Heilbron, 2005-06-03 With over 150 alphabetically arranged entries about key scientists concepts discoveries technological innovations and learned institutions the Oxford Guide to Physics and Astronomy traces the history of physics and astronomy from the Renaissance to the present     **The Oxford Guide to the History of Physics and Astronomy** J. L. Heilbron, 2005-06-03 The entries follow an elaborate organizational plan which amounts to a new classification of knowledge its institutional settings and its applications This plan is reprinted in the opening pages of the Guide Thoroughly cross referenced and accented with attractive black and white artwork no other source is as systematic and authoritative or as informative and inviting in its coverage of physics astronomy and planetary science BOOK JACKET     *Science and Its History* Joseph Agassi, 2008-09-16 Professor Joseph Agassi has published his *Towards an Historiography of Science* in 1963 It received many reviews by notable academics including Maurice Finocchiaro Charles Gillispie Thomas S Kuhn Geroge Mora Nicholas Rescher and L Pearce Williams It is still in use in many courses in the philosophy and history of science Here it

appears in a revised and updated version with responses to these reviews and with many additional chapters some already classic others new They are all paradigms of the author's innovative way of writing fresh and engaging chapters in the history of the natural sciences

**Evolution of Networks** S. N. Dorogovtsev, J. F. F. Mendes, 2013-11-14 We live in a world of networks where everything is amazingly close to everything else The notion of network turns out to be central to our times the Internet and WWW are changing our lives our physical existence is based on various biological networks we are involved in all enveloping networks of economic and social relations Only in the 1990s did physicists begin to explore real networks both natural and artificial as evolving systems with intriguingly complex and effective architectures Progress has been so immediate and astounding that we actually face a new science based on a new set of concepts and one may even say on a new philosophy the natural philosophy of a small world Old ideas from mathematics statistical physics biology computer science and so on take on quite new forms in applications to real evolving networks What is common to all networks What are the general principles of the organization and evolution of networks How do the laws of nature work in communication biological and social networks What are networks This book written by physicists answers these questions and presents a general insight into the world of networks

**The Evolution of Chemical Knowledge** Jürgen Jost, Guillermo Restrepo, 2022-10-05 Chemistry shapes and creates the disposition of the world's resources and provides novel substances for the welfare and hazard of our civilisation at an exponential rate Can we model the evolution of chemical knowledge This book not only provides a positive answer to the question it provides the formal models and available data to model chemical knowledge as a complex dynamical system based on the mutual interaction of the social semiotic and material systems of chemistry These systems which have evolved over the history include the scientists and institutions supporting chemical knowledge social system theories concepts and forms of communication semiotic system and the substances reactions and technologies material system central for the chemical practice These three systems which have traditionally been mostly studied in isolation are brought together in this book in a grand historical narrative on the basis of comprehensive data sets and supplemented by appropriate tools for their formal analysis We thereby develop a comprehensive picture of the evolution of chemistry needed for better understanding the past present and future of chemistry as a discipline The interdisciplinary character of this book and its non technical language make it an ideal complement to more traditional material in undergraduate and graduate courses in chemistry history of science and digital humanities
