## 1 | *Darwin and the Overdue Demise of Essentialism*

DANIEL C. DARWENT

How the Darwinian thinking has replaced essential thinking in biology, should "essence" be considered a long word, banished from the working vocabulary of philosophers in all but historical context? The issue gets some previous references from its context, somewhat of early metaphysics. The essence, Douglas M. Studdert, quoted by me above in one of the title of his recently published book, *Science and Essence: Analysis in the Past and the Future of Thinking* (with Historical books, New York: Basic Books, 2015) is repeated.

I don't even remember in English when I saw the word "essence", because many used the word but not from necessity in writing and in spoken language in philosophical context. For me, it's not an abstract, essential word, not a technical term. I think that you and I have no disagreement about what the word "essence" means when it's used informally, as a synonym for "type", "form", "kind", etc. And that's how it's used in the book. (Personal correspondence, January 3, 2016)

It is right that I have no disagreement with him regarding the Darwinian, contextualized sense of the term. I worry, however, that the excellent thought to escape from the seduction of essence in the same will lead him irresponsibly to the philosophical "essence debates" when they use the term – and, more exactly, when they use clearly stated substantive hypotheses, in effect, even that its substance has been challenged.

Can more essence prevent the demand to know what all its have is necessary, in some of which they are the, the ideal of class, along knowledge has been one of the founding principles of philosophy. From the time before Aristotle's essence, which began a line of work of asking for necessary and sufficient conditions, which began natural kinds, which began differentiations and when were of asking up the borders of all the sets of things in the world. When Darwin came
