

# A.d'ABRO THE EVOLUTION OF SCIENTIFIC THOUGHT FROM NEWTON TO EINSTEIN

This history first sketches the essential features of Newton's great discoveries, and the apparent inevitableness of absolute space and time in classical science; then Riemann's non-euclidean geometry is discussed, and finally the way in which Einstein transported his ideas into the realm of physics, giving us thereby that supreme achievement of modern thought, the theory of relativity. Although non-technical language is used throughout, great care is given to an accurate presentation of facts.

Part I is devoted to pre-relativity physics and the reasons for its breakdown. The remainder of the book discusses Einstein's special and general theories of relativity, which rescued physics from the contradictions of classical Newtonian theory. Throughout, d'Abro touches on the contributions of Riemann, Weyl, Lorentz, Planck, Eddington, Maxwell, Hertz, and many others to modern relativity physics. He closes with a philosophical discussion of the methodology of science and of the general significance of the theory of relativity.

Revised, corrected 2nd (1960) edition. Author's preface and foreword. Appendix: The Space and Time Graphs. 15 portraits of celebrated physicists. 21 diagrams. 481pp. 5 $\frac{1}{4}$  x 8. 20002-7 Paperbound

## A DOVER EDITION DESIGNED FOR YEARS OF USE!

We have made every effort to make this the best book possible. Our paper is opaque, with minimal show-through; it will not discolor or become brittle with age. Pages are sewn in signatures, in the method traditionally used for the best books, and will not drop out, as often happens with paperbacks held together with glue. Books open flat for easy reference. The binding will not crack or split. This is a permanent book.

Kaiser, 2021-12-06 This volume documents the role of creational theology in discussions of natural philosophy medicine and technology from the Hellenistic period to the early twentieth century Four principal themes are the comprehensibility of the world the unity of heaven and earth the relative autonomy of nature and the ministry of healing Successive chapters focus on Greco Roman science medieval Aristotelianism early modern science the heritage of Isaac Newton and post Newtonian mechanics The volume will interest historians of science and historians of the idea of creation It simultaneously details the persistence of tradition and the emergence of modernity and provides the historical background for later discussions of creation and evolution

**Determinants and Controls of Scientific Development** K.D. Knorr, H. Strasser, H.G. Zilian, 2012-12-06 This book constitutes the outcome of an international conference held at the Otto Mobes Volkswirtschaftsschule Graz Stifting Austria from June 16 to 22 1974 The conference was initiated by a project group working on determinants and controls of social science development at the Institute for Advanced Studies and Scientific Research in Vienna and organized by the editors of this volume It was held under the auspices of the Austrian Ministry of Science and Research The main topics of the conference were those at the forefront of the state of argumentation to borrow from one of our contributors in philosophy and sociology of science ever since the controversy between Thomas S Kuhn and Sir Karl R Popper has sharpened our awareness for the methodological and substantial presuppositions involved

with questions of growth and development in science Let us give two examples of those topics The borderline between sociology of science and philosophy of science has become more and more unclear while the work of at least some philosophers of science comes to have an empirical flavour sociologists of science are increasingly apt to include logical and methodological components of the research process as their objects of examination Papers included in this volume testify to both tendencies

**Illustrated Encyclopaedia of World History , A New History of Management** Stephen Cummings,Todd Bridgman,John Hassard,Michael Rowlinson,2017-09-19 Existing narratives about how we should organize are built upon and reinforce a concept of good management derived from what is assumed to be a fundamental need to increase efficiency But this assumption is based on a presentist monocultural and generally limited view of management's past A New History of Management disputes these foundations By reassessing conventional perspectives on past management theories and providing a new critical outline of present day management it highlights alternative conceptions of good management focused on ethical aims sustainability and alternative views of good practice From this new historical perspective existing assumptions can be countered and simplistic views disputed offering a platform from which graduate students researchers and reflective practitioners can develop alternative approaches for managing and organizing in the twenty first century
