charismatic views regarding the dynamic presence and activity of the Spirit of God and the pluralistic cosmology of many spirits have something important to add to the broad discussion now taking place at the crossroads of science and religion Interacting with many scientific fields of study including psychology sociology evolutionary science cosmology and more Yong's *Spirit of Creation* demonstrates the significance of pentecostal ideas to the ongoing dialogue between theology and science

Science and Christianity J. B. Stump, 2016-09-08 Science and Christianity is an accessible engaging introduction to topics at the intersection of science and Christian theology A philosophically orientated treatment that introduces the relationship of science to Christianity and explores to what extent the findings of science affect traditional Christian theology Addresses important theological topics in light of contemporary science including divine action the problem of natural evil and eschatology Historically oriented chapters and chapters covering methodological principles for both science and theology provide the reader with a strong foundational understanding of the issues Includes feature boxes highlighting quotations biographies of major scientists and theologians key terms and other helpful information Issues are presented as fairly and objectively as possible with strengths and weaknesses of particular interpretations fully discussed

Malum Ingolf U. Dalferth, 2022-05-31 The incursion of evil has always caused people to turn to the divine to gods or to a god in order to reorientate their life Ingolf U Dalferth studies the complexity of this procedure in three thought processes that deal with the central concepts in the Christian understanding of malum as privation a lack of good as evil doing and as a lack of faith In doing so he provides a detailed discussion of theories of theodicy the argument from freedom and the religious turn to God in which the author explores the traces of the discovery of God's goodness justness and love in connection with the malum experiences in ancient mythology and biblical traditions

The Role of Theology in the History and Philosophy of Science Joshua M. Moritz, 2017-11-13 After a bibliographic introduction highlighting various research trends in science and religion Joshua Moritz explores how the current academic and conceptual landscape of

theology and science has been shaped by the history of science even as theology has informed the philosophical foundations of science The first part assesses the historical interactions of science and the Christian faith looking at the cases of human dissection in the Middle Ages and the Galileo affair in order to challenge the common notion that science and religion have always been at war Part two investigates the nature of the interaction between science and Christian theology by exploring the role that metaphysical presuppositions and theological concepts have played and continue to play within the scientific process *Power, Politics and the Fragmentation of Evangelicalism* Kenneth J. Collins, 2012-08-02 Kenneth J Collins traces the establishment of the evangelical enterprise in American culture and its influences on the political and social values of the American landscape throughout the twentieth century as well as its fragmentation into competing ideological camps

Dysteleology Michael Berhow, 2019-06-25 A common theological critique of intelligent design ID centers on the problem of dysteleology This problem states that because there are clear examples of suboptimal design in biology life is probably not the product of an engineer like designer If it were then one could argue that the designer is less than fully competent ID critic Francisco Ayala expresses this critique in the following question If functional design manifests an Intelligent Designer why should not deficiencies indicate that the Designer is less than omniscient or less than omnipotent This book provides a philosophical analysis of two approaches to answering this question one offered by Ayala and the other offered by William Dembski a leading ID theorist *Natural and Cosmic Theodicy* Jongseock James Shin, 2022-10-21 This book presents a third way to envision the Creatorship of the Triune God who is both compassionate and eschatologically redemptive in providential presence rather than biasedly gravitating toward the openness of a self limiting God or God s all determining sovereignty Not only is God in with and under creation God s kenotic presence invites creatures to participate in the self giving love of God through both general and special divine action in a top down through bottom up mode Creatio continua is God s own journey of fulfilling the eschatological promise for creation This redemptive presence of God in creation is a Trinitarian co protesting against the power of death sin and evil considering the cosmic dimensions of the eschatological hope promised in the resurrection of Jesus The new creation is the ultimate fulfillment of creaturely freedom and contingency divinely granted in creatio ex nihilo In arguing this Shin engages in a comparative and critical study of natural and cosmic theodicy advanced by Catherine Keller Arthur Peacocke Wolfhart Pannenberg and Robert Russell *Maximus the Confessor and Evolutionary Biology* Andrew P. Jackson, 2024-11-04 This book brings Maximus the Confessor s logoi doctrine into dialogue with modern day evolutionary biology It explores the extent to which the logoi as described by Maximus exhibit features that are concordant with evolution before going on to consider more discordant aspects that cannot be ignored The author addresses the curious resonance between the logoi and evolution in a systematic way through a close reading of primary textual material allied with a deep understanding of both the classical Darwinian and extended evolutionary syntheses The study joins with other Maximian interpreters in attesting to the incarnational and theophanic nature of the logoi but seeks to

