Retail Depositor and Retail Investor Protection under EU Law Constantinos Tokatlides, 2017-02-10 Retail Depositor and Retail Investor Protection under EU Law offers an original perspective on EU financial law in the area of retail investor protection examining the status of protection awarded by EU law to retail depositors and retail investors in the event of

financial institution failure The analysis of relevant EU law is on the basis of effectiveness and has been elaborated in two levels of comparison The first comparative approach examines relevant EU law both externally and internally externally vis vis relevant international initiatives and developments in the area of financial law as the latter affect the features and evolution of EU law and internally by examining relevant instruments of EU law with regard to each other as to their normative structure and content The second comparative approach also examines the status of retail depositors in relation to that of retail investors under EU law in the event of financial institution failure and the relevant legal consequences thereof

Environmental Principles and the Evolution of Environmental Law Eloise Scotford, 2017-02-09 Environmental principles from the polluter pays and precautionary principles to the principles of integration and sustainability proliferate in domestic and international legal and policy discourse reflecting key goals of environmental protection and sustainable development on which there is apparent political consensus Environmental principles also have a high profile in environmental law beyond their popularity as policy and political concepts as ideas that might unify the subject and provide it with conceptual foundations or boost its delivery of environmental outcomes However environmental principles are elusive legal concepts This book deepens the legal understanding of environmental principles in light of recent legal developments It analyses the increasing legal effects of environmental principles in different jurisdictions and demonstrates how they are shaping and revealing innovative and evolving bodies of environmental law This analysis is a step forward in understanding a key feature of modern environmental law and presents a robust methodology for dealing with novel legal concepts in the subject It also makes a contribution to environmental policy debates and discussions internationally that rely heavily on environmental principles including their supposed legal effects

EU Law and International Arbitration Konstanze von Papp, 2021-04-08 Eminently readable One need look nowhere else I regularly teach courses on this subject and have encountered no work that comes close to achieving what von Papp has achieved George A Berman Columbia Law School European Law Review This timely book addresses the main areas of tension between EU law and international arbitration looking at both commercial and investment treaty arbitration It opens pathways for practical solutions based on communication between the different regimes At the same time it offers a sound theoretical basis that allows for addressing the core problem as normative conflict between legitimate public interests and the privatisation of justice The book is divided into five parts It introduces key aspects of the overall tension between EU law and international arbitration before setting out the theoretical framework that understands EU law international commercial arbitration and investment treaty arbitration as closed regimes The author then addresses the core problem of finding the limits to contracting out of the EU legal regime both on a jurisdictional and a substantive level This is then linked to the question of trust building in legal outcomes of the relevant regimes The book concludes with a short summary and key theses Combining a theoretical and normative with a more pragmatic approach to very topical issues this book offers invaluable insights for academics and practitioners private

and public commercial and investment treaty lawyers alike Environmental Liability and the Interplay between EU Law and International Law Emanuela Orlando, 2023-07-24 The role of law in responding to global environmental problems and the interplay between different levels of regulation and governance is becoming increasingly relevant in the field of liability and reparation for environmental damage This book examines the relationship and reciprocal influences between the EU and the international legal order in a multilevel and comparative perspective in relation to the ongoing efforts to elaborate effective regimes of liability and reparation for environmental damage It offers a comparative analysis of legal developments in the field of environmental liability within the EU and at the international law level and addresses questions concerning the impact of such interaction on the development implementation and enforcement of appropriate responses to environmental damage within the respective legal orders and on a global level Given the book's focus and the transnational legal dimension of the issues covered this volume will be of great interest to legal academics and researchers working in the environmental law field from an EU law and international law perspective as well as more generally to scholars interested in the study of the relationship between EU and international law Outside academia the book will also be of great interest to practitioners wishing to get insights into the application of the law of environmental liability in the EU and at the international law level

The Concept of State Aid Under EU Law Juan Jorge Piernas López, 2015 Analyzing the evolution of the legal concept of State aid in the EU this book examines the main formulas established by the Court of Justice of the EU since the early 1950s underpinning the legal boundaries of State aid in relation to the historical political economic and legal evolution of its field of application the internal market **Public Liability in EU Law** Pekka Aalto, 2011-11-01 Over the last two decades public law liability for breach of European Union law has been subject to remarkable developments This book examines the convergence between its two constituent systems the damages liability of the EU and that of its Member States for failing to comply with EU rules Member State liability based as it is on the Francovich case 1991 and Brasserie du P cheur and Factortame 1996 judgments of the European Court of Justice ECJ is well established But it is yet to be closely scrutinised by reference to the detailed rules on the liability of the European Union The focus of the book is on the two key legal criteria that are common to both systems namely the grant of rights to individuals by EU law and the notion of sufficiently serious breach of such rights The analysis concentrates on developments in the case law of the ECJ and the General Court since the Bergaderm judgment 2000 which consolidated the convergence of the two liability systems that was first indicated in Brasserie du P cheur and Factortame These two criteria are set side by side to evaluate the extent in real terms of the convergence of Member State and EU institutional damages liability and to determine the extent to which one has influenced the other This book shows that although full convergence between the two liability systems is not likely each stream of case law should look to the other more actively as this important element of EU remedial law develops Convergence in EU law public liability is supported by developments in adjacent areas most notably European tort law and European administrative law This study also illustrates

how convergence in the EU liability systems to date has had spill over effects into national public liability law **EU Law**
