Cultural Evolution Alex Mesoudi, 2011-07-30 Charles Darwin changed the course of scientific thinking by showing how evolution accounts for the stunning diversity and biological complexity of life on earth Recently there has also been increased interest in the social sciences in how Darwinian theory can explain human culture Covering a wide range of topics including fads public policy the spread of religion and herd behavior in markets Alex Mesoudi shows that human culture is itself an evolutionary process that exhibits the key Darwinian

mechanisms of variation competition and inheritance This cross disciplinary volume focuses on the ways cultural phenomena can be studied scientifically from theoretical modeling to lab experiments archaeological fieldwork to ethnographic studies and shows how apparently disparate methods can complement one another to the mutual benefit of the various social science disciplines Along the way the book reveals how new insights arise from looking at culture from an evolutionary angle Cultural Evolution provides a thought provoking argument that Darwinian evolutionary theory can both unify different branches of inquiry and enhance understanding of human behavior

Stone, 2013-07-16 From simple cases such as hook and latch attachments found in Velcro to articulated wing flying vehicles biology often has been used to inspire many creative design ideas The scientific challenge now is to transform the paradigm into a repeatable and scalable methodology Biologically Inspired Design explores computational techniques and tools that can help integrate the method into design practice With an inspiring foreword from Janine Benyus Biologically Inspired Design contains a dozen chapters written by some of the leading scholars in the transdisciplinary field of bioinspired design such as Frank Fish Julian Vincent and Jeannette Yen from biology and Amarek Chakrabarti Satyandra Gupta and Li Shu from engineering Based in part on discussions at two workshops sponsored by the United States National Science Foundation this volume introduces and develops several methods and tools for bioinspired design including Information processing theories Natural language techniques Knowledge based tools and Functional approaches and Pedagogical techniques By exploring these fundamental theories techniques and tools for supporting biologically inspired design this volume provides a comprehensive resource for design practitioners wishing to explore the paradigm an invaluable guide to design educators interested in teaching the method and a preliminary reading for design researchers wanting to investigate bioinspired design **Evolution Unredacted** Anab Whitehouse, 2018-11-06 What do you know about evolutionary theory Or maybe there are two questions here 1 What do you think you know 2 What do you actually know Quite irrespective of whether individuals believe in evolution or they are opposed to it most people probably would have to acknowledge that they know almost nothing at all about the actual nuts and bolts of the technical issues at the heart of evolutionary theory Their

beliefs concerning this matter whatever the character of those beliefs might be is for the most part likely to be framed by and filtered through two themes a a largely unexamined acceptance of the opinion of others b the extent to which evolutionary theory makes carrying on with the rest of their philosophical or religious perspective either easier or more difficult to continue to do Seeking the truth should neither be a function of blindly following the beliefs of other individuals nor should that process be a function of what one finds easy or difficult to do Therefore irrespective of what your conceptual orientation concerning evolution might be this book was written to challenge readers to critically reflect on various problems so that individuals might be able to work their way toward gaining greater insight into a variety of issues that swirl about the topic of evolution Finally Evolution Unredacted offers a critical analysis of several landmark legal decisions involving the dispute between proponents of evolution and advocates for creationism namely McLean v Arkansas Board of Education and Kitzmiller et al v Dover Area School District et al More specifically the final chapter of Evolution Unredacted engages the evolution v creationism debate through the filters of the Establishment Clause of the First Amendment and Article IV Section 4 of the Constitution The results of the foregoing analysis are likely to surprise the reader Moreover those results tend to entail a variety of implications for the process of education
