**Astrobiology, History, and Society** Douglas A. Vakoch,2013-05-23 This book addresses important current and historical topics in astrobiology and the search for life beyond Earth including the search for extraterrestrial intelligence SETI The first section covers the plurality of worlds debate from antiquity through the nineteenth century while section two covers the extraterrestrial life debate from the twentieth century to the present The final section examines the societal impact of discovering life beyond Earth including both cultural and religious dimensions Throughout the book authors draw links between their own chapters and those of other contributors emphasizing the interconnections between the various strands of the history and societal impact of the search for extraterrestrial life The chapters are all written by internationally recognized experts and are carefully edited by Douglas Vakoch professor of clinical psychology at the California Institute of Integral Studies and Director of Interstellar Message Composition at the SETI Institute This interdisciplinary book will benefit everybody trying to understand the meaning of astrobiology and SETI for our human society      Science and Society ,1978      **The Theory of Evolution** Oleg Bazaluk,2016-02-08 This book presents a historical philosophical analysis of the concept of evolution considering the degree of development of the theories of evolution in cosmology biology neurobiology and philosophy Evolution is defined here as the continuous and nonlinear complication of the structure of matter and types of interaction and environments The book analyses existing approaches to the research of this concept in modern science and philosophy looking at the ways in which its factors and causes have previously been explored Unifying such interdisciplinary approaches to evolution in cosmology biology neurobiology and philosophy the book then discusses its own model Evolving

Matter which considers not only the regularity of transition of a space vacuum in neural ensembles but also the universe as a complex non uniform organisation In addition the book contains systematised interdisciplinary information on the theory of evolution

**The Palgrave Handbook of Biology and Society** Maurizio Meloni, John Cromby, Des Fitzgerald, Stephanie Lloyd, 2017-10-27 This comprehensive handbook synthesizes the often fractured relationship between the study of biology and the study of society Bringing together a compelling array of interdisciplinary contributions the authors demonstrate how nuanced attention to both the biological and social sciences opens up novel perspectives upon some of the most significant sociological anthropological philosophical and biological questions of our era The six sections cover topics ranging from genomics and epigenetics to neuroscience and psychology to social epidemiology and medicine The authors collaboratively present state of the art research and perspectives in some of the most intriguing areas of what can be called biosocial and biocultural approaches demonstrating how quickly we are moving beyond the acrimonious debates that characterized the border between biology and society for most of the twentieth century This landmark volume will be an extremely valuable resource for scholars and practitioners in all areas of the social and biological sciences The chapter Ten Theses on the Subject of Biology and Politics Conceptual Methodological and Biopolitical Considerations is open access under a CC BY 4.0 license via link [springer.com](https://www.springer.com) Versions of the chapters The Transcendence of the Social Scrutinizing the Epigenetics Revolution Species of Biocapital 2008 and Speciating Biocapital 2017 and Experimental Entanglements Social Science and Neuroscience Beyond Interdisciplinarity are available open access via third parties For further information please see license information in the chapters or on link [springer.com](https://www.springer.com)

**Essays on Religion, Science, and Society** Herman Bavinck, John Bolt, 2008-06 The Body of Writing An Erotics of Contemporary American Fiction examines four postmodern texts whose authors play with the material conventions of the book Joseph McElroy's Plus 1977 Carole Maso's AVA 1993 Theresa Hak Kyung Cha's DICTEE 1982 and Steve Tomasula's VAS 2003 By demonstrating how each of these works calls for an affirmative engagement with literature Flore Chevallier explores a centrally important issue in the criticism of contemporary fiction Critics have claimed that experimental literature in its disruption of conventional story telling and language uses resists literary and social customs While this account is accurate it stresses what experimental texts respond to more than what they offer This book proposes a counter view to this emphasis on the strictly privative character of innovative fictions by examining experimental works positive ideas and affects as well as readers engagement in the formal pleasure of experimentations with image print sound page orthography and syntax Elaborating an erotics of recent innovative literature implies that we engage in the formal pleasure of its experimentations with signifying techniques and with the materiality of their medium Such engagement provokes a fusion of the reader's senses and the textual material which invites a redefinition of corporeality as a kind of textual practice

parallels and highlighting differences to pre Crusade Ashkenaz the period following the Black Death Spanish and Provençal Jewish society and general medieval society Ephraim Kanarfogel creates an insightful and compelling portrait of Ashkenazic society Available in paperback for the first time with a new preface included Jewish Education and Society in the High Middle Ages will be a welcome addition to the libraries of Jewish studies scholars and students of medieval religious literature
