Evolution and Christian Thought Today ...

Edited by R.L. Mixter. [By Various Authors. With Plates.]. Russell Lowell MIXTER, 1959

The Creationists Ronald L.

Numbers, 1993-01-01 Forty seven percent of the American people according to a 1991 Gallup poll believe that God made man as man is now in a single act of creation and within the last ten thousand years Ronald L Numbers chronicles the astonishing resurgence of this belief since the 1960s as well as the creationist movement's tangled roots in the theologies of late nineteenth and early twentieth century Baptists Presbyterians Lutherans Adventists and other religious groups Even more remarkable than Numbers's story of today's widespread rejection of the theory of evolution is the dramatic shift from acceptance of the earth's antiquity to the insistence of present day scientific creationists that most fossils date back to Noah's flood and its aftermath and that the earth itself is not more than ten thousand years old Numbers traces the evolution of scientific creationism and shows how the creationist movement challenges the very meaning of science *Creation and Evolution in the Early American Scientific Affiliation* Mark A. Kalthoff, 2021-10-17 Originally published in 1995 *Creation and Evolution in the Early American Scientific Affiliation* is the tenth volume in the series *Creationism in Twentieth Century America* reissued in 2021 The volume comprises of original primary sources from the American Science Affiliation a group formed following an invitation from the president of the Moody Bible Institute in Chicago in answer to the perceived need for an academic society for American Evangelical Scientists to explicate the relationship between science and faith The society confronted the debate between creation and evolution head on leaving a paper trail documenting their thoughts and struggles This diverse and expansive collection includes 53 selections that appeared during the organisation's first two decades and focuses on the encounter between science and American evangelicalism in the twentieth century in particular the debates surrounding the ever increasing preference for evolutionary theory The collection will be of especial interest to natural historians and theologians as well as academics of philosophy and history **After the Monkey Trial** Christopher M. Rios, 2014-08-28 This study sheds light on the work of the evangelical scientists who sought to bridge the cultural divide Christianity and evolutionary theory In the well known Scopes Monkey Trial of 1925 famously portrayed in the film and play *Inherit the Wind* William Jennings Bryan's clashed with defense attorney Clarence Darrow The drama pitting fundamentalist fervor against aggressive agnosticism illustrated what current scholars call the conflict thesis Regardless of the actual legal question of the trial it appeared as though Christianity and science were at war with each other Decades later a new generation of evangelical scientists struggled to restore peace *After the Monkey Trial* is the compelling history of those evangelical scientists in Britain and America who unlike their fundamentalist cousins supported mainstream scientific conclusions of the world and resisted the anti science impulses of the era Christopher M Rios focuses on two organizations the American Scientific Affiliation and the Research Scientists Christian Fellowship today Christians in Science who for more

than six decades have worked to reshape evangelical engagement with science and redefine what it means to be a creationist

Creationism USA Adam Laats,2020-09-24 Creationism USA reveals how common misconceptions about creationism have led Americans into a century of unnecessary culture war histrionics about evolution education and creationism Adam Laats argues that Americans do not have deep fundamental disagreements about evolution but that they do have significant disagreements about creationism Creationism USA both explains the current state of America's battles over creationism and offers a nuanced yet straight forward prescription to solve them

The Oxford Companion to Christian Thought Adrian Hastings,Alistair Mason,Hugh S. Pyper,2000-12-21 Embracing the viewpoints of Catholic Protestant or Orthodox thinkers of conservatives liberals radicals and agnostics Christianity today is anything but monolithic or univocal In The Oxford Companion to Christian Thought general editor Adrian Hastings has tried to capture a sense of the great diversity of opinion that swirls about under the heading of Christian thought Indeed the 260 contributors who hail from twenty countries represent as wide a range of perspectives as possible Here is a comprehensive and authoritative though not dogmatic overview of the full spectrum of Christian thinking Within its 600 alphabetically arranged entries readers will find lengthy survey articles on the history of Christian thought on national and regional traditions and on various denominations from Anglican to Unitarian There is ample coverage of Eastern thought as well examining the Christian tradition in China Japan India and Africa The contributors examine major theological topics such as resurrection the Eucharist and grace as well as controversial issues such as homosexuality and abortion In addition short entries illuminate symbols such as water and wine and there are many profiles of leading theologians of non Christians who have deeply influenced Christian thinking including Aristotle and Plato and of literary figures such as Dante Milton and Tolstoy Most articles end with a list of suggested readings and the book features a large number of cross references The Oxford Companion to Christian Thought is an indispensable guide to one of the central strands of Western culture An essential volume for all Christians it is a thoughtful gift for the holidays

The Social Production of Scientific Knowledge E. Mendelsohn,P. Weingart,R.D. Whitely,2012-12-06 *Science and Christianity in Pulpit and Pew* Ronald L. Numbers,2007-09-10 Ronald Numbers is one of the best known scholars of the relationship between science and religion In this volume he collects seven of his published papers focusing on Christianity and science The essays address broad topics such as the popularization of scientific ideas secularization and the development of the naturalistic worldview One essay considers the writings of Charles Hodge the most influential American Protestant theologian of the 19th century revealing for the first time the central role that science played in his theology Another deals with the demise of Bishop Ussher's young earth cosmology especially among evangelical Christians Taken together these accessible and authoritative essays form a perfect introduction to Christian attitudes towards science since the 17th century

