Richard's and June's current research interests relate to the interrelation between globalization and culture.

Research in the History of Economic Thought and Methodology Warren J. Samuels, Jeff Biddle, Donald F. Koch, 1995. Volume 25. C commences a series of class notes taken at Northwestern and Chicago during the period 1964-1967. The notes from courses at Northwestern are Robert Clower's course on economic theory and Frank Fetter's course on monetary institutions and policies. The notes from Chicago include George Stigler's course on industrial organization, Merton Miller's course on corporate finance and Daniel Orr's course on the theory of the firm. Also included are Warren Samuels' notes from James Earley's courses on economic theory and on money, income and price given at Wisconsin during 1954-1955 and Samuels's notes from a faculty seminar on myth, theology and society given by Robert T. Anderson at Michigan State University in 1974. The series presents review essays, multiple reviews and mini symposia on new works in this field. Volumes are broad in scope. The series fills a substantial gap in this field.

Elgar Companion to Neo-Schumpeterian Economics Horst Hanusch, Andreas Pyka, 2007. The Elgar Companion to Neo-Schumpeterian Economics is a cutting edge collection of specially commissioned contributions highlighting not only the broad scope but also the common ground between all branches of this prolific and fast developing field of economics. For 25 years economists have been investigating industrial dynamics under the heading of neo-Schumpeterian economics which has itself become a mature and widely acknowledged discipline in the fields of innovation, knowledge growth and development economics. The Elgar Companion to Neo-Schumpeterian Economics surveys the achievements of the most visible scholars in this area. The contributions to the Companion give both a brief survey on the various fields of neo-Schumpeterian economics as well as insights into recent research at the scientific frontiers. The book also illustrates the potential of neo-Schumpeterian economics to overcome its so far self-imposed restriction to the domains of technology driven industry dynamics and to become a comprehensive approach in economics suited for the analysis of development processes in all economic domains. Integrating both the public sector and financial markets, the book focusses on the co-evolutionary processes between the different domains. As a roadmap for the development of a comprehensive neo-Schumpeterian theory, the Companion will be an invaluable source of reference for researchers in the fields of industrial dynamics and economic growth and academics and scholars of economics generally. PhD students will find the Companion an indispensable general introduction to the field of neo-Schumpeterian economics. It will also appeal to politicians and consultants engaged in national and international policy as the Companion deals with the highly important and ever topical phenomena of economic development.

The General Theory of Economic Evolution Kurt Dopfer, Jason Potts, 2007-09-27. The first book to chart the development of the field of evolutionary economics, this book provides an integrated generic framework to define the rules of an economic system, how

they are coordinated and the causes and consequences of their change Packed with pedagogical features including essay and tutorial questions case studies and an extensive bibliography this book proposes a new analytic framework for the study of the nature and causes of long run economic growth and development in market systems analyzes the foundations of the neoclassical tradition before developing a thesis through micro meso and macro domains drawing conclusions as to what can be learned from the point of view of policy analysis focuses on an open systems analytical framework and successfully formulates and refines the analytical foundations of a new general theory of economic evolution This volume is essential reading for scholars and students of economic evolution and as well as for anyone who seeks to better understand the complex evolutionary nature of the structure and dynamics of the knowledge based economy in today s society *Frontiers of Evolutionary Economics* John Foster,J. S. Metcalfe,2003-01-01 This compilation by leading protagonists is a must for a greater understanding of the world we are living in and wanting to see change for the better Gerry Sweeney Prometheus Modern evolutionary economics is now nearly two decades old and in this excellent book a distinguished group of evolutionary economists identify the most important developments and discuss the direction of future research By moving away from traditional concerns with the operation of selection mechanisms towards a preoccupation with the manner in which the novelty and variety provide fuel for such mechanisms the authors identify a key development in the field Evolutionary economists have been drawn into the modern complexity science literature which attempts to provide an understanding of how and why complex adaptive systems engage in processes of self organization The goal is to provide an integrated analysis of both selection and self organization that is uniquely economic in orientation After a brief overview of the many key achievements and continuing challenges the first part of the book deals with theoretical perspectives discussing institutional change social constructions complexity selection and self selection and the usefulness of theory Part two deals with empirical perspectives and includes discussion of replicator dynamics the measurement of heterogeneity and complexity and modelling organizations as complex adaptive systems This unique book will appeal to evolutionary and industrial economists and policymakers involved with issues of innovation and management scientists The Theory of the Firm Nicolai J. Foss,2000 **Science, Technology and Innovation in the History of Economic Thought** Estrella Trincado Aznar,Fernando López Castellano,2023-10-18 This book provides an overview of the importance of science technology and innovation in the history of economic thought It charts how science has responded to societal needs and global challenges to highlight the way in which knowledge and technology have been used to benefit society Particular attention is given to modern concerns such as climate change technological unemployment and social unrest which are contextualised within the work of the Scottish Enlightenment Marx Weber and Schumpeter Broader debates including the relationship between invention and economic development the alienation of labour and institutional change are also considered This book aims to shed new light on our understanding of science technology and innovation by placing them

within ideas from the history of economic thought It will be relevant to students and researchers interested in the history of economic thought and the economics of innovation and technology *The History of Economic Thought & Analysis* Emma Lila Fundaburk,1973 **Innovation and Entrepreneurship in Forestry in Central Europe** Ewald Rametsteiner, Gerhard Weiss, Klaus Kubeczko, 2005-07-01 Current developments in Central Europe will have far reaching consequences on the region s forestry and related institutional arrangements such as forest administration extension services and forest research Future prospects for the rural population living on income from forestry will considerably depend on how individuals and organisations react in view of these changes It will be vitally important how forest owners and managers apply new knowledge in forestry and how organisations best deal with the emerging changes Innovation and entrepreneurship are main driving forces for economic growth competitiveness and employment creation especially in rural areas From 2001 to 2003 the EFI Regional Project Centre INNOFORCE conducted research on innovation and entrepreneurship in forestry in Central Europe seeking answers to the following questions What is the situation and perceived future outlook for forestry in the region How important are innovation and entrepreneurship considered in the sector How much innovation and entrepreneurship is actually taking place What are supporting and impeding factors The research report provides new knowledge on innovation behaviour of forest holdings and forest related innovation systems in Central Europe and on changes that are necessary to enhance innovation and entrepreneurship in the sector Survey results are accompanied by lessons learned from more than 30 cases referring to innovations in forestry implemented in eight countries
