E. Ager,1990-12-13 This textbook deals with the ways in which French is used in different circumstances and settings in France and abroad with the language attitudes of French speakers and with language policy It is concerned not only with the linguistic data but also the social political and economic environment in which contemporary French is used This is the only up to date introduction to the sociolinguistics of French currently available The exposition is clear and lively and will be welcomed by students and teachers alike **Education in France** ,1966 *Ideologies of Language (RLE Linguistics A: General Linguistics)* John E. Joseph,Talbot J. Taylor,2014-02-03 Is the study of language ideologically neutral If so is this study objective and autonomous One of the most cherished assumptions of modern academic linguistics is that the study of language is or should be ideologically neutral This professed ideological neutrality goes hand in hand with claims of scientific objectivity and explanatory autonomy *Ideologies of Language* counters these claims and assumptions by demonstrating not only their descriptive inaccuracy but also their conceptual incoherence **Routledge Dictionary of Language and Linguistics** Hadumod Bussmann,2006-02-20 The Routledge Dictionary of Language and Linguistics is a unique reference work for students and teachers of linguistics The highly regarded second edition of the *Lexikon der Sprachwissenschaft* by Hadumod Bussmann has been specifically adapted by a team of over thirty specialist linguists to form the most comprehensive and up to date work of its kind in the English language In over 2 500 entries the

Dictionary provides an exhaustive survey of the key terminology and languages of more than 30 subdisciplines of linguistics. With its term based approach and emphasis on clear analysis it complements perfectly Routledge's established range of reference material in the field of linguistics.

From Latin to Modern French with Especial Consideration of Anglo-Norman Mildred Katharine Pope, 1952 *Redefining Regional French* David Hornsby, 2022-10-10 This study challenges the orthodox view that emergent regional varieties of French represent no more than an ephemeral dialect residue of little theoretical interest. It follows the life cycle of an obsolescent urban Picard variety spoken in a mining town in the Pas de Calais and attempts to unravel the complex reasons behind the survival of some local variants at the expense of others. Applying a sociolinguistic model developed by Peter Trudgill it shows how the processes of levelling and simplification have driven change in a dialect contact situation giving rise to a new stable variety or koine. This is compared with other new urban varieties in Sweden and the UK where different economic social and demographic conditions have produced very different linguistic outcomes. The emergence of Regional French in the north it is argued may herald the start of a new diversification of French in Europe. This book will therefore interest both students of French and of language variation more generally.

Anglicisms, Neologisms and Dynamic French Michael D. Picone, 1996-01-01 This comprehensive study of Anglicisms in the context of accelerated neological activity in Contemporary Metropolitan French not only provides detailed documentation and description of a fascinating topic but opens up new vistas on issues of general linguistic interest: the effects of technology on language the analyticity syntheticity controversy the lexical contribution to language vitality the study of compound word formation the interplay between cultural and linguistic affectivity. By investigating the dynamics of borrowing within the larger framework of general

neological productivity and by bringing to bear cognitive and pragmatic considerations a much needed fresh approach to the entire question of Anglicisms takes shape All pertinent phenomena regarding Anglicisms in French a topic which continues to command the attention of language commentators and defenders in France and elsewhere are explored integral borrowings semantic calques structural calques the generation of pseudo Anglicisms and hybrids graphological and phonological phenomena In each case the phenomenon is investigated in the proper context of its interaction with other pertinent neological phonological and sociocultural developments These include general changes in French compound word formation modified derivational dynamics the microsystem of pseudo Classical morphology historic phonological instabilities the pressure for more synthetic types of lexical production in relation to the needs of technology and society Rather than adhering rigidly to any single theoretical model there is an attempt to set up a dialog between differing models in order to arrive at a multidimensional view of the phenomena investigated

Variation and Change in Gallo-Romance Grammar Sam Wolfe, Martin Maiden, 2020-05-07 This volume offers a wide range of case studies on variation and change in the sub family of the Romance languages that includes French and Occitan Gallo Romance Both standard and non standard Gallo Romance data can be of enormous value to studies of morphosyntactic variation and change yet as the volume demonstrates non standard and comparative Gallo Romance data have often been lacking in both synchronic and diachronic studies Following an introduction that sets out the conceptual background the volume is divided into three parts whose chapters explore a variety of topics in the domains of sentence structure the verb complex and word structure The empirical foundation of the volume is exceptionally rich drawing on standard and non standard data from French Occitan Francoprovençal Picard Wallon and Norman This diversity is also reflected in the theoretical and conceptual approaches adopted which span traditional philology sociolinguistics formal morphological and syntactic theory semantics and discourse pragmatics The volume will thus be an indispensable tool for researchers and students in French and Gallo Romance linguistics as well as for readers interested in grammatical theory sociolinguistics and historical linguistics

state of the language at a given period This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1943 Expletive and Referential Subject Pronouns in Medieval French Michael Zimmermann, 2014-09-12 Medieval French usually analyzed as a null subject language differs considerably from modern Romance null subject languages such as Spanish in the availability of non expressed subject pronouns specifically it shows characteristics reminiscent of non null rather than null subject languages such as the expression of expletive subject pronouns The central goal of this book is to put forward an account of these differences On the basis of the analysis of an extensive newly established data corpus the development of the expression of both expletive and referential subject pronouns until the 17th c is determined Following a thorough discussion of previous approaches an alternative approach is presented which builds on the analysis of Medieval French as a non null subject language The non expression of subject pronouns licit in specific contexts in non null subject languages is shown to be restricted to configurations generally involving left peripheral focalization These configurations and concomitantly non expressed subject pronouns are finally argued to be eventually lost for good in the wake of the initial observation by 17th c writers of pertinent instructions campaigned for in highly influential works of language use The Emergence and Development of SVO Patterning in Latin and French Brigitte L. M. Bauer, 1995 This book analyzes in terms of branching the pervasive reorganization of Latin syntactic and morphological structures in the development from Latin to French a shift can be observed from the archaic left branching structures which Latin inherited from Proto Indo European to modern right branching equivalents Brigitte L M Bauer presents a detailed analysis of this development based on the theoretical discussion and definition of branching and head Subsequently she relates the diachronic shift to psycholinguistic evidence arguing that the difficulty of left branching complex structures as reflected in their painstaking and delayed acquisition accounts for the extensive typological shift from left to right branching that took place in Latin French and the other Indo European languages The author uses data from child language acquisition studies to support her thought provoking claim
