Evolution Of Religion A Reexamination:

The Evolution of Religion Bernard Joseph Verkamp, 1995 In the classical meaning of an essay this book is an attempt to try to unify material on religion from a variety of fields into one coherent frame of reference The author obviously does not claim deep expertise in this luxuriance of disciplinary approaches to the field of religion but hopes that his efforts at the very least will inform some and stimulate others to renewed theorizing about their specialties The principal objective of this book then is to show that religion has evolved just like any other cultural entity At the same time the author parts company from the at times premature conclusions of earlier evolutionists of religion and therefore has subtitled the work a re examination The main diversion from such earlier analyses of the evolution of religion as those of Freud and Comte is in the denial that religion can be explained fully in empirical terms as a product of nature or culture The author assumes that for religion to have begun it must have sprung from some ontologically prior event that Christians would refer to as creation and Buddhists as transcendence where ultimate Reality empties itself into the temporal In other words the evolution of religion needs to be understood from a theological perspective At the same time the author is convinced that there is a great deal of empirical evolutionary information available from the natural and social sciences that sheds helpful light on even theologically oriented religious understanding Religion will always be around concludes the author not merely because of the way that it springs up out of human nature but also because of its adaptability It thus may be mankind's one best hope of survival **The**

religion within the context of the theory of evolution and the development of the human brain It is argued that Darwin s concept of natural selection gives the impression of making Homo sapiens passive recipients of the process of evolution To overcome this false impression and conform to the spirit of Darwin s theory this work proposes to supplement Darwin s theory by introducing a will to power into it that gives Homo sapiens agency to gain power and empower themselves to survive This achievement of empowerment has important consequences because it gives Homo sapiens an opportunity to invent religion and supernatural beings by means of their intuitive experiences performing like natural by products of the operation of evolution The human body and brain play essential roles in the process of evolution and development of religion a form of power that binds humans to transcendent powers empowers them unites them into enduring social units represents one of the elements of the beginning of human culture and enhances their chances for survival Because of its subject matter and approach this work includes a critical appraisal of scholars using the results of cognitive science research Because Homo sapiens invented supernatural beings and religion it seems irresponsible for a contemporary individual to choose to become an atheist an option that is explored in the final chapter about whether religion has a future

A Re-examination of the Religion of the Indus Civilization Herbert P. Sullivan, 1964

The Earth Is Our Home Nelson Rivera, 2016-11-14 This book demonstrates that Mary Midgley s philosophy of evolution points the way towards considering the earth as our only true home since we are products of this planet and its evolving and complex life along with every other organism From the knowledge of ourselves as knowing animals with a biological as well as a cultural history Midgley proposes the elaboration of an evolutionary epistemology that situates us firmly on the earth together with other creatures while at the same time helping us to build knowledge of the world from the complexity of the human experience I like to call this approach by a known theological analogy a view from below that is from the underside of the world from the realms of nature and history Such an approach does not begin by assuming conceptions of design or order in nature a view that we term from above although it does not rule out the possibility of teleological or metaphysical constructions of reality in the long run This down to earth approach I consider essential for any philosophy or theology that wants to take evolutionary theory seriously while committed to a proper and non dismissive assessment of religious views

recent work comparing the social theories of Marx and Weber this book examines their approaches to Oriental societies showing how in spite of the differences in their respective theorizations of the historical and political development of the West their work on the form of modern society in the Orient converges each complementing the other Fully conversant with recent scholarly work on Marx and Weber this comprehensive re examination of the points of convergence and departure in their work requires us to re evaluate both their positions in the history of sociology and their relevance to contemporary social questions As such it will appeal to scholars of social and political theory and classical sociology

The Absoluteness of Christianity and the History of Religions Ernst Troeltsch, 1971-01-01 In this seminal work pioneering theologian Ernst Troeltsch raises the question how can we pass beyond the diversity with which history presents us to norms for our faith and for our judgments about life He trenchantly probes the issue of how one religion when viewed historically in the context of other world religions can be universally and absolutely true Though many others since have explored the issue of historical relativism and religious truth few have done so with Troeltsch's determination and incisiveness and for this he has made a lasting contribution to Christian theology and the philosophy of religion The questions Troeltsch poses in this book remain utterly significant for the thoughtful Christian today This reissue of a well known classic includes a foreword by theological titan James Luther Adams

History, Religion, and Antisemitism Gavin I. Langmuir, 1990 Discusses the essence of religion as a social phenomenon and religiosity a property of individuals from the perspective of a historian as a preliminary theoretical clarification in order to approach the problem of antisemitism and to provide a comprehensive rational answer to the question Why did non Jews from the Middle Ages to the present kill millions of almost defenseless Jews Using his own

definition of antisemitism see his *Toward a Definition of Antisemitism* 1990 considers the extreme irrationality of antisemitism as its essential feature which distinguishes it from other kinds of hostility toward Jews Places the origins of antisemitism in medieval Christian Europe when irrational Christian anti Jewish stereotypes and myths gained social significance and were incorporated into European culture and historiography Distinguishes a physiocentric antisemitism in the 19th century promoted by socialistic or racial theories culminating with Nazi antisemitism and the Final Solution

Darwin, Dharma, and the Divine G. Clinton Godart, 2018-03-31 *Darwin Dharma and the Divine* is the first book in English on the history of evolutionary theory in Japan Bringing to life more than a century of ideas G Clinton Godart examines how and why Japanese intellectuals religious thinkers of different faiths philosophers biologists journalists activists and ideologues engaged with evolutionary theory and religion How did Japanese religiously think about evolution What were their main concerns Did they reject evolution on religious grounds or as was more often the case how did they combine evolutionary theory with their religious beliefs Evolutionary theory was controversial and never passively accepted in Japan It took a hundred years of appropriating translating thinking and debating to reconsider the natural world and the relation between nature science and the sacred in light of evolutionary theory Since its introduction in the nineteenth century Japanese intellectuals including Buddhist Shinto Confucian and Christian thinkers in their own ways and often with opposing agendas struggled to formulate a meaningful worldview after Darwin In the decades that followed as the Japanese redefined their relation to nature and built a modern nation state the debates on evolutionary theory intensified and state ideologues grew increasingly hostile toward its principles Throughout the religious reception of evolution was dominated by a long held fear of the idea of nature and society as cold and materialist governed by the mindless struggle for survival This aversion endeavored many religious thinkers philosophers and biologists to find goodness and the divine within nature and evolution It was this drive argues Godart that shaped much of Japan s modern intellectual history and changed Japanese understandings of nature society and the sacred *Darwin Dharma and the Divine* will contribute significantly to two of the most debated topics in the history of evolutionary theory religion and the political legacy of evolution It will therefore appeal to the broad audience interested in Darwin studies as well as students and scholars of Japanese intellectual history religion and philosophy *The Two Religions of Israel* Thomas Kelly Cheyne, 1911 **Religious Thought in the Last**
