### Summary of the article

Since Darwin published his ideas in 1859, the idea of evolution has sparked controversy. As Haught writes, "Nothing in contemporary science has proved more challenging to religious believers than evolutionary biology." Religion and science take different approaches to claims, evidence, and claims testing.

### Purpose

You will learn about the relationship between faith and science with particular focus on evolution and Darwin's struggle to publish his work on natural selection.

### Overview

Evolutionary biology is the study of the changes in the characteristics of a population of organisms over time. It is a branch of biology that deals with the study of the origin and development of life. The theory of evolution, which was first proposed by Charles Darwin, states that all life on Earth has evolved from a common ancestor. This theory is supported by a large body of evidence, including fossil records, comparative anatomy, and molecular biology. However, the theory of evolution has been a source of controversy for many years, particularly among religious groups who believe in the creation of life by God. This article explores the relationship between faith and science, with a particular focus on evolution and Darwin's struggle to publish his work on natural selection.

1. The article begins by discussing the history of evolution, from the early ideas of Lamarck to the modern synthesis of Darwin and Wallace. It then explores the relationship between faith and science, particularly in the context of evolution. The author argues that while science is based on evidence and reason, faith is based on belief and tradition. This creates a tension between the two, particularly when it comes to the question of the origin of life. The article concludes by discussing the importance of understanding the relationship between faith and science in the context of evolution.

Lamoureux, 2008-06-15 In this provocative book evolutionist and evangelical Christian Denis O Lamoureux proposes an approach to origins that moves beyond the evolution versus creation debate Arguing for an intimate relationship between the Book of God s Words and the Book of God s Works he presents evolutionary creation a position that asserts that the Father Son and Holy Spirit created the universe and life through an ordained and sustained evolutionary process This view of origins affirms intelligent design and the belief that beauty complexity and functionality in nature reflect the mind of God Lamoureux also challenges the popular Christian assumption that the Holy Spirit revealed scientific and historical facts in the opening chapters of the Bible He contends that Scripture features an ancient understanding of origins that functions as a vessel to deliver inerrant and infallible messages of faith Lamoureux shares his personal story and his struggle in coming to terms with evolution and Christianity Like many he lost his boyhood faith at university in classes on evolutionary biology After graduation he experienced a born again conversion and then embraced belief in a literal six day creation Graduate school training at the doctoral level in both theology and biology led him to the conclusion that God created the world through evolution Lamoureux closes with the two most important issues in the origins controversy the pastoral and pedagogical implications How should churches approach this volatile topic And what
