Bibliography of the History of Medicine ,1993 **A New History Of Cataract Surgery** Christopher T. Leffler, 2025-08-14 Cataract surgery has been the procedure which has almost defined the profession of ophthalmology for millennia Patients have understood that cataract surgery could transform their lives in an almost miraculous way Much of the history of this surgery has been handed down to us and on occasion we have inherited some myths along with the facts In this two volume monograph we sought to uncover the reality behind the myths This book is entitled A New History of

Cataract Surgery because it is based on original research from primary sources It is the work of 44 co authors from North America Europe the Middle East and Asia It contains new translations from Latin Greek Sanskrit Chinese Arabic Persian French Dutch and German It contains photographs from private collections We sought to tell stories you might have heard a little about from antiquity onward in a new way Many of the chapters in this book covering the 20th century were written by ophthalmologists who lived through the revolutionary changes in their field and were prime movers in making these advances

The Palgrave Handbook of the History of Surgery Thomas Schlich,2017-12-12 This handbook covers the technical social and cultural history of surgery It reflects the state of the art and suggests directions for future research It discusses what is different and specific about the history of surgery a manual activity with a direct impact on the patient's body The individual entries in the handbook function as starting points for anyone who wants to obtain up to date information about an area in the history of surgery for purposes of research or for general orientation Written by 26 experts from 6 countries the chapters discuss the essential topics of the field such as anaesthesia wound infection instruments specialization specific domains areas for example cancer surgery transplants animals war but also innovative themes women popular culture nursing clinical trials and make connections to other areas of historical research such as the history of emotions art architecture colonial history Chapters 16 and 18 of this book are available open access under a CC BY 4.0 license at link.springer.com

Modern Ophthalmology Benjamin Boyd,2011-06 Modern Ophthalmology The Highlights is a trilogy describing fifty major subjects in the field of ophthalmology developed through a period of sixty years More than 850 images help illustrate the developments throughout the years The first volume discusses the birth and development of modern ophthalmology refractive surgery and microsurgery angiography retinopathy and much more Volume two covers the entire field of glaucoma apoptosis contact lenses dry eye keratoplasty and LASIK Volume three examines cataract surgery optical coherence tomography eye conditions such as uveitis herpes cancer keratitis and strabismus ophthalmic plastic surgery and more

Hand transplantation Marco Lanzetta,Jean-Michel Dubernard,2007-03-20 Hand transplantation was the dream of humanity until 1998 when a group of international surgeons gathered in Lyon performed the first of many hand transplantations carried out since then This book presents the global international experimental and clinical experience on limb transplantation and other composite tissue allografts It represents the most complete and comprehensive review of all aspects of this innovative and groundbreaking procedure They range from the experimental basis of hand transplantation to surgical techniques to immunology and antirejection drug strategies to the presentation of the current functional results and future directions including the possibility to introduce face and uterus transplantation to the clinical practice This book represents a milestone in the medical literature and is a great asset for every scientific library

From Hippocrates to COVID-19 Dale A. Stirling,2023-05-12 The COVID 19 pandemic provides stark evidence of the importance of medicine on a global scale However revisiting the influenza pandemic of 1918 provided a perspective as we searched for a viable vaccine

and instituted public health measures This shows that medical knowledge is an accumulative process extending to the past and it is in the spirit of that legacy that this bibliography has been compiled The book is a one stop resource that cites literature related to the historical aspects of medicine It also acknowledges medicine s global reach and devotes significant effort in that respect Although the online world seems to dominate on both a social and educational level there is still a need for thoughtfully curated and focused reference works and this bibliography accomplishes that goal The book has 9 000 citations It utilizes the WHO s International classification of Diseases for the section on diseases and disorders and the U S Food Drug Administration s Product Code Classification Database for the section on medical devices equipment and instruments It includes detailed subject geographic and people indexes for an easy reference