[Christianity in Evolution](#) Jack Mahoney,2011-08-01 Evolution has provided a new understanding of reality with revolutionary consequences for Christianity In an evolutionary perspective the incarnation

involved God entering the evolving human species to help it imitate the trinitarian altruism in whose image it was created and counter its tendency to self absorption Primarily however the evolutionary achievement of Jesus was to confront and overcome death in an act of cosmic significance ushering humanity into the culminating stage of its evolutionary destiny the full sharing of God s inner life Previously such doctrines as original sin the fall sacrifice and atonement stemmed from viewing death as the penalty for sin and are shown not only to have serious difficulties in themselves but also to emerge from a Jewish culture preoccupied with sin and sacrifice that could not otherwise account for death The death of Jesus on the cross is now seen as saving humanity not from sin but from individual extinction and meaninglessness Death is now seen as a normal process that affect all living things and the religious doctrines connected with explaining it in humans are no longer required or justified Similar evolutionary implications are explored affecting other subjects of Christian belief including the Church the Eucharist priesthood and moral behavior

The Mythology of Science R. J. Rushdoony, 2009-11-16 The mythology of science is its religious devotion to the myth of evolution In evolution man is the highest expression of intelligence and reason and such thinking will not yield itself to submission to a God it views as a human cultural creation useful if at all only in a cultural context Views of origins are dependent on faith and one s position speaks much as to one s religious tenets Evolutionary faith however cannot tolerate any view of the natural world or science that places it under another faith such as the Christian belief in a sovereign causative God Darwin gave an ostensibly scientific justification for man s rebellion against God He put men at the top of the evolutionary ladder allowing them to believe they had realized Satan s lure to Adam and Eve and become as gods knowing determining good and evil Genesis 3:5 We can attack the science of evolution all we want but the battle for our faith true science and our culture is a religious one over the nature of truth Evolution is a religious faith that has become entrenched as a presupposition of modern thought For Christians to argue about the unproven nature of the evolutionary hypothesis or the circular reasoning of its thought is of some value but the essential issue is that two opposing religious faiths are in conflict Evolution is popular because it is such a useful paradigm to sinful men it dispenses with God as a prerequisite of all things But Christianity as a religious faith depends not on proofs that are constructions of man s fallen mind but on the reality of an almighty God who reveals Himself to us by grace Christianity too depends on circular reasoning we even begin and end with faith in God and His revelation The purpose of this book first published in 1967 is to define the nature of the opposing religious systems of thought Christian creationism and Darwinism in its various forms It is a call to urge Christians to stand firm for Biblical six day creationism as a fundamental aspect of their faith in the Creator

The History of Christian Thought Jonathan Hill, 2013-02-26 A society with no grasp of its history is like a person without a memory This is particularly true of the history of ideas This book is an ideal introduction to the thinkers who have shaped Christian history and the culture of much of the world Writing in a lively accessible style Jonathan Hill takes us on an enlightening journey from the first to the twenty first centuries He shows us the key Christian thinkers

through the ages ranging from Irenaeus Origen Augustine and Aquinas through to Luther Wesley Kierkegaard and Barth placing them in their historical context and assessing their contribution to the development of Christianity

Origins Ariel Adrean Roth, 1998 Are the worlds of science and religion irreconcilable Has modern science with its theory of evolution disproved the biblical account of the origin of life If one accepts the biblical account of origins does one then have to reject science Scientist and Christian believer Ariel A Roth argues that taken together science and religion give us a more complete and sensible understanding of the world around us our place in it and our ultimate meaning and fate Roth examines such topics as the evidence for evolution and creation the Flood the strengths and limitations of the scientific method and the reliability of Scripture He concludes that the biblical model of a recent creation by God leaves fewer unanswered questions than either science's evolutionary model or any view between the two positions such as progressive creation or theistic evolution Back cover

Scientific Creationism Institute for Creation Research, 1985 This book deals with all the important aspects of the creation evolution question from a strictly scientific point of view attempting to evaluate the physical evidence from the relevant scientific fields without reference to the Bible or other religious literature It demonstrates that the real evidences dealing with origins and ancient history support creationism rather than evolutionism This General Edition rather than the Public School Edition includes a chapter Creation According to Scripture which places the scientific evidence in its proper Biblical and theological context

The Creation Controversy Dorothy Nelkin, 2000 In 1999 by the board of education in Kansas voted to delete all mention of evolution from the state's recommended science curriculum and also from its educational assessment tests This decision and similar decisions in other states suggest the persistence of creationists and their ability to capture sufficient support to influence educational policies Although evolutionary ideas have become increasingly important to many scientific fields the creationists still have significant influence on science curriculum How have religious fundamentalists and right wing conservatives managed to have such influence In this science dominated age why is their such opposition to the teaching of evolution This book places the Kansas decision in the broader context of the controversy between creationists and evolutionists as a group of religious fundamentalists who defined themselves as scientists have challenged the most basic assumptions of contemporary biology Though motivated by religious beliefs they have tried to bypass the Constitutional requirement for the separation of church and state as they seek to influence legislature and school boards Looking at the people involved in this social movement and tracing changes in their arguments and strategies this book links the creation evolution controversy to broader questions about the meaning of religion in a secular science public trust in science and persistent concerns about its social and moral implications

The Comparative Reception of Darwinism Thomas F. Glick, 1988-09-24 The majority of the chapters deal with the reception accorded Darwin's work in specific countries England the United States Germany France Russia the Netherlands Spain Mexico and the Arab countries Several chapters however also investigate the response to Darwinism made by specific social circles such as social