extend this distinctively Eastern Christo cosmology into the problematic territory of biological evolution a territory historically dominated by Western scholarship The book will be of interest to scholars of religion and science as well as Patristics and the Eastern Orthodox theological traditions *T&T Clark Handbook of Christian Theology and Climate Change* Hilda P. Koster, Ernst M. Conradie, 2019-12-12 The T these essays are critically engaged by respondents situated in other geographic regions minority communities non Christian traditions or non theological disciplines Structured in seven main parts the handbook explores 1 the need for collaboration with disciplines outside of Christian theology to address climate change 2 the need to find common moral ground for such collaboration 3 the difficulties posed by collaborating with other Christian traditions from within 4 the questions that emerge from such collaboration for understanding the story of God s work and 5 God s identity and character 6 the implications of such collaboration for ecclesial praxis and 7 concluding reflections examining whether this volume does justice to issues of race gender class other animals religious diversity geographical divides and carbon mitigation This rich ecumenical cross cultural conversation provides a comprehensive and in depth engagement with the theological and moral challenges raised by anthropogenic climate change *My Tsunami Journey* Mark Dowd, 2022-04-11 How can we reconcile belief in a loving God with the suffering of innocent human beings and earthly creatures in the natural world This question as old as the Old Testament s book of Job has been mainly grappled with over the centuries by learned theologians and philosophers But in this groundbreaking work the author is sent on a journey across thousands of miles to speak to Hindus Muslims Buddhists and Christians like himself following the 2004 colossal tsunami waves that killed more than 230 000 people In the wake of such carnage why do some people lose their faith while others emerge with it intact and strengthened Are these events in the natural world really linked to divine justice as punishment for sin And if not what are the best possible explanations for why an intelligent and caring deity would fashion a world in which babies can die of leukemia and the elderly fall victim to deadly viruses such as COVID 19 This account will offer profound food for thought for troubled believers and curious agnostics alike *Evolutionary History in Theological Perspective* Mario Anthony Russo, 2024-06-10 Evolutionary History in Theological Perspective Exploring the Scientific Story of the Cosmos develops a new theological interpretation of evolutionary history Exploring both secular and theological interpretations of evolutionary history this new interpretation hinges on the similarities between individual redemption and the eschatological story of cosmic redemption as mediated by the Holy Spirit throughout evolutionary history This new lens is then applied to relevant questions raised by the evolutionary process especially suffering and helps overcome the current shortcomings of contemporary interpretations of evolutionary history **The Problem of Animal Pain** Victoria Campbell, 2024-01-31 In this Element atheists cite animal pain as compelling evidence against the existence of the loving God portrayed in the Judeo Christian Bible William Rowe Paul Draper Richard Dawkins and others claim widespread unnecessary suffering exists in nature and challenge theism with the Evidential Problem of Natural Evil This Element engages the

scientific literature in order to evaluate the validity of those claims and offers a theodicy of God's providential care for animals through natural pain mitigating processes

Reading Richard Dawkins Gary Keogh, 2014-02-01 Theological reactions to the rise of the new atheist movement have largely been critically hostile or defensively deployed apologetics to shore up the faith against attack Gary Keogh contends that focusing on scholarly material that is inherently agreeable to theology will not suffice in the context of modern academia Theology needs to test its boundaries Engaging Richard Dawkins illustrates how dialogue with antithetical viewpoints may offer new perspectives on classical theological problems Keogh demonstrates how a dialogical paradigm may take shape one which is up to the task of facing its critics in the context of modern academia

Encountering Life in the Universe Chris Impey, Anna H. Spitz, William Stoeger, 2013-10-17 Encountering Life in the Universe examines the intersection of scientific research and society to determine the philosophy and ethics of relating to the Earth and beyond

The Intelligent Design Debate and the Temptation of Scientism Erkki Vesa Rope Kojonen, 2016-04-28 The controversy over Intelligent Design ID has now continued for over two decades with no signs of ending For its defenders ID is revolutionary new science and its opposition is merely ideological For its critics ID is both bad science and bad theology But the polemical nature of the debate makes it difficult to understand the nature of the arguments on all sides A balanced and deep analysis of a controversial debate this volume argues that beliefs about the purposiveness or non purposiveness of nature should not be based merely on science Rather the philosophical and theological nature of such questions should be openly acknowledged

The Blackwell Companion to Modern Theology Gareth Jones, 2008-04-15 In this major reference work a team of the world's leading theologians provides a powerful overview of modern theology Covers theology's relation to other disciplines the history of theology major themes key figures and contemporary issues Can be used as the basis for an introductory course or as an essential reference source
