The Trojan War as Military History
Manousos E. Kambouris,2023-03-23 In The Trojan War as Military History the author s starting point is the fact that the Iliad notwithstanding the fantastical mythological elements the involvement of gods and demigods is the earliest detailed description of warfare we have Stripping away the myths Manousos Kambouris analyses the epic and combines it with other textual and archaeological evidence to produce a coherent narrative of the conflict and of Bronze Age warfare in the Aegean The author presents the most detailed analysis possible of Mycenaean Greek armies their composition and organization the warriors weapons armor and tactics and those of their enemies He finds sophisticated combined arms forces blending massed infantry with missile troops and chariots employing open battle deception and special operations in what amounted to total war The author s detailed examination of the mechanics of Bronze Age combat is enriched by his use of insights from experimental archaeology using replica equipment No less illuminating or significant than the minutiae of heroic duels is the setting of the strategic context of the conflict and the geopolitical relationship of the Mycenaean Greeks with their rivals across the Aegean Seeking to integrate the supernatural divine element of the Iliad within the power structure and struggle of the day the author lashes the Trojan War to the chariot of rationality and drags it from the mists of mythology and into the realm of History

Evolution and the War Peter Chalmers Mitchell, 2015-06-15 Excerpt from Evolution and the War This little book is based on three lectures on Evolution and War given at the Royal Institution in February 1915 The lectures were delivered orally with the assistance of notes and as soon as possible afterwards I wrote out what I had said rearranging the matter in a form more suitable for reading and adding some details for which I had no time at the lectures I have also made fuller reference to contemporary events than was permitted by the custom of the Institution Although the lectures would not have been given but for the war the ideas that underlie them are not a by product of current politics The points of

resemblance and difference between nations and species I discussed on similar lines in an article published in The North American Review in October 1904 In the account of race and nationality given in Chapter III I have followed in broad outline the facts that Professor Ripley has presented so lucidly in The Races of Europe In a strictly anthropological discussion many minor considerations some of them dealt with by Dr Ripley himself others raised by other anthropologists and ethnologists would have to be reviewed About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

A Military History of the World War Charles Roscoe Howland, 1923

The Culture of War Richard A. Gabriel, 1990-04-23

Although war has been analyzed from many perspectives no scholar has satisfactorily explained why the human race fights and how we came to create a degree of military sophistication capable of destroying the entire species Gabriel addresses these questions in his study of the origins and development of warfare He looks particularly at the relationship between the evolution of the social institution of war and the development of the military institutions tactical sciences and technology required for organized conflict Beginning with a discussion of the biological and evolutionary history of man Gabriel investigates the proposition that the human race is genetically predisposed to warlike behavior He next reviews the archaeological record to test the common assumption that war has existed from the earliest times He traces the evolution of the social institutions and technology of war in a succession of ancient cultures beginning with the Bronze Age The development of armies tactics logistics and weapons is examined together with the psychological and social implications of mankind's choice to use them The work concludes with a discussion demonstrating how the practice of war in modern times relates to the perpetuation of values and institutional forms created by earlier societies especially those of classical Greece and Rome The first study to integrate the findings of cultural anthropology with the concerns of military analysis this work will be of interest to students and academics in these and related fields
